

TIP TRANSPORTATION IMPROVEMENT PROGRAM

FY2014 TIP for NEW JERSEY (FY2014-2017)

The Delaware Valley Regional Planning Commission is dedicated to uniting the region's elected officials, planning professionals, and the public with a common vision of making a great region even greater. Shaping the way we live, work, and play, DVRPC builds consensus on improving transportation,

promoting smart growth, protecting the environment, and enhancing the economy. We serve a diverse region of nine counties: Bucks, Chester, Delaware, Montgomery, and Philadelphia in Pennsylvania; and Burlington, Camden, Gloucester, and Mercer in New Jersey. DVRPC is the federally designated Metropolitan Planning Organization for the Greater Philadelphia Region leading the way to a better future.

The symbol in our logo is adapted from the official DVRPC seal and is designed as a stylized image of the Delaware Valley. The outer ring symbolizes the region as a whole while the

diagonal bar signifies the Delaware River. The two adjoining crescents represent the Commonwealth of Pennsylvania and the State of New Jersey.

DVRPC is funded by a variety of funding sources including federal grants from the U.S. Department of Transportation's Federal Highway Administration (FHWA) and Federal Transit Administration (FTA), the Pennsylvania and New Jersey departments of transportation, as well as by DVRPC's state and local member governments. The authors, however, are solely responsible for the findings and conclusions herein, which may not represent the official views or policies of the funding agencies.

DVRPC fully complies with Title VI of the Civil Rights Act of 1964 and related statutes and regulations in all programs and activities. DVRPC's website (www.dvrpc.org) may be translated into multiple languages. Publications and other public documents can be made available in alternative languages and formats, if requested. For more information, please call (215) 238-2871.

General Overview of the TIP

Tab

GENERAL OVERVIEW OF THE TIP

The Delaware Valley Regional Planning Commission (DVRPC) is pleased to present the DVRPC FY2014 Transportation Improvement Program (TIP) for the New Jersey portion of the region (FY2014 to FY2017). DVRPC and its member governments have worked diligently to prepare a program of projects that responds to the needs of the region and at the same time complies with federal and state policies.

In DVRPC's New Jersey region, the TIP contains 124 projects (excluding Statewide and Study and Development projects), totaling more than \$1.7 billion for the phases to be advanced over the next four years (FY2014-2017), averaging \$436 million per year. Programmed funds include approximately \$903 million for projects primarily addressing the highway system and \$843 million for transit projects for NJ TRANSIT and DRPA/PATCO. Table 1 presents a funding summary of the DVRPC program by county and transit operator for each of the four TIP years in New Jersey.

The DVRPC FY2014 TIP for New Jersey meets the federal requirements of being financially constrained to a level of funding that is available to the region, as established in the financial guidance provided by the New Jersey Department of Transportation (NJDOT). See Appendix B for further details on this guidance.

The TIP and Federal Requirements

The TIP is a requirement of federal transportation legislation, most recently the Moving Ahead for Progress in the 21st Century Act (MAP-21), as Public Law (P.L.) 112-141, which became effective on October 1, 2012 until September 30, 2014. It is the first multi-year highway authorization after multiple temporary extensions of the Safe, Accountable, Flexible, Efficient, Transportation Equity Act: A Legacy for Users (SAFETEA-LU) that was signed in 2005 and expired in 2009. MAP-21 builds on the initiatives established in SAFETEA-LU, the Transportation Equity Act for the 21st Century (TEA-21), and the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA). Transportation investment has been prescribed in a balanced approach through a guaranteed commitment to highways and bridges, public transit, safety, intermodal projects, and advanced technologies, such as Intelligent Transportation Systems. MAP-21 will spend more than \$105 billion in FY13 and FY14 as most of the money will be appropriated.

What This TIP Document Includes

The complete TIP document has been divided into multiple sections. Included is a general overview of the TIP and the TIP development process, intended to familiarize you with what the TIP is and is not, how it was developed, and what can be expected for projects in the TIP. The document also contains various summaries of the New Jersey programs, a description of the TIP public involvement process, including issues relating to environmental justice, and an explanation of project maps, project listings, and codes and abbreviations included in the document. This reference information is followed by project maps and indexes, and finally the project listings themselves.

At the end of the document, there are seven appendices: (a) Board Resolutions; (b) Financial Guidance used in developing the program and the STIP Introduction, (c) Executive Summary of the Documentation of the Conformity Finding, (d) Memorandum of Understanding on Procedures to Amend and Modify the TIP; (e) DVRPC Local Program; (f) Summary of Public Outreach, Public Comments, and Agency Responses; and (g) NJDOT "Tier 2" Unfunded Projects, which are projects that cannot be funded based on current 10-year revenue estimates. Availability of additional state or federal funds could allow Tier 2 projects to be funded.

Accessing the TIP via Various Technologies

The World Wide Web

The TIP can also be found on the DVRPC website, where you can easily search the TIP for New Jersey. The web includes an interactive method for displaying maps and project listings, as well as a way to submit comments during the public comment period. Using Google maps as a base, projects can be located using either street grid or aerial views. To use the DVRPC TIP website, go to <u>www.dvrpc.org/TIP</u>.

