

Marcus Hook Grade Crossing Study

Project Overview

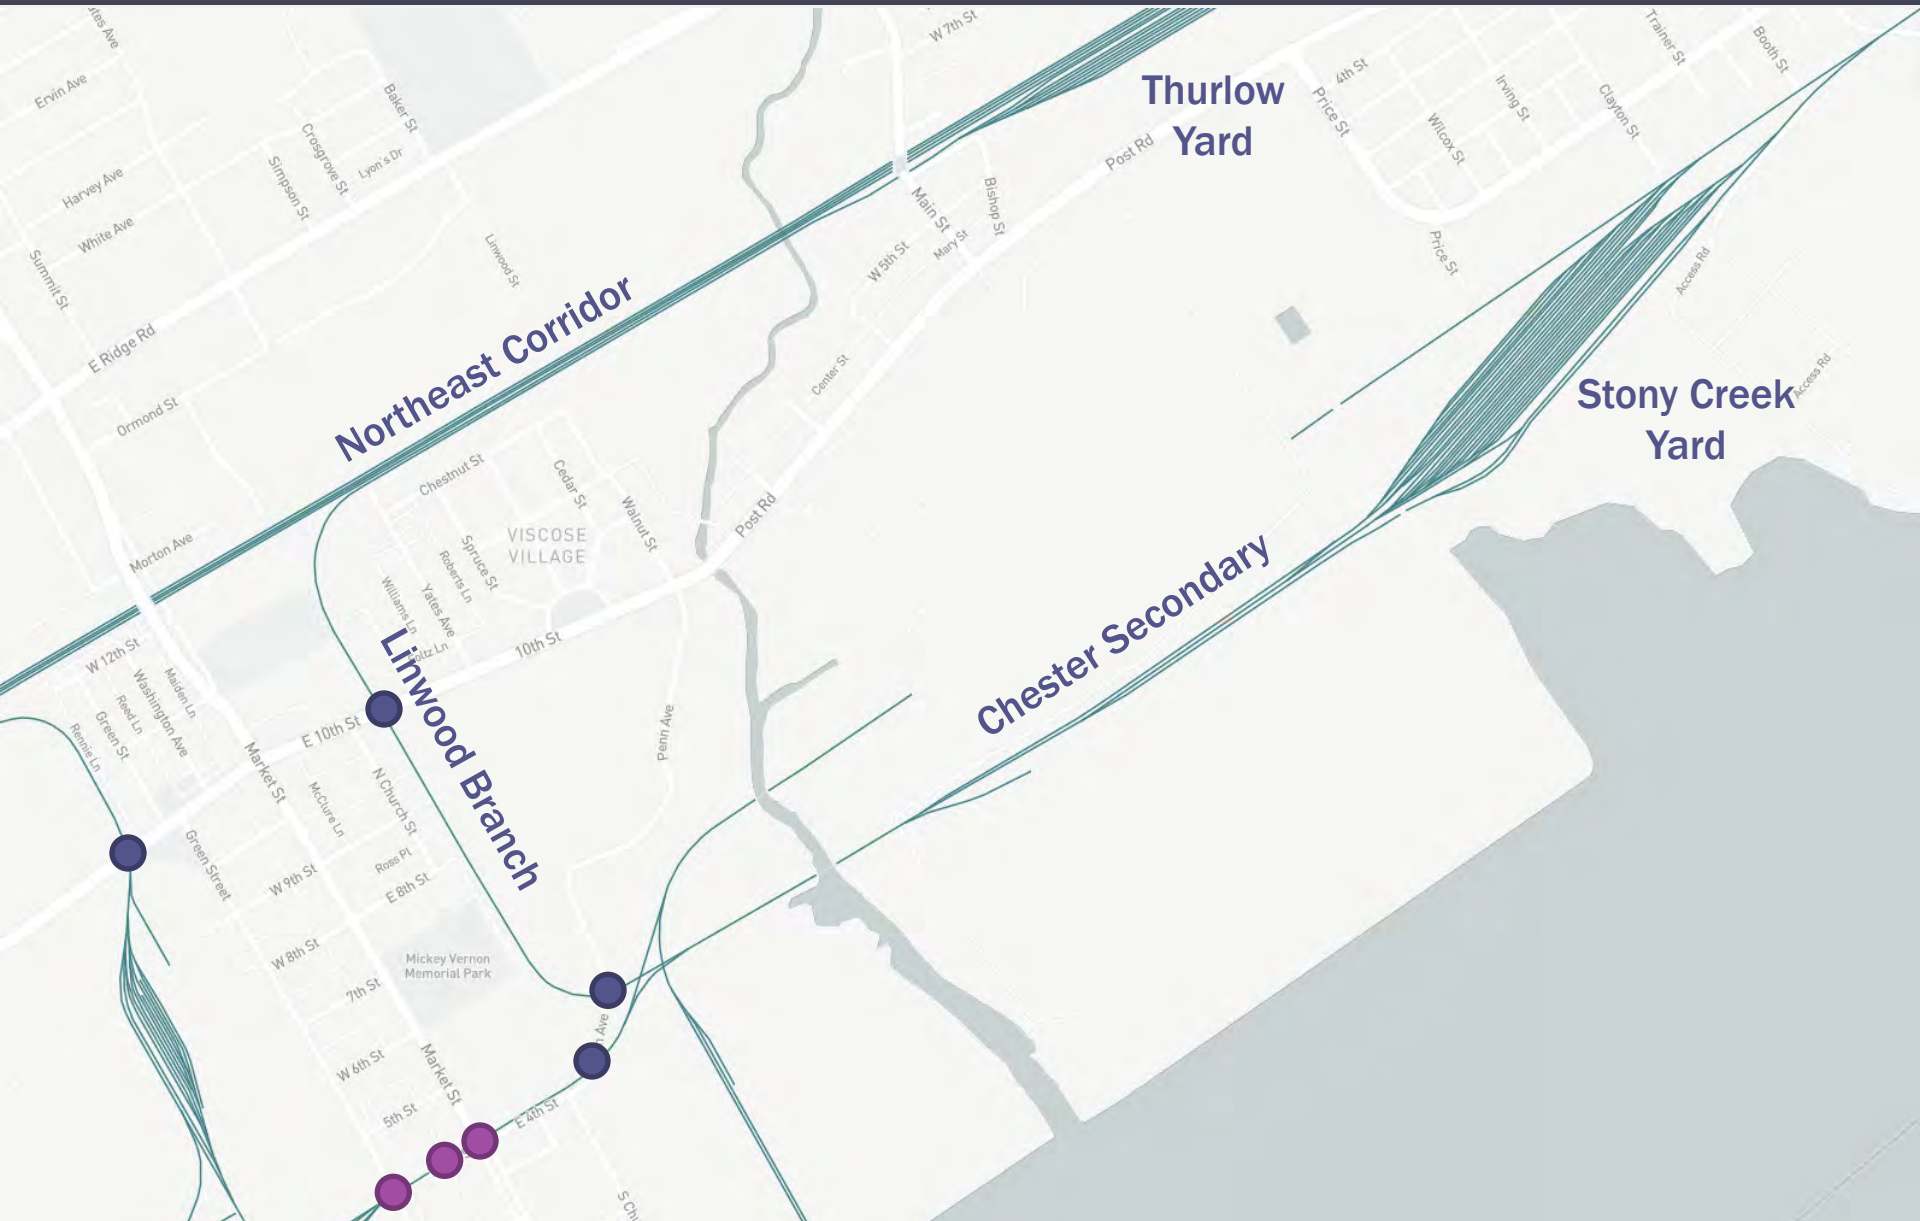

October 10, 2018

Primary Study Tasks

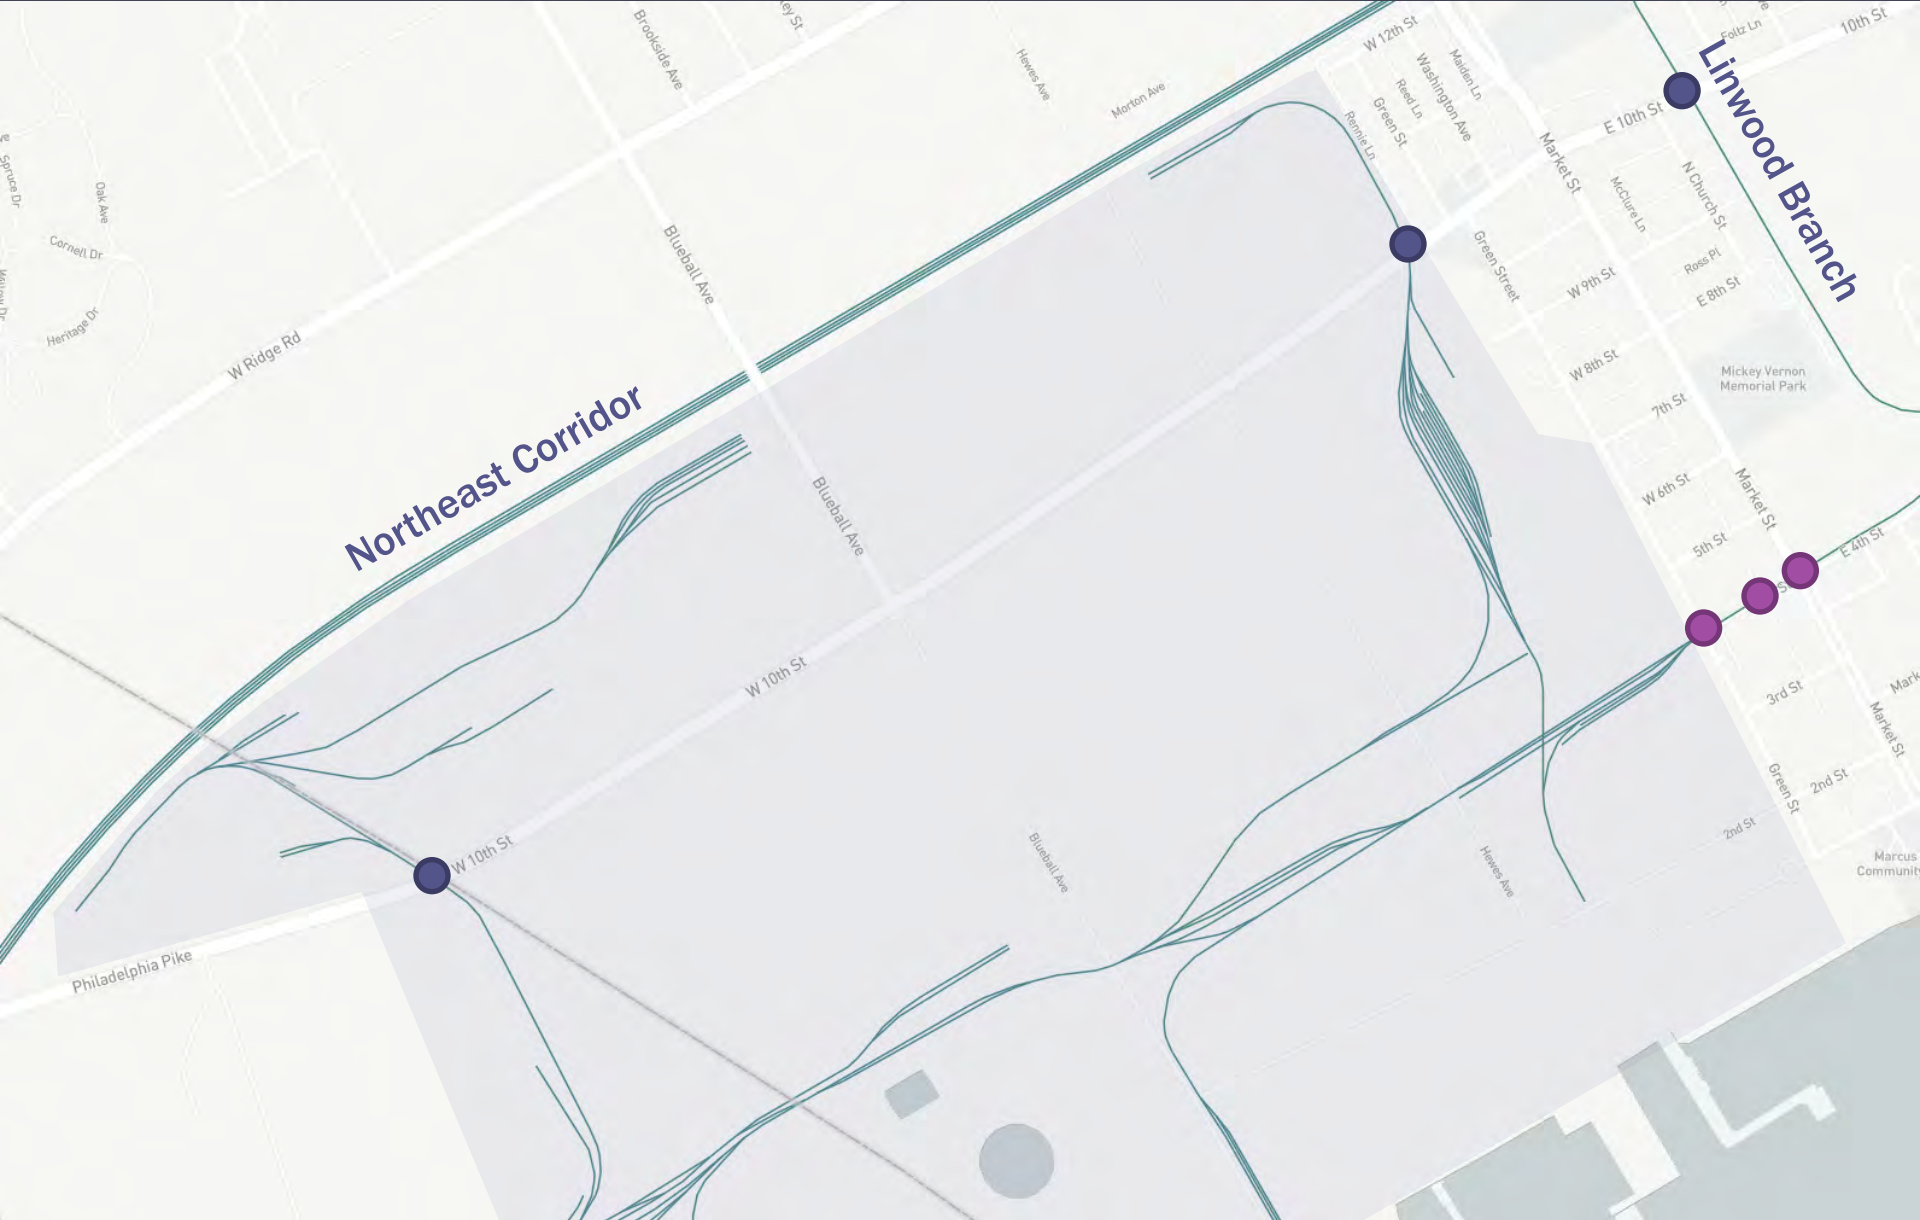

- Formulate steering committee
- Document existing conditions at 3 grade crossings
- Research best practices and options
- Identify and package potential safety improvements

Marcus Hook Railroad Context

Marcus Hook Industrial Complex

Marcus Hook Land Use

Marcus Hook Land Use

- Commercial
- Industrial
- Institutional
- Recreation
- Residential
- Transportation
- Undeveloped
- Utility
- Wooded

7

- Noise and operational concerns
- Safety at the crossing (lack of warning)
- Poor visibility and deteriorated signage
- Inconsistent/unpredictable activity
- Potential for extended blockage

FRA Incident History 1975-2018

Incidents

3

Injuries

2

Fatalities

0

Passive Warning Improvements

- Low cost signage and striping improvements
- Adds visibility and awareness of crossing
- Primarily municipal responsibility
- Includes:
 - Upgraded/new to signage
 - New pavement markings and striping
 - Ensure crossings have Emergency Notification System signs

The ENS sign contains:

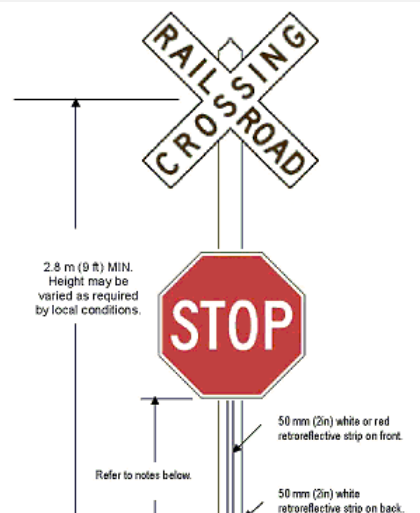

1. Each railroad's emergency contact number.
2. The U.S. Department of Transportation (USDOT) National Crossing Inventory Number which identifies the exact location of the crossing to the railroads.

- RR crossing
advance pavement
warnings
- High-visibility
crosswalks
- Proper lane
markings
- Stop bars

#592835V (Green Street)

- New three-way stop
- Stop signs with crossbucks
- Advance warning signs

#592835V (Green Street)

Striping + Signage [short-term]

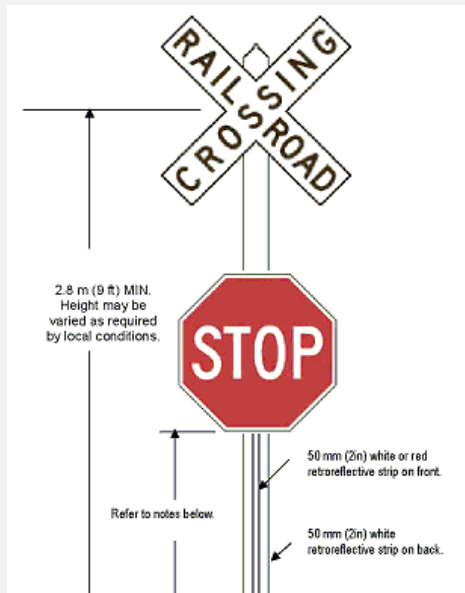

- RR crossing advance pavement warning
- High-visibility crosswalks
- Proper lane markings
- Stop bars
- Parking Restrictions

#592836C (Market Street)

