Program

# **ADA Ramps**

Various Counties | Remove Funding

### • TIP Amendment

- Action: Remove CON phases in amount of \$15,382,000 STU/ Toll Credit from the TIP for 2 ADA projects.
- **Reason:** Projects were Let for construction, fully funded, and regularly authorized under previous FY2019 TIP. The FY2021 TIP programmed funding is no longer needed and will return to the region.

### • Background:

- ADA Ramps 2020 Bucks and Montgomery Counties from \$7,956,000 STU/ Toll Credit to \$0
- 2019 Philadelphia ADA Ramps from \$7,426,000 STU/ Toll Credit to \$0

# **TIP ACTION | Proposed - PA**

ansportatio Program

# Request RTC Recommendation of TIP Amendment

ADA Ramps

Remove CON phases in amount of \$15,382,000 STU/Toll Credit from the TIP for 2 ADA projects:

- ADA Ramps 2020 Bucks and Montgomery Counties from \$7,956,000 STU/Toll Credit to \$0
- 2019 Philadelphia ADA Ramps from \$7,426,000 STU/ Toll Credit to \$0

## PA 309 Connector: Allentown Road to Souderton Pike (HT2) Montgomery County | Increase CON Funding in 1<sup>st</sup> Four Years

- TIP Amendment
- Action: Increase CON phase by \$6,250,000 in 1<sup>st</sup> Four Years of TIP accordingly:
  - FY21: Increase \$6,200,000 STU/\$1,550,000 State 581; FY22: Increase \$1,200,000 STU/\$300,000 State 581; and FY26: Decrease \$2,400,000 STU/\$600,000 State 581.
- Action: Replace ineligible NHPP funding with STU/STP/State 581 funding
- Reason: NHPP funding is not eligible for this project and the projects needs to be reprogrammed
   Ødvrpc

### PA21-43: PA 309 Connector: Allentown Road to Souderton Pike (HT2)

# CON phase includes increased costs for:

- Noise walls
- Increased length of multi-use path
- Stormwater & soil management
- Retaining wall and culvert costs
- Add'l ITS facilities
- Temp signals along detour route

## **PA 309 Connector: Allentown Road to Souderton Pike (HT2)** Montgomery County | Increase CON Funding in 1<sup>st</sup> Four Years

## • Background:

- PA 309 Connector Project is intended to create an improved connection between PA 63 and PA 309
- Phase 1 is complete.
- Phase 2 (HT2) in final design and CON anticipated to begin late summer 2021.
- Phase 3 (HT3) scheduled to be Let for CON in December 2026.

**Ødvrp** 

## **TIP ACTION | Proposed - PA**

ransportatio Improvement Program TIP

**ødvrpc** 

### Request RTC Recommendation of TIP Amendment PA 309 Connector: Allentown Road to Souderton Pike (HT2)

1) Increase CON phase by \$6,250,000 in 1<sup>st</sup> Four Years FY21: Increase \$6,200,000 STU/\$1,550,000 State 581; FY22: Increase \$1,200,000 STU/\$300,000 State 581; and FY26: Decrease \$2,400,000 STU/\$600,000 State 581.

2) Reprogram \$9,662,000 of CON phase accordingly as project not eligible for NHPP funding: FY22: Remove \$1,442000 NHPP; FY23: Remove \$4,993,000 NHPP/\$127,000 State 581; FY24: Remove \$2,993,000 NHPP; and FY25: Remove \$86,000 NHPP/\$21,000 State 581.

And Adding \$4,779,000 STP/\$4,735,000 STU/\$148,000 State 581: FY22: Adding \$1,949,000 STP/\$86,000 STU/\$148,000 State 581; FY23: Adding \$2,830,000 STP/\$1,656,000 STU; and FY24: Adding \$2,993,000 STU.

