

March 2011

AIRCRAFT OPERATIONS COUNTING PROGRAM

2009/10

OPERATIONS FOR EIGHT NONTOWERED AIRPORTS

The Delaware Valley Regional Planning Commission is dedicated to uniting the region's elected officials, planning professionals, and the public with a common vision of making a great region even greater Shaping the way we live, work, and play, DVRPC builds consensus on improving transportation, promoting smart growth, protecting the environment, and enhancing the economy. We serve a diverse region of nine counties: Bucks, Chester, Delaware, Montgomery, and Philadelphia in Pennsylvania; and Burlington, Camden, Gloucester, and Mercer in New Jersey. DVRPC is the federally designated Metropolitan Planning Organization for the Greater Philadelphia Region—leading the way to a better future.

The symbol in our logo is adapted from the official DVRPC seal and is designed as a stylized image of the Delaware Valley. The outer ring symbolizes the region as a whole while the diagonal bar signifies the Delaware River. The two adjoining crescents represent the Commonwealth of Pennsylvania and the State of New Jersey.

DVRPC is funded by a variety of funding sources including federal grants from the U.S. Department of Transportation's Federal Highway Administration (FHWA) and Federal Transit Administration (FTA), the Pennsylvania and New Jersey departments of transportation, as well as by DVRPC's state and local member governments. This study is funded exclusively by the Federal Aviation Administration (FAA). The authors, however, are solely responsible for the findings and conclusions herein, which may not represent the official views or policies of the funding agencies.

DVRPC fully complies with Title VI of the Civil Rights Act of 1964 and related statutes and regulations in all programs and activities. DVRPC's website (www.dvrpc.org) may be translated into multiple languages. Publications and other public documents can be made available in alternative languages and formats, if requested. For more information, please call (215) 238-2871.

Executive Summary

The Delaware Valley Regional Planning Commission (DVRPC) has conducted aircraft operations counts at non-towered airports in a 12-county, four-state region since 1986. In Fiscal Year 2008, the Federal Aviation Administration (FAA) continued funding this program to include eight of 20 DVRPC Regional Airport System Plan (RASP) facilities. From April 2009 to March 2010, the following airports were surveyed: Chester County, Doylestown, Perkiomen Valley, Heritage Field, Pottstown Municipal, and Wings Field in Pennsylvania; South Jersey Regional Airport in New Jersey; and Summit Airpark in Delaware. During this count the ownership and name of the former Pottstown Limerick Airport was changed to Heritage Field. The airport designator (PTW) was left unchanged.

Pages 3 to 5 illustrate Annual Aircraft Operation trends for Total Aircraft, Fixed Wing, and Helicopter Operations observed between the previous 2006/07 and the current 2009/10 survey for comparison. This report illustrates the Larson & Davis Acoustic Counter Software (ACS) weekly takeoff data, as well as the projected seasonal and annual takeoff and landing totals as estimated by a separate DVRPC counting software program for each surveyed airport during 2009/2010. 246,547 total annual operations were estimated for the eight regional airports included in this year's counting program, compared to 281,673 total annual operations in the previous corresponding counting programs of the same eight airports. The comparison of the data indicates a 12 percent decrease in total operations for 2009/2010 over the total aircraft operations during counts for 2006/07.

The loss of flight operations during the 2009/2010 survey is in part attributed to the economic downturn and unseasonably hot weather during the spring and summer survey period. Weather affects on flight operations were most noticed in light single-engine aircraft used mostly for pleasure or flight training. With the spring, summer, and fall seasons hotter than normal, high-density altitudes caused takeoff weight restrictions on many small aircraft limiting them to single-seat operations. Additionally, ground thermal activities (convection currents) were increased which resulted in turbulence at lower attitudes. Both of these conditions resulted in discretionary flights being cancelled. 1998 is the warmest year recorded by NOAA since 1880, and as of September 2010 is tied with 1998 for the warmest year on record.

The following procedure is applied to all airport counts during the entire program. Eight one-week-long counting surveys are taken over the course of one calendar year. These counts are scheduled twice each season. A four- to six-week interval between counts occurs before the equipment is set at the same airport again. Keeping the intervals between setting and resetting of the counters at each airport as consistent as possible ensures the most accurate statistical operations estimate. The LDL 820 Sound Level Meter is activated by set minimum noise levels only during aircraft takeoff activity. The data collected is saved to the LDL 820 memory. Staff collects the equipment after each week of counts. The data is downloaded to the Aircraft Counting System and then

checked manually for event-related errors. The Aircraft Counting System report format displays weekly aircraft operations (takeoffs only, since most propeller landings are almost silent) by hour and day for each week counted. Finally, the data is entered into and extrapolated by the DVRPC counting software, which estimates seasonal and annual total takeoffs and landings.