Striping + Signage [short-term]

- Upgrade stop signs and crossbucks
- Advance warning signs

#592836C (Market Street)

Active Warning Improvements

- Improved visibility of crossing through addition of flashing light signals
- Requires activation system on rail
- Installation cost and footprint much greater than signage alone but replaces stated desire for flaggers

Stop-sign w/ flashing lights

#592835V (Green Street)

Stop-sign w/ flashing lights

#592836C (Market Street)

Next Steps

- Field Investigation
 - PennDOT, PUC, DVRPC, Marcus Hook, and Conrail
- Issue final report
- Coordinate FRA Inventory updates

October 10, 2018

Economic Impact of Delaware River Ports

Study Purpose

- **Retained by the Maritime Exchange of the Delaware River & Bay**
- **Assess cargo volumes handled at Delaware River ports**
- **Measure economic impacts of the Delaware River Ports:**
 - Public terminals
 - PhilaPort
 - SJPC
 - Port of Wilmington
 - Private terminals
- **Develop sensitivity models for each port facility**
 - Can be used for decision making purposes when re-opening the should a shutdown related to a Transportation Security Incident or other hazard occur
- **Compare results to 2010 study**

Flow of Economic Impacts

Methodology

- **Conduct interviews with maritime stakeholders :**
 - Directories and contacts provided by Maritime Exchange
 - Interviews with 477 firms and individuals
 - Firm-level of detail

- **Collect published data from :**
 - Hoovers, a publication of Dun & Bradstreet
 - U.S. Bureau of Census
 - U.S. County Business patterns

- **Assess tax impacts**
 - Tax Foundation
 - U.S. Census “State and Local Gov’t Finances”

Tonnage Comparison 2010-2017

Public and Private Facilities

Commodity	2017 Tons (1,000)	2010 Tons (1,000)	Change in Tons (1,000)	Percent Change
Liquid Bulk	68,555.6	53,769.4	14,786.2	27.5%