## Montgomery Avenue Bridge over Amtrak at 30<sup>th</sup> Street (CB) City of Philadelphia | Increase CON Funding in 1<sup>st</sup> Four Years

## TIP Amendment

- Action: Increase CON phase in 1<sup>st</sup> Four Years of TIP by advancing CON funding in FY21 and FY22 by \$4,900,000, and add a prev. obligated UTL phase back into TIP in amount of \$980,000. CON phase will be reduced by \$4,900,000 in LFY25.
- Reason: The project's PS&E came in and project is scheduled to Let July 2021

## • Background:

• Overall cost increase is \$980,000

### PA21-44: Montgomery Avenue Bridge over Amtrak at 30th Street (CB)

For complete reconstruction of five-span bridge over Amtrak's Northeast Corridor to a single-span bridge.

# TIP ACTION | Proposed - PA

ransportatio Improvemen<sup>®</sup> Program ΤΙΡ

## Request RTC Recommendation of TIP Amendment

Montgomery Avenue Bridge over Amtrak at 30<sup>th</sup> Street (CB)

Increase CON phase by \$4,900,000: FY21: Adding \$1,098,000 STU/\$862,000 BOF/ \$368,000 State 183/\$122,000 Local; FY22: Adding \$1,075,000 STU/\$885,000 BOF/ \$368,000 State 183/\$122,000 LOC;

Add previously obligated UTL phase back into TIP in the amount of \$980,000 (\$784,000 BOF/\$147,000 State 183/\$49,000 LOC) in FY21; and

@dvrpc

**Reduce CON phase** by \$4,900,000 (\$3,887,000 STU/ \$33,000 BOF/ \$735,000 State 183/\$245,000 LOC) in LFY25.

## Mattson Road over the West Branch of the Chester Creek

- Delaware County | Accept New Project into TIP
- TIP Amendment
- Action: Accept new \$2,000,000 sSTP project into TIP for FY21 by programming the following phases:

PE (\$350,000 sSTP) in FY21; FD (\$300,000 sSTP) in FY22; ROW (\$20,000 sSTP) in FY22; UTL (\$15,000 sSTP) in FY22; and CON (\$1,112,000 sSTP) in FY22 and (\$203,000 sSTP) in FY23.

 Reason: Replace Mattson Road over the West Branch of the Chester Creek bridge using discretionary sSTP funds from \$5 Registration Fee revenues

• Background:

- These are add'l funds to region made available by PennDOT to PA Counties that implemented \$5 registration fee that was a component of the PA Act 89 funding structure
- This funding opportunity is no longer available due to funds now being spent out on this program

PA21-45: Mattson Road over the West Branch of the Chester Creek

Bridge rehabilitation or replacement of Mattson Road bridge over West Branch of the Chester Creek in Chester Heights Borough, Delaware County.

## **TIP ACTION | Proposed - PA**

ansportatio nprovemer Program TIP PA

# Request RTC Recommendation of TIP Amendment

 Mattson Road over the West Branch of the Chester Creek
 Accept new \$2,000,000 sSTP project

# Moredon Road Bridge (CB #44) (Act 13)

Montgomery County | Add New Project to TIP

### • **TIP Amendment**

- Action: Add new \$3,870,000 Act 13 project to TIP, using county's remaining Act 13 balance from previous years' allocations and using county's \$5 vehicle registration fee revenue to fully fund project, and by programming the following phases:
  - PE (\$200,000 Act 13) in FY21; FD (\$200,000 Act 13) in FY22; ROW (\$20,000 Act 13) in FY23; UTL (\$50,000 Act 13) in FY24; and CON (\$1,030,000 Act 13) in FY24 and (\$2,370,000 LOC (\$5 Fee)) in FY23.
- Reason: Use remaining Act 13 balance from previous years' allocations and using \$5 vehicle registration fee to fully fund project

### • Background:

• These are additional funds to the region

ødvrpc

PA21-46: Moredon Road Bridge (CB #44) (Act 13)

- Moredon Road Bridge in Abington Township, Montgomery County
- Built in 1932
- "Structurally Deficient"
- Superstructure, substructure, and deck given "4 - Poor" condition rating.