Historic counting data since 1986 is also available for all RASP airports through our Aviation Planning Office. Please contact Reiner Pelzer rpelzer@dvrpc.org or Dave Metzler dmetzler@dvrpc.org by e-mail or call (215) 592-1800 for more information.

5,400 FT

Total based aircraft:

129

Chester County G.O. Carlson Airport had a 7 percent decline in overall flight operations this counting cycle. This is attributed to a reduction in fixed wing operations and related to the downturn in the economy. This reduction in operations is moderate compared to other airports surveyed during this same time period. It should also be reported that annual helicopter operations were increased by 76 percent during this period. This is attributed to the Sikorsky Aircraft Corporation's growing presence at Chester County Airport.

Chester County G.O. Carlson Airport remains a strong component within the current RASP as a reliever airport.

Doylestown Airport DYL

Bucks County

Doylestown, PA 18901

Runway: 05/23

Runway length: 3,004 FT

Total based aircraft: 177

Doylestown Airport (DYL) has seen an 8 percent decline in overall flight operations this counting cycle. This is attributed to the current economic downturn and not considered to be relevant in the future of the airport. However, during this same period helicopter operations increased by 50 percent. This growth was attributed to both the addition of a new tenant and the temporary use of this airport by an electrical power line surveying company.

Doylestown airport remains an important reliever airport within the RASP and has only shown a moderate operational decline which is expected to recover.

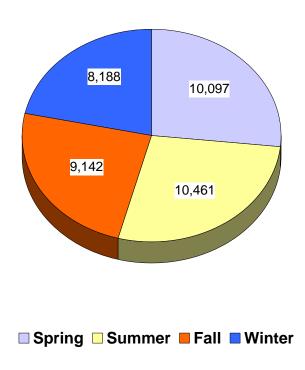

DVRPC Aircraft Counting Program Annual Summary

Heritage Field Airport PTW

Montgomery County

Limerick, PA 19464

Runway: 10/28

Runway length: 3,371 FT

Total based aircraft: 116

Heritage Field had a decline in overall flight operations of 11 percent during this survey period. This decline is in line with other airports surveyed during the same operational counting cycle.

Heritage Field has a new owner and has changed its name from the Pottstown Limerick Airport to Heritage Field with the designator "PTW" remaining unchanged.

DVRPC Aircraft Counting Program Annual Summary

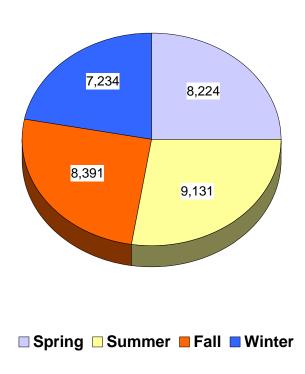

Airport: PTW Heritage Field County: Montgomery

Table 6: PTW Heritage Field Annual Summary

Season & `	Year	Average Daily Operations	Total Seasonal Operations	Percent of Annual Operations
Spring	2009	88.4	8,224	25%
Summer	2009	97.1	9,131	28%
Fall	2009	94.3	8,391	25%
Winter	2010	81.3	7,234	22%
Total Annu	al Operatio	ons:	32,981	100%
Margin of F	rror:			13 at 95% Confidence

Margin of Error:

Perkiomen Valley Airport N10

Montgomery County

Collegeville, PA 19436

Runway: 09/27

Runway length: 2,960 FT

Total based aircraft: 41

Flight operations have declined a modest 6 percent this counting cycle and the decline is attributed to the current economic downturn. Based aircraft have remained stable and a sky diving operation is now based there after relocating from the recently closed Kutztown Airport.

Pottstown Municipal Airport N47

Montgomery County

Pottstown, PA 19464

Runway: 08/26

Runway length: 2,704 FT

Total based aircraft: 56

Pottstown Municipal Airport flight operations have declined 11 percent this reporting period. This is within the normal range of collected data during the current survey period. The decline of flight operations is based on the current economic downturn and would be expected to recover as economic conditions improve. Based aircraft have remained stable at Pottstown Municipal Airport and the flight school continues to attract students. Recently, a full motion flight simulator was installed which is available for student use or for pilots to maintain IFR currency.