Total	90,366.8	68,917.0	21,449.8	31.1%

Economic Impact Summary of the Public and Private Maritime Cargo Activity along Delaware River

190,436 jobs related to marine cargo activity, of which 55,258 jobs dependent on marine cargo activity

- Direct Jobs: 20,798
- Induced Jobs: 25,240
- Indirect Jobs: 9,221
- 135,178 related user jobs

\$77.6 billion of total economic activity

- \$3.7 billion of direct business revenue
- \$3.5 billion of re-spending of direct income and local consumption purchases
- \$70.4 billion of output supported with related port users

\$2.6 billion of state and local taxes related to marine cargo

- \$655.2 million of direct, induced and indirect state and local taxes
- \$2.0 billion of additional state and local taxes generated by related users

Trends in Container Logistics and Implications for East Coast Ports and Freight Movement

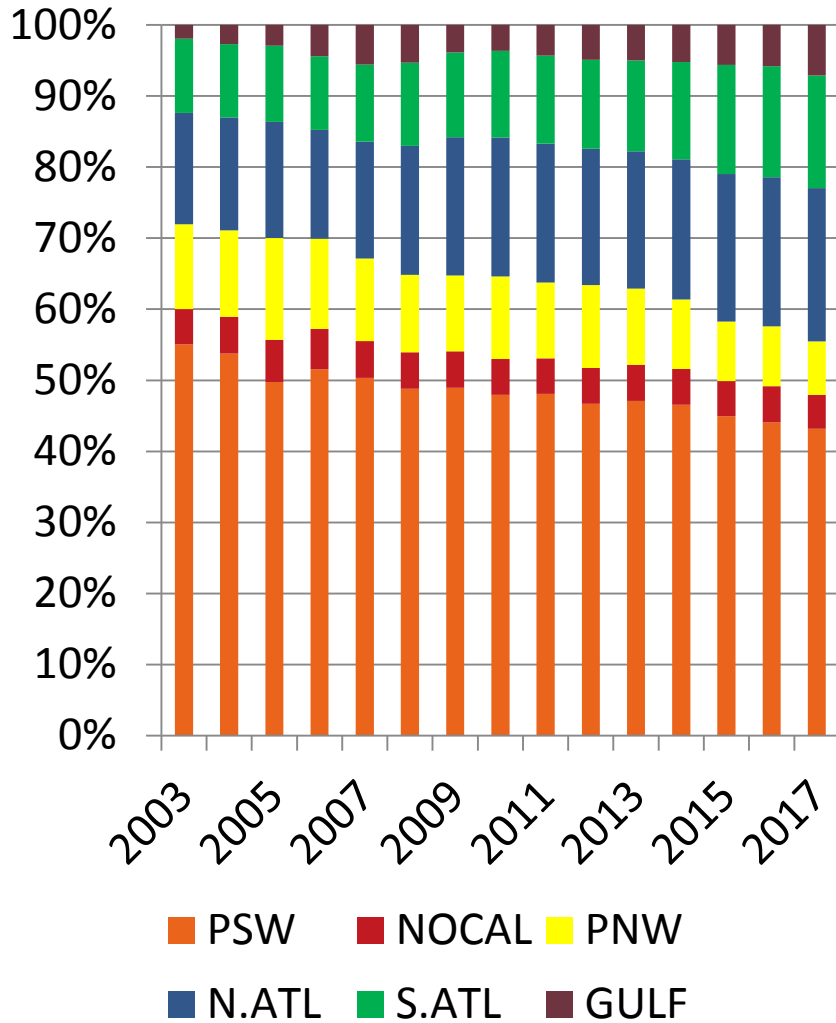

Historical Import and Export Containerized Tonnage (15-year annual growth)

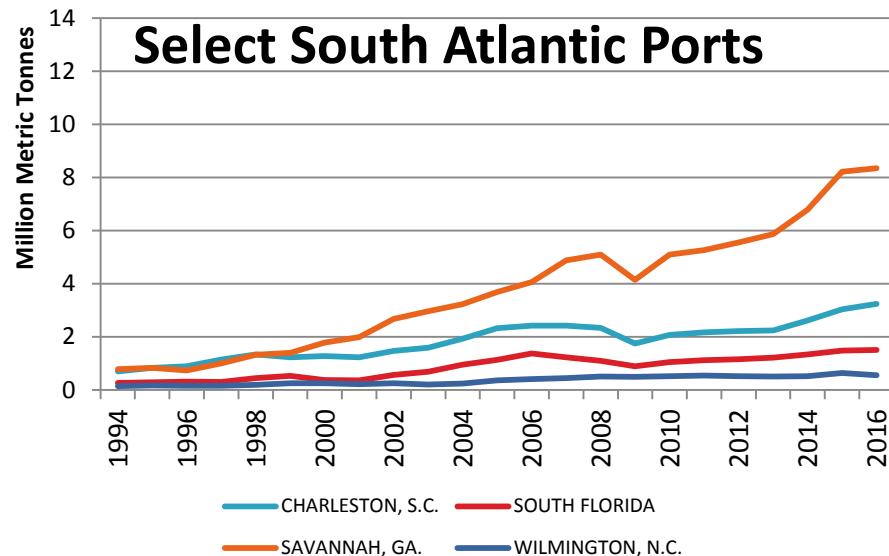

West Coast Ports Handle About 40% of Containerized Imports and Exports; However Share Has Been Declining

Asian Containers by U.S. Port Region – Imports and Exports

Growth in All-Water Services Accelerated After 2002 - Asian Imports Via Atlantic and Gulf Coast Ports

