VISIONING - What We Heard

"Seamless automated private and public transport to provide access from anywhere to anywhere, to both reduce GHG emissions and to improve access to jobs and work for people in underserved neighborhoods."

> "Legalization of multi-family housing in all areas of the region."

"A welcoming community where people from a variety of backgrounds and with a variety of belief systems can live in harmony with mutual respect in an environmentally and economically sustainable way."

"An economy that has a goal of making society better, not individuals wealthier." "Black women have [the] same quality access to jobs, housing, healthcare, and education as white men."

"greater investment in transit and open space."
