

Created in 1965, the Delaware Valley Regional Planning Commission (DVRPC) is an interstate, intercounty and intercity agency that provides continuing, comprehensive and coordinated planning to shape a vision for the future growth of the Delaware Valley region. The region includes Bucks, Chester, Delaware, and Montgomery counties, as well as the City of Philadelphia, in Pennsylvania; and Burlington, Camden, Gloucester and Mercer counties in New Jersey. DVRPC provides technical assistance and services; conducts high priority studies that respond to the requests and demands of member state and local governments; fosters cooperation among various constituents to forge a consensus on diverse regional issues; determines and meets the needs of the private sector; and practices public outreach efforts to promote two-way communication and public awareness of regional issues and the Commission.

Our logo is adapted from the official DVRPC seal, and is designed as a stylized image of the Delaware Valley. The outer ring symbolizes the region as a whole, while the diagonal bar signifies the Delaware River. The two adjoining crescents represent the Commonwealth of Pennsylvania and the State of New Jersey.

DVRPC is funded by a variety of funding sources including federal grants from the U.S. Department of Transportation's Federal Highway Administration (FHWA) and Federal Transit Administration (FTA), the Pennsylvania and New Jersey departments of transportation, as well as by DVRPC's state and local member governments. This study is funded exclusively by the Federal Aviation Administration (FAA). The authors, however, are solely responsible for its findings and conclusions, which may not represent the official views or policies of the funding agencies.

DVRPC fully complies with Title VI of the Civil Rights Act of 1964 and related statutes and regulations in all programs and activities. DVRPC's website and many of DVRPC's documents can be translated into Spanish, Russian, and Mandarin online by visiting www.dvrpc.org. Publications in other languages or formats can be made available, if requested. For more information please call 215-238-2871.

Introduction

The Delaware Valley Regional Planning Commission (DVRPC) has conducted aircraft operations counts at non-towered airports in a twelve county, four state region since 1986. In Fiscal Year 2005, the Federal Aviation Administration (FAA) continued funding this program to include 8 of 20 DVRPC Regional Airports System Plan (RASP) facilities. From June 2006 to May 2007, the following airports were surveyed: **Chester County, Doylestown, Perkiomen Valley, Pottstown Limerick, Pottstown Municipal** and **Wings Field** in Pennsylvania, in New Jersey **South Jersey Regional** and in Delaware **Summit Airpark.**

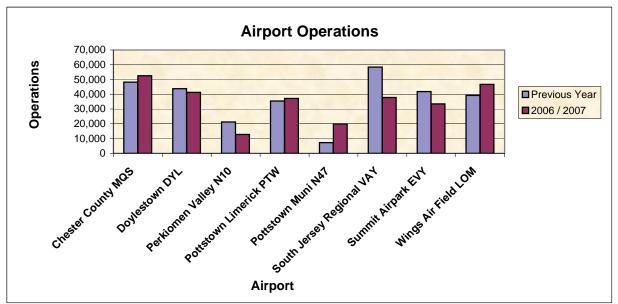

Pages 3 - 5 illustrate the trends for total, fixed wing and helicopter operations observed between the most recent previous count and the 2006/07 survey. This report provides you with the Larson & Davis Acoustic Counter Software (ACS) weekly takeoff data, as well as the projected seasonal and annual takeoff and landing totals as estimated by a separate DVRPC counting software for each surveyed airport during 2006/2007. 281,673 total annual operations were estimated for the eight regional airports included in this year's counting program, compared to 295,457 total annual operations in the previous corresponding counting programs of the same eight airports. The comparison of the data indicates a 5% decrease of total operations for 2006/2007 over the total aircraft operations during the previous counts.

The following procedure is applied to all counts during the entire program. Eight oneweek long counting surveys are taken over the course of one calendar year. These counts are scheduled twice each season. A four to six week interval between counts occurs before the equipment is set at the same airport again. Keeping the intervals between setting and resetting of the counters at each airport as consistent as possible ensures the most accurate statistical operations estimate. The LDL 820 Sound Level Meter is activated by set minimum noise levels only during aircraft takeoff activity. The data collected is saved to the LDL 820 memory. Staff collects the equipment after each week of counts. The data is downloaded to the ACS and then checked manually for event related errors. The ACS report format displays weekly aircraft operations (takeoffs only, since most propeller landings are almost silent) by hour and day for each week counted. Finally the data is entered into and extrapolated by the DVRPC counting software, which forecasts seasonal and annual total takeoffs and landings.

Historic counting data since 1986 is also available for all RASP airports through our Aviation Planning Office. Please contact Reiner Pelzer or Dave Metzler at (215) 592-1800, or via e-mail at <u>rpelzer@dvrpc.org</u>, <u>dmetzler@dvrpc.org</u> for more information.

during this reporting period. This includes 4% growth in fixed wing flight operations along with a significant growth in Helicopter operations of over 1,000% which is attributed to the relocation of the Keystone Heliport, from West Chester, to the Airport's adjacent industrial campus.

Aircraft Operations growth is projected to continue based on the recent acquisition of Keystone Helicopter by Sikorsky Aircraft Corporation and the decision to relocate the remaining Keystone Helicopter operations from West Chester to Coatesville.

Chester County Airport is a business reliever airport with an instrument approach on runway 29. This facility has a strong presence in the Delaware Valley Regional Airport System. The planning for airport expansion projects is underway, including runway and airport facility upgrades necessary to meet business demands.

shown that the Airport has stabilized around 41,000 operations each year. Interviews with the FBO, Leading Edge Aviation, and also with the owner, the Bucks County Airport Authority (BCAA), have disclosed a decline in the FBO's flight school's enrollments and also in the aircraft rental business. However, the loss of tenant aircraft is not as easily identified, nearby airports have not reported a noticeable gain in tenants. The BCAA Airport Administrator has reported that most lost tenants sold their aircraft and while some have given up flying others are looking to buy replacement aircraft which will be based at Doylestown. A combination of an aging pilot population and economic factors seems to have created this loss of based aircraft and is only viewed as temporary.

It has several active aircraft maintenance businesses as well as the Ken Marson Aero Center. In addition the Air Victory Museum could be used as a drawing card for airport organized Fly-ins.

DVRPC is forecasting flight operations continuing in the near future at the current low levels unless a more aggressive marketing and administration program is implemented.

Comments:

Publication No.:	07053
Date Published:	November 2007
Geographic Area Covered:	Chester, Delaware, Montgomery and Bucks Counties in Pennsylvania, Mercer, Burlington, Camden, Gloucester and Salem Counties in New Jersey, New Castle County in Delaware and Cecil County in Maryland.
Key Words:	Aircraft operations, airports, helicopter, airplane, takeoffs, landings, count, activity, estimate, seasonal, annual, acoustic counter, based aircraft, runway length.
Abstract:	This technical report compiles aircraft operations estimates for eight non-towered airports in the Delaware Valley Region. Eight acoustic counts were taken between June 2006 and March 2007, each sample extended over the period of one week. The samples were extrapolated over the entire year and produced the results presented in this report. Results are used by multiple sources to monitor activity levels in the Delaware Valley Region, and as a base for Planning and forecasting documents.