South Jersey Regional Airport VAY

Burlington County

Medford NJ 08055

Runway: 08/26

Runway length: 3,911 FT

Total based aircraft: 103

Flight operations at South Jersey Regional Airport have declined 33 percent since the last survey three years ago. The airport has reported a decline in flight training operations, which has resulted in several leased aircraft being withdrawn and utilized elsewhere. This loss of flight training operations has impacted flight operations for this survey period.

Several aircraft maintenance operations are based at South Jersey Regional. BP Air has the maintenance contract for all regional Civil Air Patrol (CAP) aircraft.

During the summer count inclement weather and equipment failure during a recount necessitated substituting the Summer I count results for Summer II.

DVRPC Aircraft Counting Program Annual Summary

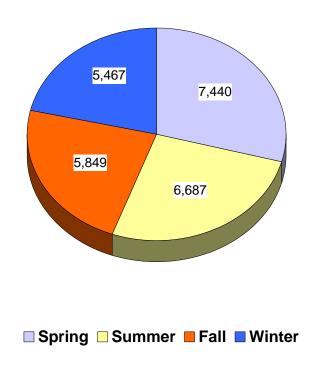

Airport: VAY South Jersey Regional Airport County: Burlington

Table 9: VAY South Jersey Regional Airport Annual Summary

Season & `	Year	Average Daily Operations	Total Seasonal Operations	Percent of Annual Operations

Summit Airpark

EVY

New Castle County

Middletown, DE 19709

Runway: 17/36

Runway length: 4,500 FT

Total based aircraft: 52

Summit Airpark had an overall reduction of flight operations of 13 percent during this survey period. With the loss of 11 based fixed wing aircraft, fixed wing operations fell 26 percent. However, rotor wing flight operations have increased by 110 percent, which reflects the FBO's business focus geared more towards rotor wing maintenance and the effort in rehabilitating CH-47 heavy lift helicopters for the military.

During the first winter count, a heavy snowfall and an unplowed runway led to an abnormally low count. After a second recount failed due to equipment breakdown, it was decided to substitute the Winter II count for the Winter I count.

DVRPC Aircraft Counting Program

Annual Summary

Airport: **EVY Summit Airpark**

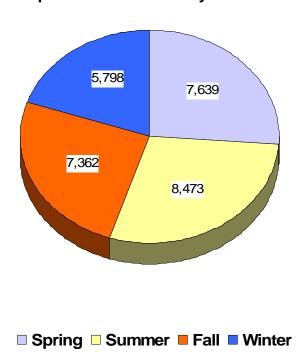

County: New Castle

Table 10: EVY Summit Airpark Annual Summary

Season & \	⁄ear	Average Daily Operations	Total Seasonal Operations	Percent of Annual Operations

Wings Field LOM

Montgomery County

Blue Bell, PA 19422

Runway: 6/24

Runway length: 3,700 FT

Total based aircraft: 102

Wings Field had an overall flight operation decline of 11 percent this reporting period. This is within the normal range of collected data during the current survey. The decline of flight operations is believed to be based on the current economic downturn and would be expected to recover as economic conditions improve. The number of based aircraft declined during this survey period from 121 in 2007 to 102, which had some impact on the decline of flight operations.

Wings Field has plans for new hangers to replace old and demolished ones. Wings Field is also relocating the helicopter landing pad further from the terminal area, which should improve current noise levels in the terminal area and increase safety and efficiency of transient arrival and departure area operations.

Publication No.: 10065

Date Published: March 2011

Geographic Area Covered: Bucks, Montgomery, and Chester counties in

Pennsylvania, Burlington County in New Jersey, and New Castle County in Delaware

Key Words: Aircraft operations, airports, helicopter,

airplane, takeoffs, landings, count, activity, estimate, seasonal, annual, acoustic counter,

based aircraft, runway length

Abstract: This technical report compiles aircraft

operations estimates for eight non-towered airports in the Delaware Valley region. Eight acoustic counts were taken at each airport, starting in April 2009 and ending in March 2010; each sample extended over the period of one week. The samples were extrapolated over the entire year and the results are presented in this report. Results are used by multiple sources to monitor activity levels in the Delaware Valley region and as a base for planning and forecasting documents.