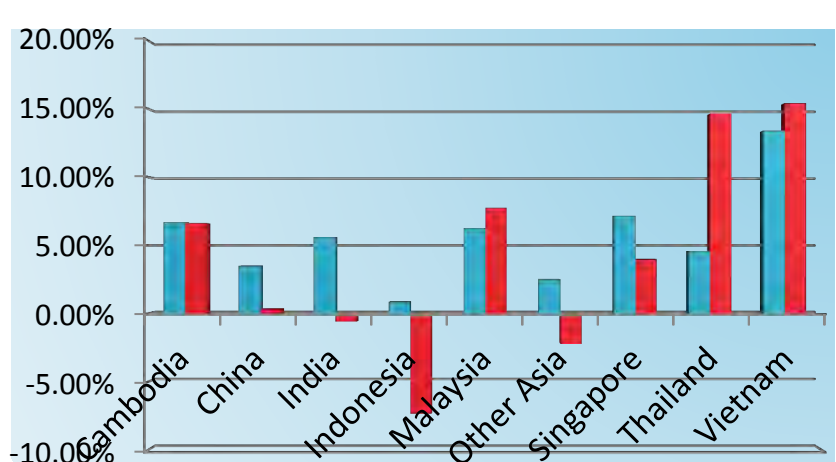

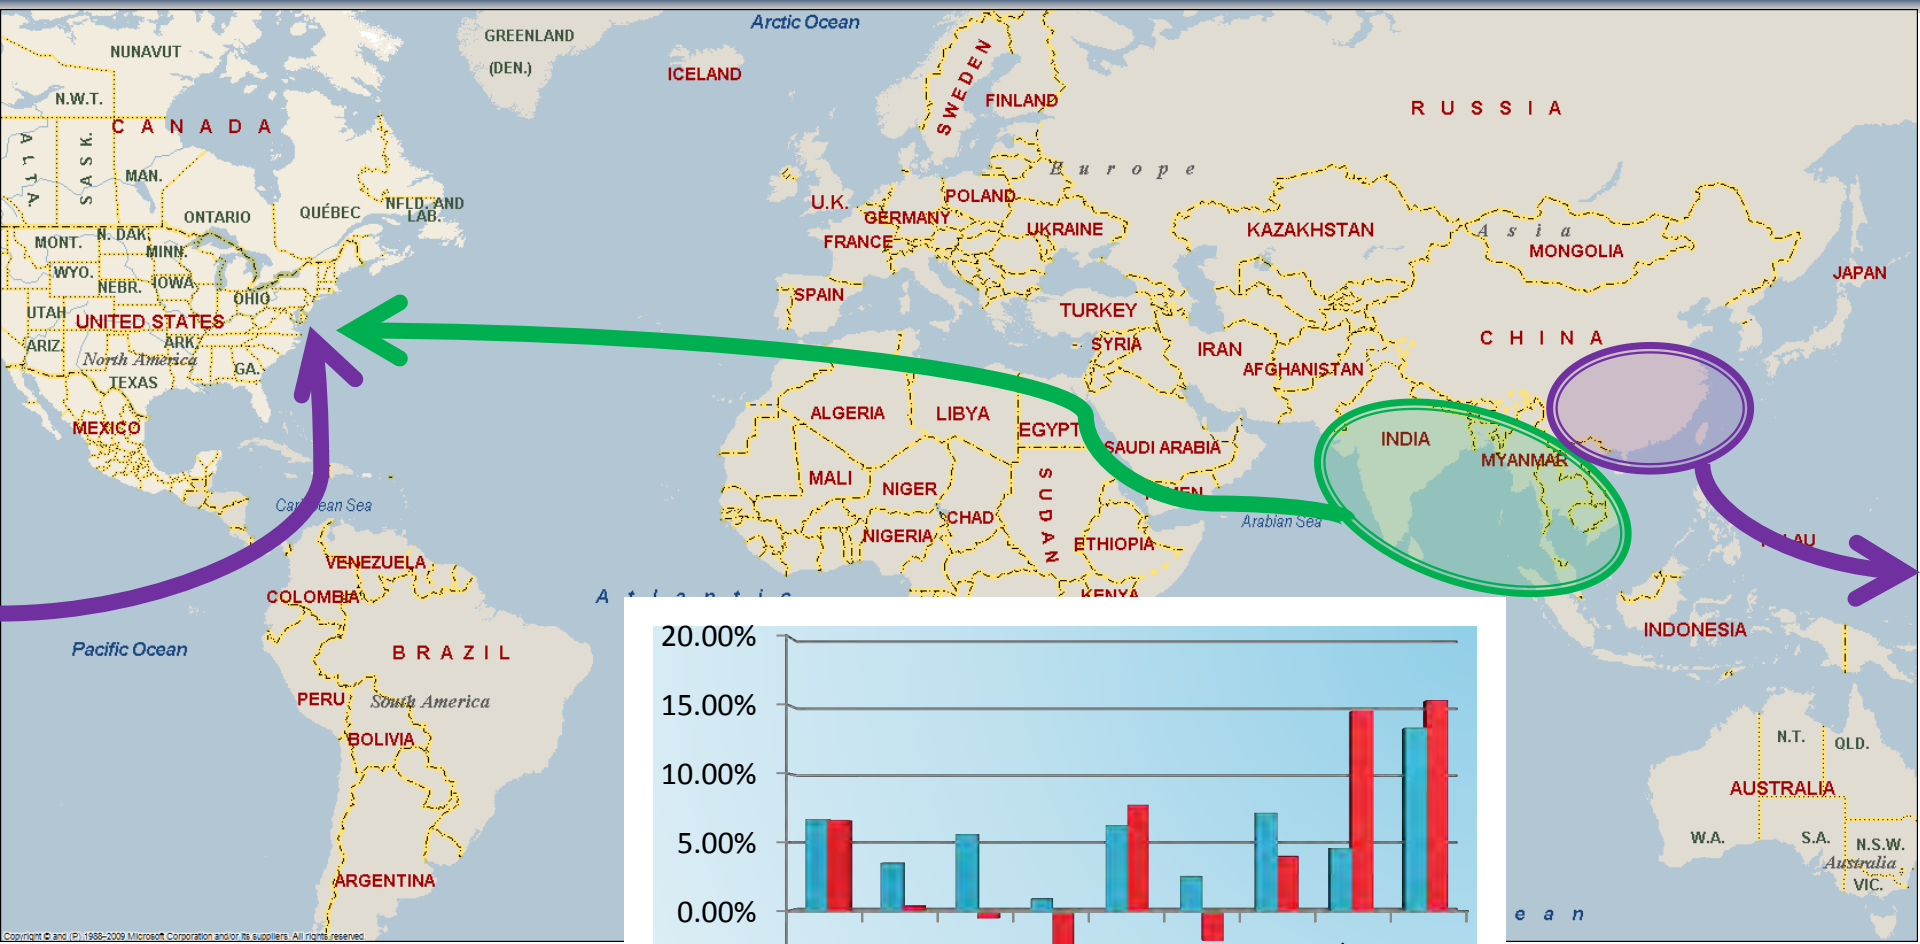

Asia, primarily China, has sourced about 60% of imported containerized tons; However supply sources are shifting...

Source: U.S. Census, USA Trade Online

Growth in Southwest Asian supply sources favor a Suez all-water routing to the East Coast

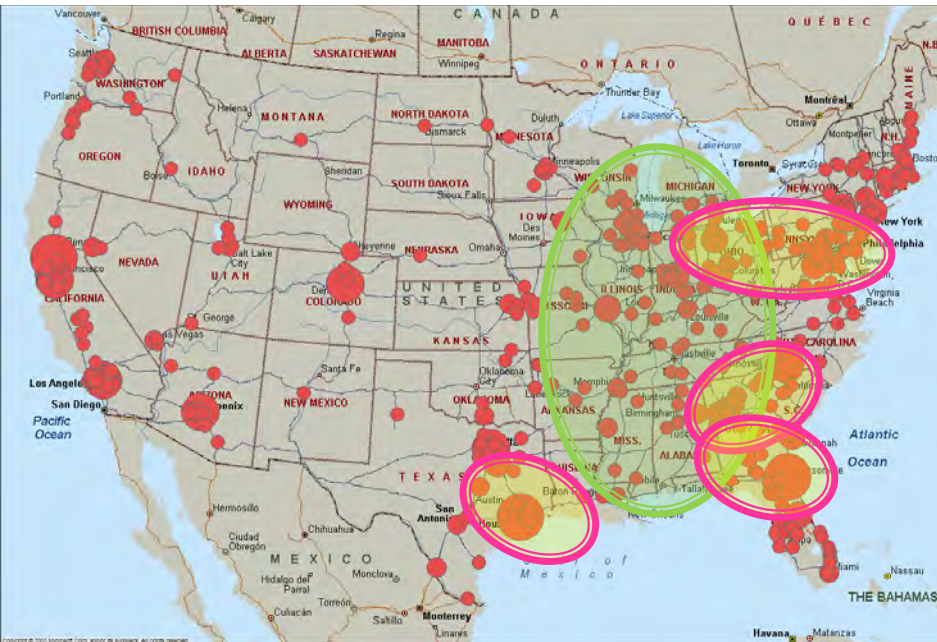

Source: U.S. Bureau of Census, USA Trade Or

■ 5 Year CAGR 2011-2016 ■ Change 2015-2016

The Midwest is the Battleground for All-Water vs. TransPacific

- Top 25 Retailers

- 26-50 Retailers

Lehigh Valley I-81 and I-78 Corridors growing in the region

Source: Chain Store Guide, National Retail Federation

Implications of Growth in Panama and Suez Container Traffic

- **East and Gulf Coasts will have to compete to handle the larger sized vessels:**
 - Channel Depth and Berth Capacity
 - Crane outreach capability
 - Gate and Port Access
- **Compete for local market**
- **Access to discretionary cargo markets for both truck and rail**
- **Rail projects underway to increase access to Midwest**
- **Truck retrieval times and truck queues**
 - Impact on local drayage by owner-operators - need to maximize turn times
 - Appointment system - improve efficiency under ELD requirements
 - Extended gate hours
 - Saturday vs. Sunday - Truckers hours of service
 - Off-dock and peel-off yards
 - Integrated IT systems

Final thoughts...Uncertainties and factors that may affect freight movement

- **Industry Alliances and Mergers**
- **Trade policies and tariffs**
- **Infrastructure project funding?**
- **Growth in 24 hour e-commerce fulfillment**
 - Near market warehousing/DC locations
 - Labor and Truck availability
- **Increased development of DC's near agricultural production centers to promote farm to market concept**
- **Automation/Robotics**
- **Labor contract negotiations and future of automated terminals**
 - Capital intensive, but labor costs still remain due to pension liability
- **Automated vehicles and impact on truck queueing and gate ops**
- **3-D Printing**

Thank You

I-95 Reconstruction Project Update

October 10, 2018

Interstate 95 Corridor

Interstate 95 Corridor Reconstruction

- 51 Miles
 - 325 Lane Miles
 - 210 Bridges
 - 55,000 to 190,000 Annual Average Daily Traffic
- 4 Sectors - in Bucks, Philadelphia and Delaware Counties (from north to south)
 - Sector D - NJ State Line to PA 73 (Cottman Avenue)
 - Sector A - PA 73 (Cottman Avenue) to I-676 (Vine Street Expressway)
 - Sector B - I-676 to Philadelphia International Airport
 - Sector C - Philadelphia International Airport to Delaware State Line
- Priority Based on Physical Conditions and Crash History
- Estimated Total Cost to Rebuild: \$8-10 Billion