## **Regional Rail RRX Safety Enhancements Program** Various Counties | Add New Project to TIP

### • **TIP Amendment**

- Action: Add new project to TIP in amount of \$5,000,000 (\$3,335,000 CARSI/\$1,611,000 State 1514/\$54,000 LOC) for FY21 CON
- Reason: Adding new rail safety improvement project/ program to TIP
- Background:
  - CARSI funds are additional to the region

IMAGE 2-SEPTA DYNAMIC ENVELOPE PAVEMENT MARKINGS - CHERRY STREET CONSHOHOCKEN, PA

### **Project includes**

- Dynamic Envelope Marking at 20 grade crossings
- Four quadrant gates at 3 locations

### Map of Project Locations

Map Credit: SEPTA

# **TIP ACTION | Proposed - PA**

Program

# Request RTC Recommendation of TIP Amendment

- Moredon Road Bridge (CB #44) (Act 13)
  Add new \$3,870,000 Act 13/LOC project
- Regional Rail RRX Safety Enhancements Program
  Add new \$5,000,000 CARSI/State 1514/LOC project

## Vehicle Overhaul Program SEPTA | Reduce Funding

- TIP Amendment
- Action: Reduce funding by \$21,777,000 from \$104,453,000 to \$86,676,000
- Reason: Due to COVID-19 pandemic, SEPTA realized decreased Vehicle Overhaul program costs in FY20 and FY21; therefore, less FY21 funding is needed to support program

## • Background:

- The VOH program allows SEPTA to continue overhaul of rolling stock
- Program includes \$6,000,000 (FY21-FY22) to support APCs

### June 8, 2021 RTC

### **Open Public Comment Period for**

- Draft Connections 2050 Long-Range Plan
- Draft FY2022 TIP for NJ
- Draft Conformity Determination for the Draft Connections 2050 Long-Range Plan, Draft FY2022 NJ TIP, and FY2021 PA TIP

## Anticipated Public Comment Periods

- Draft Connections 2050 Long-Range Plan
  July 28 August 30
- Draft FY2020 NJ TIP
  - July 21 August 23
- Draft Conformity Determination
  - August 6 September 8

# Two (2) Virtual Public Meetings

- Wed. August 11 at 2 pm
- Wed. August 18 at 7 pm

# **Action Proposed**

That the RTC recommends Board approval of staff request to open a public comment period for the purpose of gathering public and agency comments on the

- Draft Connections 2050 Long-Range Plan
- Draft FY2022 TIP for NJ
- Draft Conformity Determination for the
  - Draft Connections 2050 Long-Range Plan
  - Draft FY2022 TIP for NJ and
  - FY2021 TIP for PA

with proper public notification, as well as to

- publish the Draft LRP, Draft TIP, and Draft Conformity Finding documents
- post them on the Internet
- make copies available at certain public libraries (as appropriate), and
- hold public meetings, which will likely be held online.

# Thank you!

### **Questions?**

**REGIONAL TECHNICAL COMMITTEE** 

### 2050 Population & Employment Forecasts

**Ben Gruswitz, AICP** Manager, Socioeconomic & Land Use Analytics

June 8, 2021

### 2050 Population & Employment Forecasts

- Updated every four years with long-range plan (LRP)
- Must maintain 20 year horizon or horizon year of LRP
- Required for two items due for Board review in September
  - Connections 2050
  - 2022 NJ TIP air quality conformity analysis

### **Presentation Overview**

- Improvements to forecasting process & methods
  - New committee for collaborations with member counties
  - Land use model: UrbanSim
- Forecast assumptions & results
- Proposed action

## Improvements to Process & Methods

### Socioeconomic & Land Use Analytics Committee (SLUAC)

- New group formed for collective tasks requiring local expertise & data review
- Comprised of county planning staff doing demographic, economic, and/or development analysis
- First project: 2050 forecasting collaboration
  - Review point-level base year employment data [2015 National Establishments Time Series (NETS)]
  - County trends & growth assumptions
  - Identifying real estate development projects for forecast inclusion
  - Other data collection
  - Feedback on model results

- A "disaggregate micro-simulation" model
  - Simulates each year allocating from regional growth assumptions for households & employment
  - Allocates to the census block level
  - Attempts to replicate individual decisions & causation
    - Market behavior
    - Developer behavior
    - Household behavior
    - Employment sector behavior