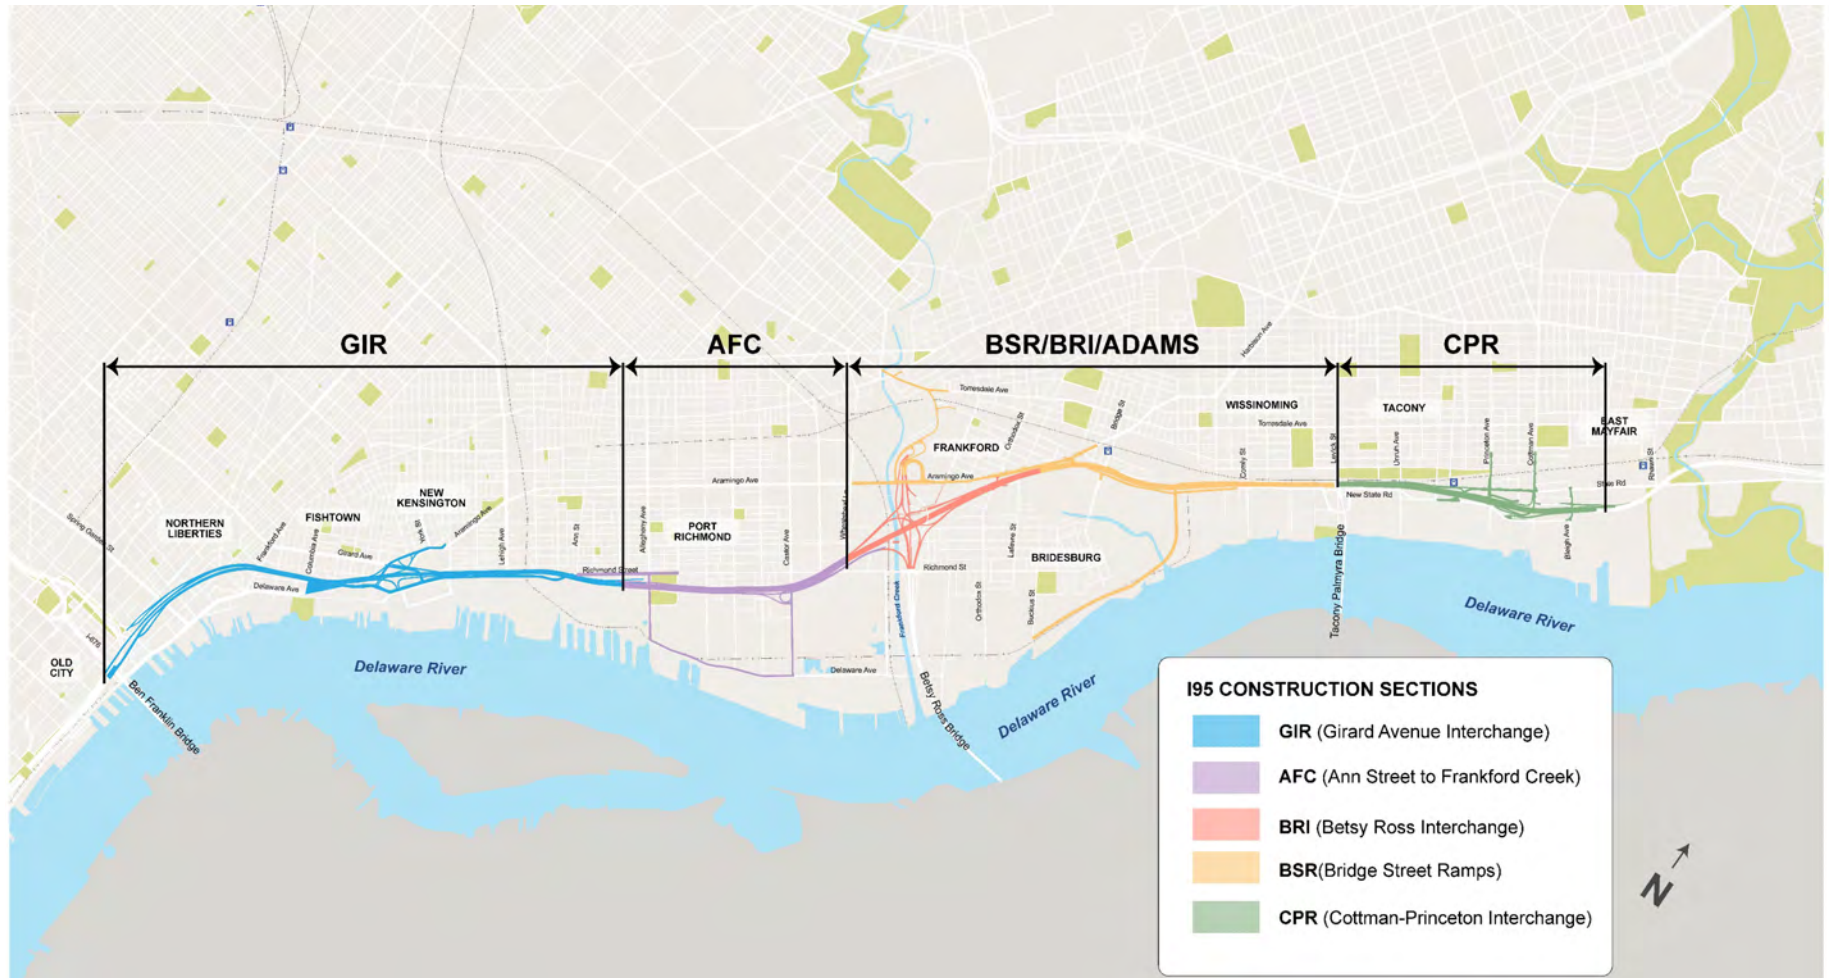

Major Stakeholders

Interstate 95 Sector A

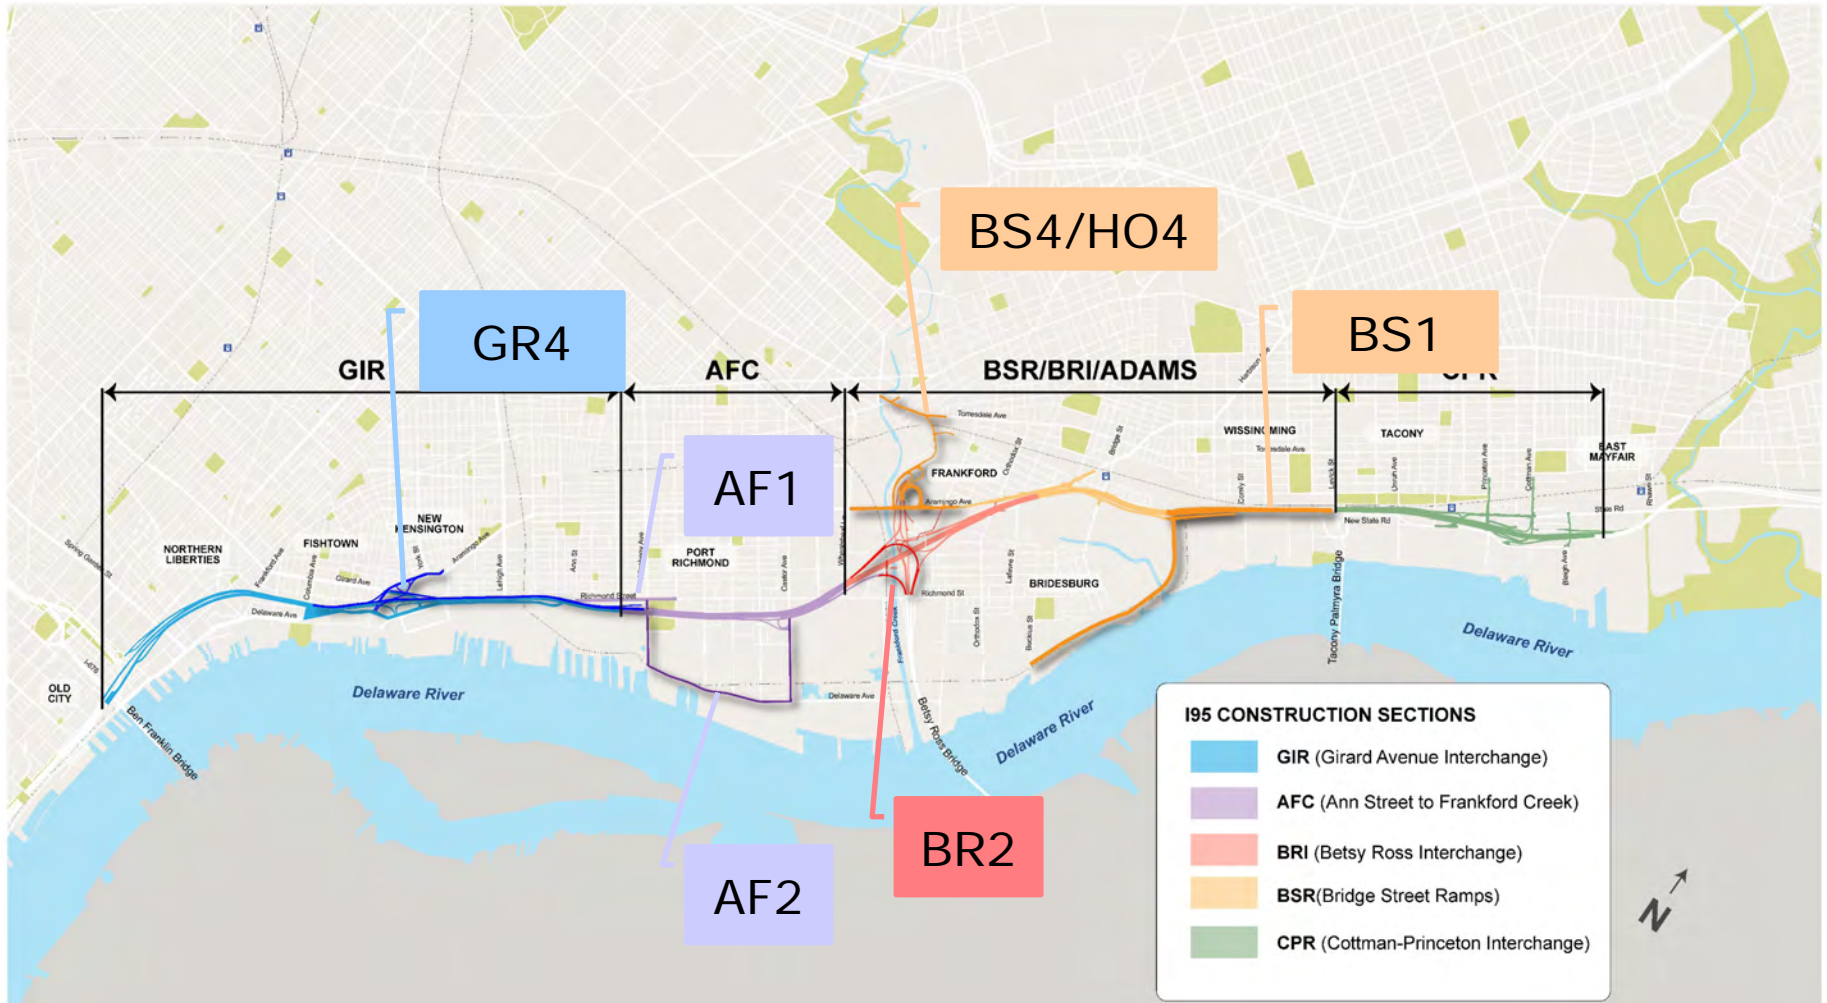

Interstate 95 Sector A – Design and Construction

- Limits: Cottman/Princeton Interchange to I-676 = 7.6 miles
- 5 Design Sections started in 1999
 - CPR
 - BSR/BRI
 - AFC
 - GIR
- Scheduled Construction from 2008 to 2031
- \$2.7 +/- Billion Total Estimated Cost
- \$1.23B delivered from 2008 to 2018
- 3 Lanes of Traffic Maintained in Each Direction with some overnight lane closures
- 3 Major Bridge Crossings: Ben Franklin, Betsy Ross, Tacony-Palmyra
- \$150M+ Congestion Mitigation Program investments

I-95 Construction – Projects 2018-2020

Sector B Overview

- Limits: I-676 Interchange to Broad Street
- Construction Expected to begin in 2030
- Major Bridge Crossings: Ben Franklin, Walt Whitman
- Current Active Planning Projects
 - CSP - Central to South Philadelphia Corridor Study
 - CAP - Central Access Philadelphia

Interstate 95 Section CSP

- Meet City, region, and eastern seaboard multimodal needs
- I-76 and Walt Whitman bridge Interchange locations to be examined
- Waterfront development, freight rail and Port coordination
- Improve access to important expanding economic nodes
 - Port
 - Stadium District
 - Navy Yard