ødvrpc

- 2015 NETS employment
- Census 2015-2019 Population Estimates
- American Community Survey (standard tables & Public Use Microdata)
- 2010 Census
- BLS, BEA, IHS Markit forecast
- Municipal zoning layers
- Points of interest of regional significance
- Land use inventory
- Protected open space inventory
- Floodplains
- Highway & transit network
- Accessibility changes from future projects in latest conformity analysis
- Survey of developers/planners
- Parcels
- Building permits

- 2015 NETS employment
- Census 2015-2019 Population Estimates
- American Community Survey (standard tables & Public Use Microdata)
- 2010 Census
- BLS, BEA, IHS Markit forecast
- Municipal zoning layers
- Points of interest of regional significance
- Land use inventory
- Protected open space inventory
- Floodplains
- Highway & transit network
- Accessibility changes from future projects in latest conformity analysis Regional real estate development pipeline
- Survey of developers/planners
- Parcels
- Building permits

- Simultaneous forecasting of population & employment
  - Model understands the interplay of residential & non-residential growth
  - Example: employment growth spurring residential growth for proximity to jobs

#### • Travel model integration

- Accessibility changes from future infrastructure projects influences development
- Simultaneous production of data needed
  - Municipal/district, county totals for population & employment
  - Detailed travel modeled inputs at the zonal level
    - Residential: household sizes, incomes, workers, vehicle counts
    - Non-residential: 14 main sectors, detailed manufacturing sectors (freight model)
- Enables zonal allocation informed by
  - development capacity
  - attractiveness
  - pipeline projects
  - partner feedback

- Continued use & modifications to forecast for agency studies
  - Regional
  - Corridor
  - Station area
  - Master plan/district
- Can rerun forecast scenario configuration with new data on development projects/timing
- Can compare travel or development outcomes of different assumptions to forecast base
  - infrastructure and/or development
  - timing and/or magnitude

## Assumptions & Results

#### **Pre-Pandemic Trends - Population**

- Aging population
- Declining birth-rates
- Slowing immigration
- Negative, but improving, net domestic migration
- Slowing population growth overall

#### **Pre-Pandemic Trends - Employment**

- Despite sluggish population, declining unemployment rate created explosion of employed population
- Record employment increase before pandemic decline

#### Pandemic Assumptions – Much Is Still Unknown

Population

- Increased deaths largely reflected in group quarters nursing homes & correctional facilities
- Difficult to reduce household population while also filling increased units in development pipeline
- Potential for immigration & domestic migration rebound

Employment

- Regionally, almost all 2015-2019 gains wiped out in 2020
- Total employment rebound expected between 2023 and 2024
  - vaccine distribution
  - stimulus measures
  - high levels of household savings

#### Pipeline vs. Total Growth

## **Action Proposed**

## **Action Proposed**

That the Regional Technical Committee (RTC) recommends that the Board adopts the 2050 Population and Employment Forecasts.

- A "disaggregate micro-simulation" model
  - Replication of real life decisions by a simulated individuals and households
    - Developer behavior
    - Household behavior
    - Employment sector behavior
  - Results at the census block level
- Simulates each year allocating from regional growth in households & employment (control totals)
- Key submodel components:
  - Location choice models (LCMs)
    - Residential development project LCM developer behavior
    - Household LCM household behavior
    - Employment LCM employment sector behavior
  - Residential price model market behavior

# UrbanSim - Steps of Household Location Choice

#### • In each new simulation year

- Creates random sample of individual households (household "agents") to match regional household control total increase
- Assigns first set of households to fill new residential units to 97% occupancy within 1 to 3 years of year built
- $\circ$   $\;$  Assigns remaining households to existing vacancies based on
  - Household demographics
    - Age of householder
    - Household size
    - Renter/owner status

# DVRPC SELF CERTIFICATION

June 8, 2021

# DVRPC SELF CERTIFICATION *©***dvrpc**

 US DOT Metropolitan Transportation Planning and Programming Regulations require MPO's to certify that its transportation planning and programming process is in conformance with all applicable federal regulations

 Undertake a Continuing, Cooperative, and Comprehensive performance-based, multimodal transportation planning and programming process

TIP and Long Range Plan are consistent with the Clean Air Act

# DVRPC SELF CERTIFICATION *<sup>®</sup>dvrpc*

Private citizens and affected public agencies were provided with a reasonable opportunity to comment on the TIP, Long Range Plan, and planning process