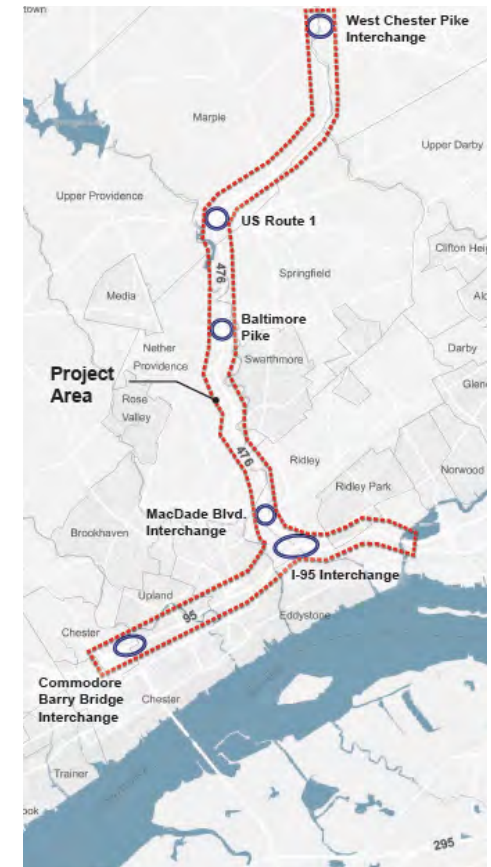

Interstate 95 Section CAP

- Final Design starting
- Constructing cap over I-95 and Columbus Blvd near Penn's Landing,
- Extension of South Street Bridge
- Waterfront Delaware Avenue trail
- Construction anticipated to begin in 2021

Sector C Overview

- Delaware state line to Girard Point bridge
- I-95 mainline construction scheduled after Sectors A and B
- Major Crossing: Commodore Barry Bridge
- Current Projects
 - I-95/322
 - I-95/476 Flex Lanes

Sector D Overview

- PA 73 to NJ state line
- Major Bridge Crossings: Turnpike, Scudders Falls
- Current Project
 - I-95/Turnpike Interchange

Program Schedule and Funding

- Funded by Regional and Interstate Programs
- Approximate \$200M Yearly Cash Flow (Design and Construction)

Turnpike Opening Traffic – SB

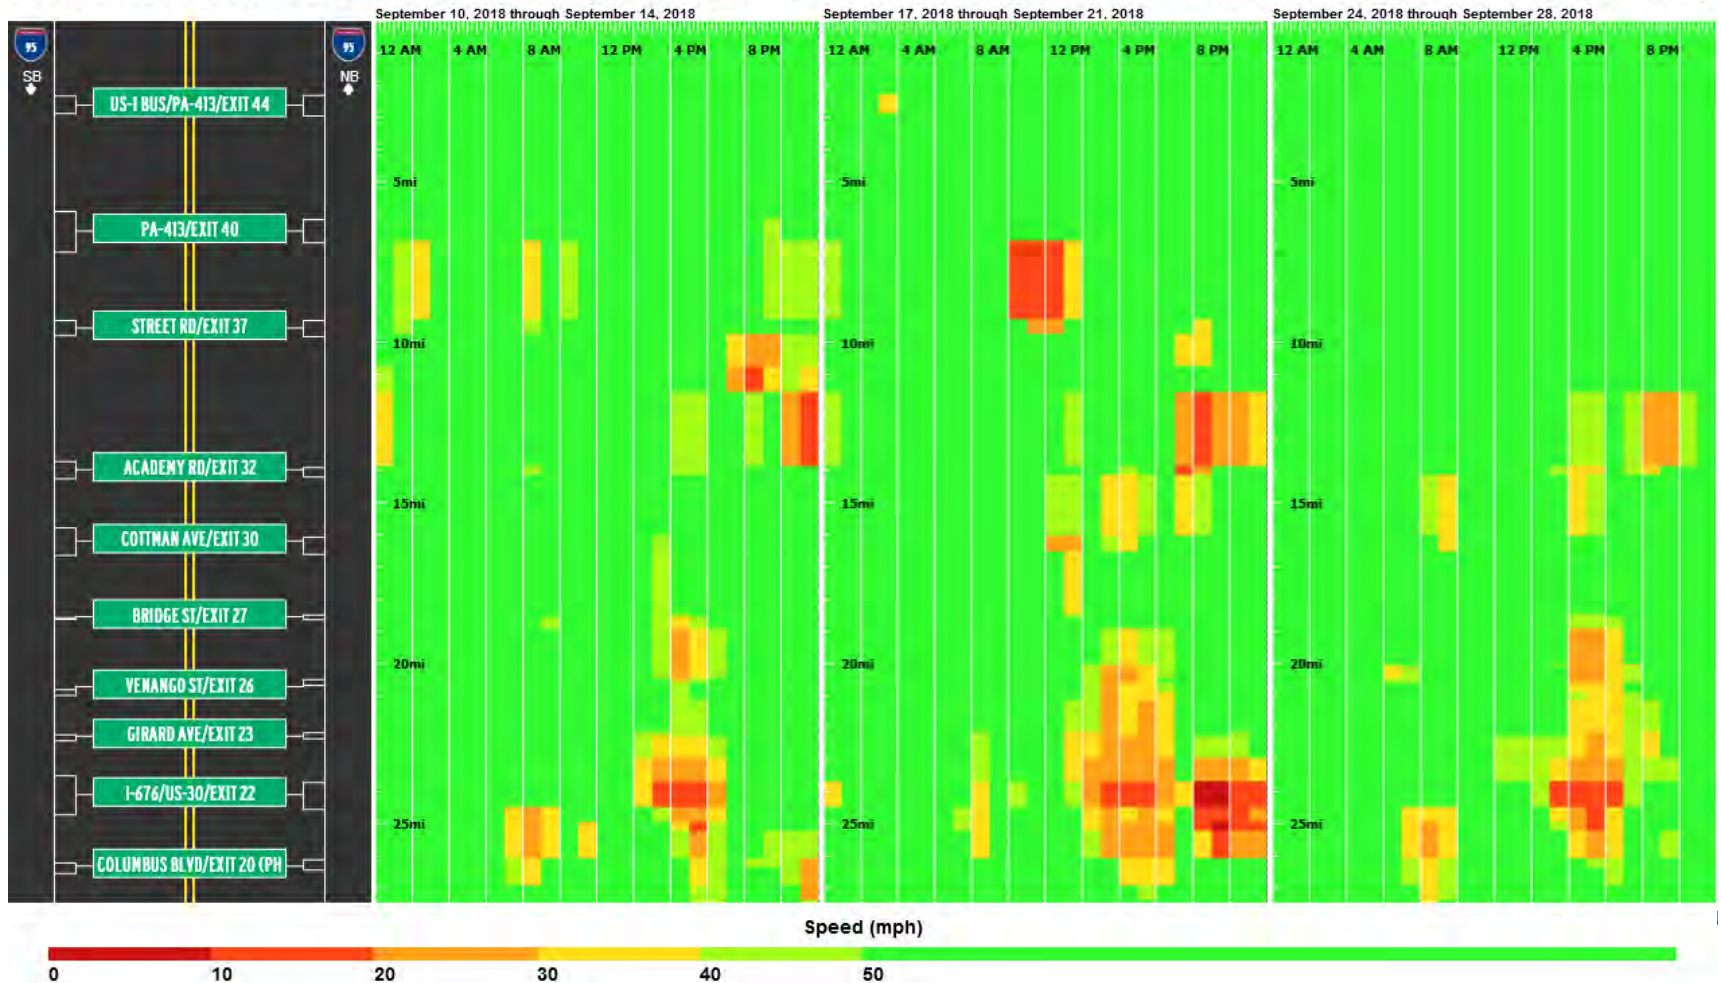

Speed for I-95 between I-76/Exit 19 and US-1/Exit 46 using INRIX data

or September 10, 2018 through September 14, 2018, September 17, 2018 through September 21, 2018, and September 24, 2018 through

Turnpike Opening Traffic – NB

Speed for I-95 between I-76/Exit 19 and US-1/Exit 46 using INRIX data
or September 10, 2018 through September 14, 2018, September 17, 2018 through September 21, 2018, and September 24, 2018 through

Congestion Management

DVRPC

- Leads Congestion and Incident Management Processes
- Provides **Regional Integrated Multimodal Information Sharing (RIMIS)**

SEPTA

- Additional Double Deck Rolling Stock and Station Parking Capacity
- Cornwells Heights Real Time Available Parking Information and Train Arrival DMS postings

City of Philadelphia

- Ongoing Construction Phasing and Interchange Detour Routes
- Improved Bike and Pedestrian Trail Connections
- Roosevelt Boulevard

TMA –Transportation Management Associations

- Business and Corporate outreach

Corridor Intelligent Transportation Systems (ITS) Expansion

- Integrated Corridor and Active Traffic Mgmt
- Variable Speed Limits

Corridor Freight Centers

Efficiency & Access

- Easy Access
 - 7 miles from downtown Philadelphia
 - Close to I-95 & I-76
 - Attractive Highway Network Critical to Cargo Carriers
 - Proximity to Delaware River Port Complex

PHL Development Relates to Regional and State Economic Development

- **Current Capital Development Initiatives**
 - Airfield Program (Runway 9R-27L Extension)
 - Competitive advantage in growing long-haul international air service
 - Terminal Modernization Program
 - Strengthens our hub and international gateway air service structure
- **New Cargo Development Opportunity**
 - Recent commercial property acquisition
 - 136 acres adjacent to Cargo City now available for development
 - Competitive advantage to grow air cargo market
 - Economic benefits to the Region and Commonwealth

PHL Air Cargo Profile

- PHL’s core catchment area encompasses all or parts of 6 states
- In 2016, the area’s air cargo exports/imports were valued at \$53 billion
- PHL captured only 9% of the catchment area market share in 2016
 - Nearly 60% of the share passed us by, and was captured by neighboring airports JFK, EWR and IAD
 - Cargo facility limitations place PHL at a competitive disadvantage
 - Intermodal transport through distant air gateways creates supply chain inefficiencies
- Air Cargo Development Initiative at PHL
 - Approximately 1.5 million SF (including an additional 1M SF in new development potential) can be made available for air cargo operations
 - Comparatively, JFK air cargo facility: 4.0 million SF

PHL CORE CATCHMENT AREA AIR EXPORT VOLUMES BY GATEWAY AIRPORT (CUSTOMS PORT) – 2016

Source: WiserTrade

PHL Existing Cargo Facilities

EXISTING:

Cargo City

- 138 Acres
- 450,000 SF Cargo Facilities

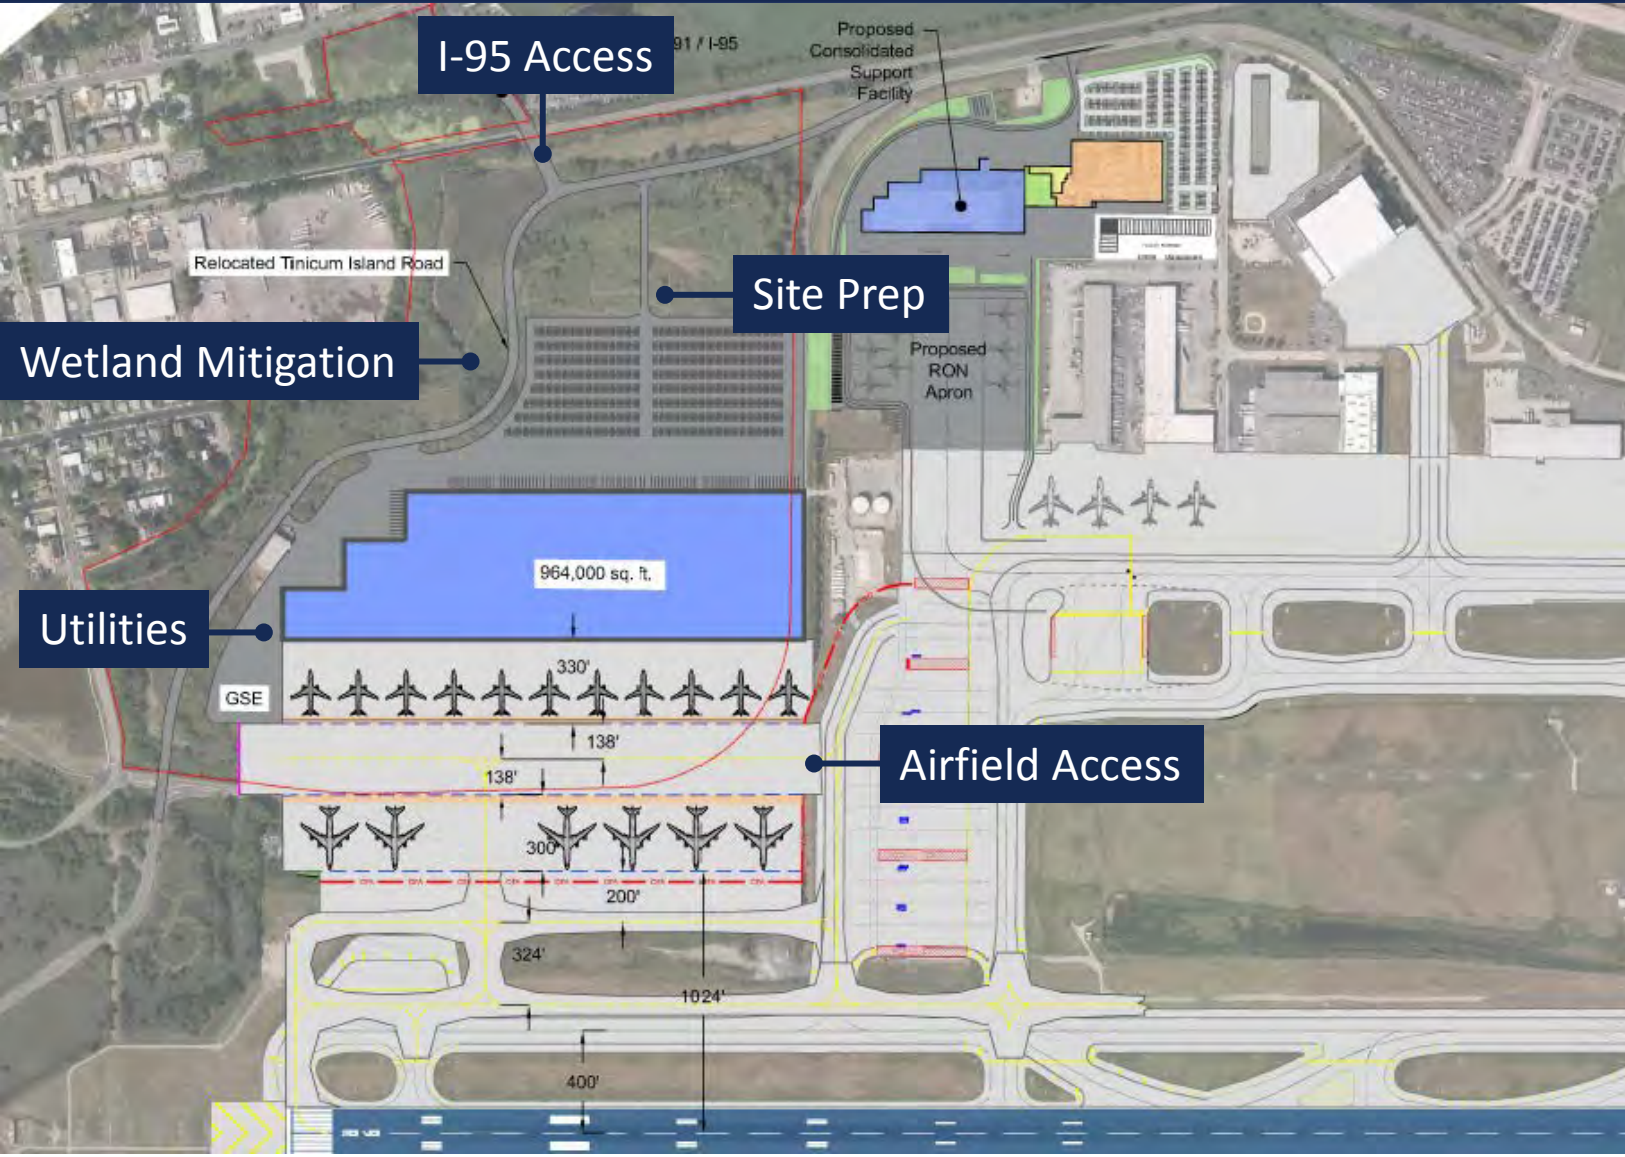

West Cargo Expansion

EXPANSION:
West Cargo
• 136 Acres
• 1M+ SF Cargo Facilities

EXISTING:
Cargo City
• 138 Acres
• 450,000 SF Cargo Facilities

Cargo Development Opportunity – A Potential Layout Concept

Site Preparation/ Development Needs:

1. Wetlands/Environmental
2. Utilities Development
3. Tinicum Island Road Relocation
4. Site Preparation/Rough Site Grading
5. Noise Barrier
6. Airfield Access/Apron/Hardstands
7. Access to I-95

Cargo Development Area Access to I-95 via Current Road Network

- Access to and from I-95 South is adequate
- Access from I-95 North is adequate
- There are 2 options to access I-95 North that are not ideal:
 - Bartram Route, 4 miles, 9 traffic lights
 - Hog Island Route, 6.6 miles, 1 stop sign

“Seed” for Growth: Economic Impact Specific to Air Cargo Development

Economic Impact of Construction of Facilities

- \$1.4 Billion in development costs
- \$2.5 Billion in total regional economic impact
 - Direct, indirect and induced impact
- 15,000 job-years in employment
 - \$1 Billion in earnings (including direct and induced impact)

UNDER CONSTRUCTION

Economic Impact of Ongoing Operations

- 1M + square feet facility operation
- \$870 Million in annual economic impact
 - Direct, indirect and induced impact
- 6K jobs with \$350 Million in earnings (including direct and induced impact)

Prospect for Regional Growth from the “Seed”: The Longer Term Broader Impact on Regional Competitiveness

Regional Efficiency Impacts:

- Improved infrastructure allows transnational companies to remain competitive, and helps attract foreign investment
- Improved efficiency for regional businesses, promoting growth/expansion
- Increased efficiency and competitiveness could result in 1 - 2% in gross metropolitan product (GMP) which would result in an additional \$5B - \$10B in annual economic output throughout the region

This development is an initial investment in building the type of infrastructure that will be necessary for our metropolitan region to compete effectively with the rest of the world in the 21st century.

Summary

- The PHL air cargo catchment area is one of the strongest in the US for high value cargo
- PHL currently captures a very small portion of the market due to facility limitations
- A new site is available to build world class cargo infrastructure and attract interested air cargo carriers
- This opportunity will improve Pennsylvania's competitive position in the market and yield attractive economic benefits
- This is clearly a joint City, Region and Commonwealth economic development opportunity
- We need development assistance in the form of incentives, funding and agency cooperation to make the initiative a success

The MANFREDI Companies

Cold Storage, Repackaging and Distribution for imported and domestic fruits and vegetables across North America