The TIP is financially constrained

The CMP requirements have been met

Performance-based planning approach is being integrated through coordination with state and federal partners on the development of performance measure targets

# DVRPC SELF CERTIFICATION **Ødvrpc**

- Developed and maintain a Coordinated Human Services Transportation Plan (currently titled Equity Through Access) with state, county, and transit agency partners
- The planning process considers improvements to resiliency and reliability of the transportation system and enhancements to travel and tourism
- Meets restrictions on lobbying
- Complies with the requirements of Title VI of the Civil Rights Act, and incorporates Environmental Justice considerations for minority and low-income populations
- Prohibits discrimination and complies with the guidelines of EEO, DBE, ADA, and OAA

# DVRPC SELF CERTIFICATION *<sup>®</sup>dvrpc*

DVRPC's Four-Year Federal Certification Review Final Report indicates that the Review's one Corrective Action related to updates to required language in our contracts has been addressed

DVRPC elects to continue to use the exception provision regarding transit agency representation on MPO boards while continuing the transit agencies participation as non-voting members of the Board and voting members of the RTC

DVRPC certifies that it qualifies for this exception

# DVRPC SELF CERTIFICATION *©dvrpc*

## **Action Proposed**

That the RTC recommends that the Board adopt Resolution No. B-FY21-005 certifying that the DVRPC Metropolitan Transportation Planning and Programming Process is in conformance with federal regulations implementing the FAST Act, MAP-21, the Clean Air Act Amendments, and other pertinent federal legislation.

# Municipal Management of Extreme Heat

Adam Beam, AICP Senior Research Analyst Office of Energy and Climate Change Initiatives

June 8, 2021

## **Municipal Management of Extreme Heat**

MUNICIPAL MANAGEMENT OF EXTREME HEAT

> MUNICIPAL IMPLEMENTATION TOOL #33

MAY 2021

- An overview of extreme heat: what it is and why it happens.
- Expected impacts of extreme heat on populations and infrastructure.
- Recommendations for mitigating the urban heat island effect to reduce local temperatures.
- Recommendations for preparing for and responding to extreme heat events.
- www.dvrpc.org/Products/ MIT21011

## What is Extreme Heat?

 CDC - weather that is much hotter and/or more humid than average for a particular time and place

## What is Extreme Heat?

#### **NOAA's National Weather Service Heat Index**

							1	Temp	eratu	re (°F)

			Cau	tion		Ext	reme c	aution			Da	nger		E	ctreme	dange	r

This chart shows that as the temperature (horizontal axis) and relative humidity (vertical axis) each increase, they combine to create a heat index (colored values) that feels hotter than the actual temperature. For example, when the temperature is 96°F, with 65 percent humidity, it actually feels like 121°F (indicated by the blue lines in the chart above). ## **Impacts of Extreme Heat**

### • Heat-health Risks

Heat Index	Possible Heat Disorders
90°F	Sun stroke, heat cramps, and heat exhaustion are possible
	for certain risk groups.
100°F	Heat stress or illnesses are possible, especially for elderly
	adults, children, and others sensitive to heat.
105°F	Even healthy adults are at risk of heat-related illness with
	prolonged exposure.
130°F	Heat stroke is highly likely with continued exposure.

- Air Quality Degradation
- Exacerbation of Inequality
  - Low-income neighborhoods
  - Racial and ethnic minority neighborhoods

## **Impacts of Extreme Heat**

- Transportation Infrastructure
- Utility Infrastructure

Projected Change in Cooling Degree Days From 1961 - 1999 Baseline -- DVRPC Region

## **Municipal Actions**

- Identify hot spots and vulnerable populations
- Mitigate Heat Islands
- Prepare for and Adapt to Heat Events

## Hot Spots and Vulnerable Populations

- Those most vulnerable to heat
  - Elderly
  - Children
  - Low-income residents
  - Socially isolated
  - Racial and ethnic minorities
  - Limited English Proficiency
  - Foreign born populations
  - Underlying medical conditions