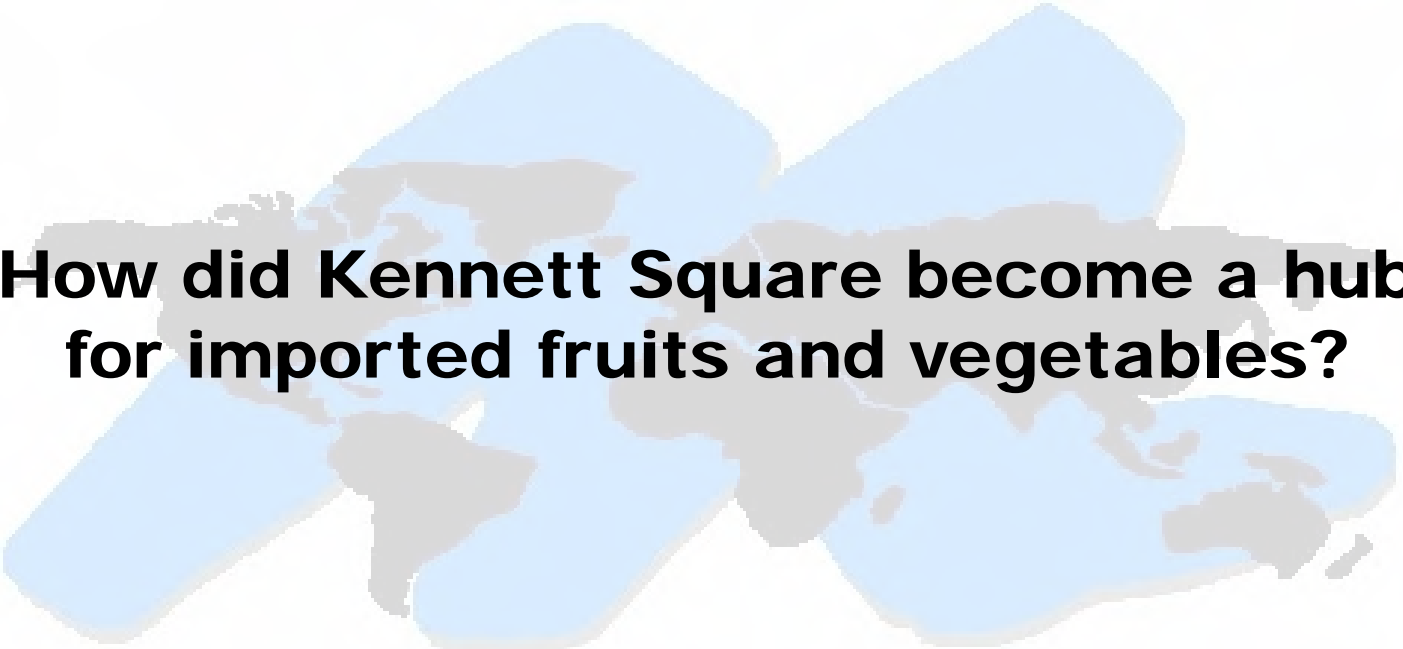

HISTORY

- Family business in same location since 1932.
- Evolved into a 27,500 pallet capacity food grade warehouse.
- Currently storing products from over 20 countries around the world.
- Located in Kennett Square, PA. New property site located NJ.

ADDITION 2018

How did Kennett Square become a hub
for imported fruits and vegetables?

MANFREDI COLD STORAGE

- Temperature controlled warehousing operation ranging from 0' to 50' degrees F.
- Complete Automatic Emergency Back Up Power for the entire facility.
- Completely wireless RF network.
- Entire facility is wired with closed circuit video.

Warehouse Information

- Low density racking allows for quick turn around time and improved temperature control / airflow.
 - Primus GFS inspections annually.
 - Certified for storing Organic food items. CCOF
 - AIB Superior Rating!!
-
- Currently case picking over 125 orders, 15,000 cases a day on third shift.

Inventory Control Systems

REAL TIME INVENTORY

- Complete access to inventories, shipment histories and pending loads via internet using terminal services.

-Custom reporting available.

-Advanced EDI including e-mail and most internet protocols.

Camera Access

- Entire facility is wired with closed circuit video.
- Camera access through the internet for your account from anywhere around the world.
- All inbound and outbound loading is monitored and recorded for 90 days.
- Video recordings are time stamped to match up against all truck loading information.

INTERNATIONAL REPACK

- Offering custom bagging, labeling, and repacking.
- All work is updated real time into inventory control system.
- Reconditioning services available to customer specified criteria.
- In house QC services available

Ripening Rooms

- 8 State of the Art ripening rooms from Dade Services.
- Remote computer access to all processes.
- All ripening rooms tied to a central refrigeration plant and backed up with automatic emergency generators.

Ozone Generators

- All rooms protected with Ozone, constantly sanitizing the contents of the entire room.
- Reduces mold and controls ethylene production.
- Computer controlled and monitored to maintain worker safety.

INLAND TRANSPORTATION

Daily service moving cargo to
and from the waterfront.

- Daily presence to all piers on the Delaware River.
- All drivers are TWIC and Sealink Certified.
- Company Owned Chassis.
- Permitted to haul overweight; up to 90,000 lbs.

MANFREDI LOGISTICS

In house, asset based carrier
Daily LTL delivery throughout Mid West,
Mid Atlantic, and North East.

- Scheduled outbound runs.
- Trucks are Satellite tracked & temperature monitored.
- Modern asset based fleet with air ride suspension.
- Trucks are "Smart Way Certified."
- Recently added Split Temperature Trailers to our fleet.

NATIONAL Refrigerated Freight

-MANFREDI in house freight brokerage division..

NATIONAL
REFRIGERATED FREIGHT

Moving refrigerated freight all through the US

COMING SOON ! MANFREDI REFRIGERATED DISTRIBUTION CENTER

Construction in PEDRICKTOWN, NJ to break ground fall 2018
Site is 3 miles south of Commodore Barry Bridge

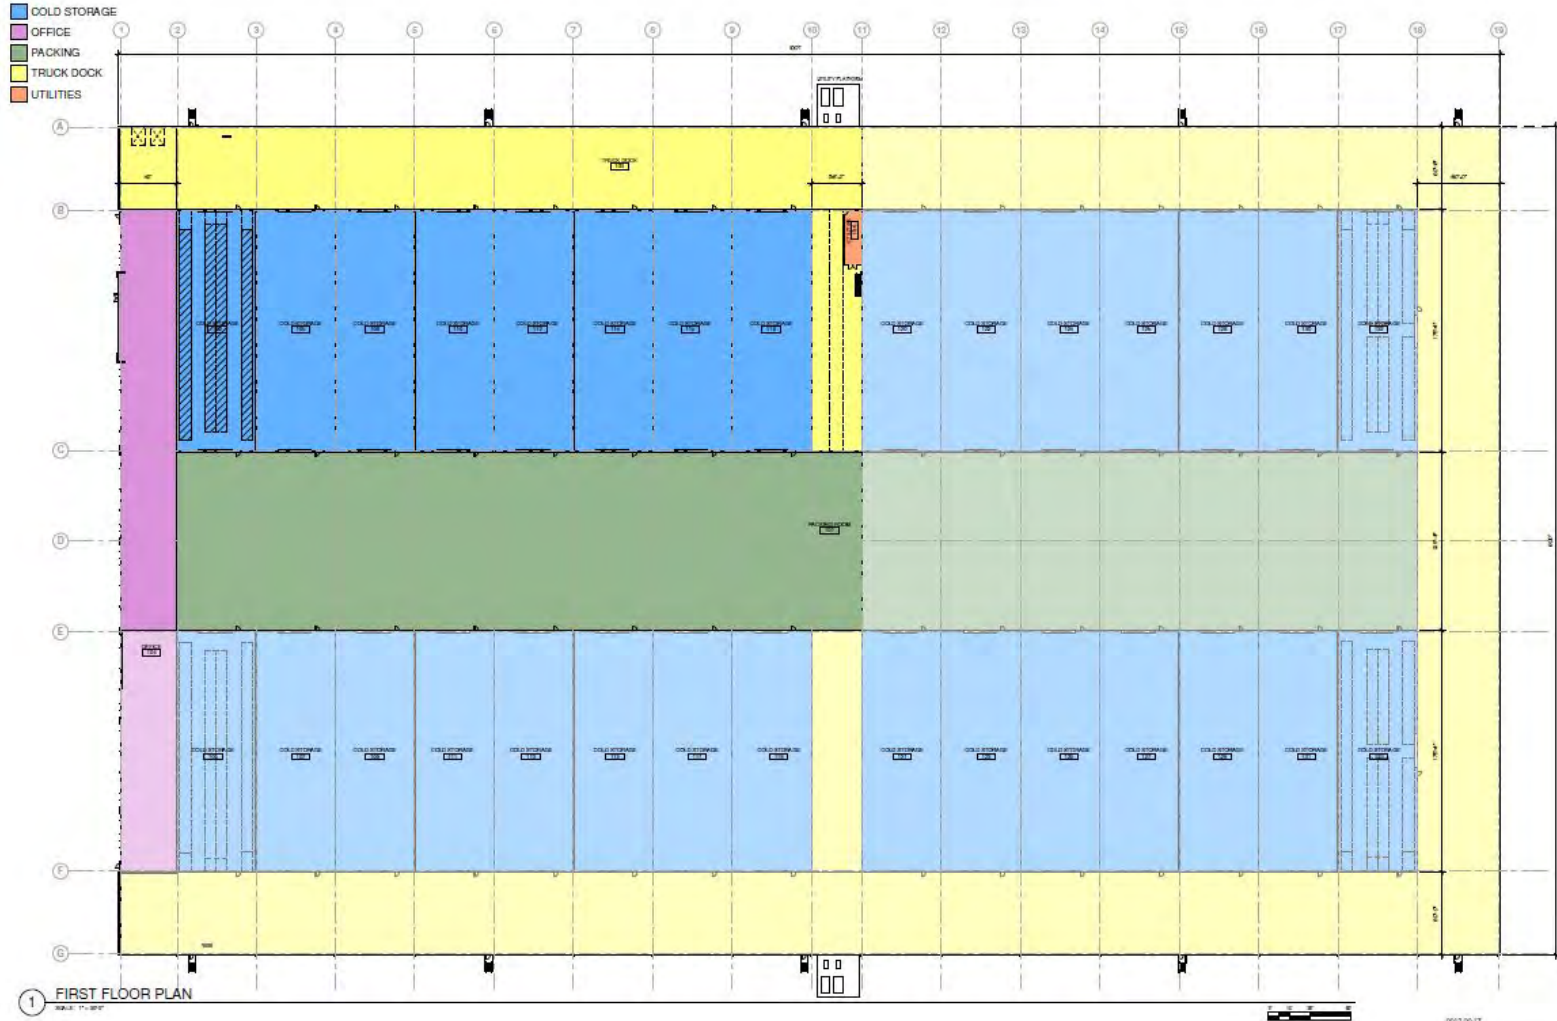

BERNARDON

- Final build out
 - 600,000 square foot facility
 - 32 Cold Storage Rooms
 - Capacity for 32,000 pallets
 - 100,000 square foot repack area

COMING SOON ! MANFREDI REFRIGERATED DISTRIBUTION CENTER

LEGEND

- COLD STORAGE