## DVRPC's Indicators of Potential Disadvantage

@dvrpc

## **Heat Vulnerability Index**

### @dvrpc

## **Mitigation Measures – Trees/Vegetation**

- Provide shade, stormwater management
- Improve air quality, sequester CO<sub>2</sub>

## Mitigation Measures – Cool Roofs

- Reflective roofing material or coating, often white
- Reduce energy costs in the summer

## **Mitigation Measures – Green Roofs**

- Vegetative layer on roof top
- Improve insulation, stormwater management
- Reduce air pollution and sequester CO<sub>2</sub>

## **Mitigation Measures – Cool Pavements**

- More reflective
- Decreases formation of ground-level ozone
- Can be combined with permeable pavements to mitigate stormwater and increase safety

# Mitigation Measures – Cooling Public Spaces

- Bus shelters
- Shade structures
- Pools/spray grounds

## **Prepare and Adapt**

## Forecast, Monitor, Notify

• Typically done through county public health offices

## **Education and Awareness**

- Inform prior to first heat wave of season
- First heatwave is the deadliest

## **Responses to Heat Waves**

- Check water and electrical infrastructure
- Resident buddy programs
- Cooling centers
- Outdoor cooling sites

## **Thank You!**

## Sidewalk Gaps

RTC | 6/8/2021

Aaron Fraint, AICP Logan Axelson

### Background

- Regional inventory of sidewalks collected as GIS data
- <u>walk.dvrpc.org</u> was created to allow the public to:
  - explore the dataset
  - find & fix errors/omissions
- It also allows planning partners to sketch and share improvement project concepts

### **Gap Analysis**

- 1. Identify a variety of definitions of what constitutes a "gap"
- 2. Develop analytic pipelines to transform raw data into insights
- Design an interactive visualization that showcases the analytic outputs in a user-friendly fashion

### @dvrpc

## Which roadway segments are missing sidewalks?

@dvrpc

Red lines show streets without any sidewalks

Where is there a disconnect between transit stops and the sidewalk network?

### %dvrpc

Red dots identify portions of the sidewalk network that are disconnected from all modes of transit

## Where are the islands of sidewalk connectivity?

### Integration with other work program projects:

- Rail Station Walksheds were identified for the ongoing "Access Score" project
- Click on a station point to see walkshed profiles that compare the sidewalk network to the OpenStreetMap centerline network

#### **⊘dvrpc**

Grey polygon shows 1-mile walkshed on OpenStreetMap centerlines

Green polygon shows 1-mile walkshed on the sidewalk network

## **Next Steps:**

Year 1: Support for existing sidewalk funding programs

Year 2: Pilot technical assistance program

**⊘dvrpc** 

How can this analysis benefit existing programs?

## How can this analysis benefit existing programs?

#### Safe Routes to School

and Economic Development

y

The Safe Routes to School Program (SRTS) is a federally funded reimbursement program that was established in August 2005 by the Safe, Accountable, Flexible, Efficient Transportation Equity Act - A Legacy for Users (SAFETEA-LU). Section 1404 of the legislation provides funding for State Departments of Transportation to create and administer SRTS. Section 1404 of the Act also provides the details of the SRTS program. The SRTS program eligible under SAFETEA-LU, Section 1404 Safe Routes to School Program (23 USC 402 note) has been continued under the Moving Ahead for Progress in the 21st Century (MAP-21) legislation enacted in July 2012 and Fixing America's Surface Transportation (FAST) Act enacted in December 2015.

Under the most recent legislation, funding does not provide for a standalone SRTS Program. The New Jersey Department of Transportation (NJDOT) has elected to continue funding the SRTS program separately. The SRTS program is funded through the Federal Highway Administration's (FHWA) Federal Aid Program and is being administered by the NJDOT, in partnership with the North Jersey Transportation Planning authority (NJTPA), the Delaware Valley Regional Planning Commission (DVRPC), and the south Jersey Transportation Planning Organization (SJTPO).

## **Next Steps:**

### Pilot Technical Assistance Round:

- Screening and technical assistance for sidewalk projects with important local and regional connectivity benefits
- Refine selected local sidewalk projects into 'design and shovel ready' candidates for typical competitive grant programs