QR Code

DVRPC is on the forefront of technology and has provided the ability to use the QR Code (Quick Response Code) symbol to access the TIP website using your smartphone. Smartphone users with a QR Reader Application can open the application, point the camera at the QR Code symbol, and the smartphone will open up directly to the DVRPC TIP webpage. The DVRPC TIP QR Code symbol is shown below.

Scan the QR code with your smartphone for up-to-date information on DVRPC's TIP or visit <u>www.dvrpc.org/TIP</u>.

What is the TIP?

The TIP is the agreed-upon list of specific priority projects. The TIP lists all projects that intend to use federal funds, along with non-federally-funded projects that are regionally significant. The TIP represents the transportation improvement priorities of the region and is required by federal law, the most recent of which is the Moving Ahead for Progress in the 21st Century, or MAP-21. The list is multi-modal; in addition to the more traditional highway and public transit projects, it includes bicycle, pedestrian, and freight-related projects as well.

The TIP shows estimated costs and schedule by project phase. The TIP not only lists the specific projects but also documents the anticipated schedule and cost for each project phase (preliminary engineering, final design, right-of-way acquisition, and construction). Inclusion of a project phase in the TIP means that it is seriously expected to be implemented during the TIP time period.

The TIP covers a four-year period by regulation, follows the federal fiscal year schedule, and is updated every other year. Federal regulation requires that the TIP cover a minimum of four federal fiscal years of programming. DVRPC TIP documents for both states demonstrate a longer planning and programming horizon (10 years for NJ; 12 years for PA) in order to better understand expected resources and to provide the region with a more realistic time-frame for advancement of TIP projects as well as more realistic project costs. The funding presented in both TIP documents after the first four years is considered "Later Fiscal Year" funding, and per regulation is not technically available or able to be committed or authorized. The TIP operates on a federal fiscal year schedule which begins on October 1 of a given year and ends on September 30th of the following year. The New Jersey and PA TIPs are updated every other year, in alternate years.

The TIP may be changed after it is adopted. Under the provisions of federal law and regulation, the approved TIP can be modified or amended in various ways in order to add new projects, delete projects, advance projects into the first year, and accommodate cost and phase-of-work changes or major scope changes to a project. The criteria and procedures for changing the TIP are outlined in a Memorandum of Understanding (MOU) included as Appendix D in this document.

The TIP is financially constrained. The list of projects in the TIP must be financially constrained to the amount of funds that are expected to be available. In order to add projects to the TIP, others must be deferred. As a result, the TIP is not a wish list; competition between projects for a spot on the TIP clearly exists. The financial guidance used to develop each of the programs is included as Appendix B in this document.

The TIP is authorization to seek funding. A project's presence in the TIP represents a critical step in the authorization of funding for a project. It does not, however, represent a commitment of funds, an obligation to fund, or a grant of funds.

The TIP is not a final schedule of project implementation. The timeframe shown in the TIP is the best estimate at the time of TIP development, which ranges six to nine months prior to the beginning of the first fiscal year of the TIP period. Projects quite often cannot maintain that schedule and are reprogrammed to later years.

The TIP is not a guarantee of project implementation. Unforeseen problems may arise, such as engineering obstacles, environmental permit conflicts, changes in priorities, and additional financial constraints. These problems can slow a project and cause it to be postponed or even dropped from further consideration.

Regional Consensus

The production of the TIP is the culmination of the transportation planning process and represents a consensus among state and regional officials as to what near-term improvements to pursue. Consensus is crucial because the federal and state governments want assurance that all interested parties have participated in developing the priorities prior to committing significant sums of money. A project's inclusion in the TIP signifies regional agreement on the priority of the project and establishes its eligibility for federal funding.

How Does the TIP Relate to the Long-Range Plan?

Regionally significant projects must be drawn from the region's long-range plan, and all projects in the TIP must help implement the goals of the plan. The long-range plan, required by federal law, is the document that helps direct transportation and land-use decisions over a minimum 20-year horizon. The plan presents an extensive list of policies and strategies, as well as the actions required to carry them out.

While all projects included in the TIP must be consistent with the long-range plan, projects that add capacity for single-occupant vehicles must meet further federal requirements in a region like the Delaware Valley. These projects must result from the region's Congestion Management Process, which attempts to meet increasing travel demand through non-capacity-adding strategies, where practical. All projects included in the TIP have met this requirement.

The TIP represents the translation of recommendations from DVRPC's latest long-range plan into a short-term program of improvements. For further information about the policies and strategies of the currently adopted long-range plan, visit <u>www.dvrpc.org</u>.

How Does the TIP Relate to the Clean Air Act?

The Clean Air Act Amendments of 1990 require that all transportation plans, programs, and projects conform to the purpose of state implementation plans (SIPs) to attain national air quality standards. A TIP is said to conform if it is drawn from a conforming plan, as determined by an emissions analysis. The projects in the DVRPC FY2014 TIP for New Jersey are a subset of the regionally significant projects contained in the *Connections 2040: Plan for Greater Philadelphia* long-range plan.

The TIP and Plan have been tested for conformity and found to meet all requirements, including the critical test that volatile organic compounds (VOCs), oxides of nitrogen (NOx), carbon monoxide (CO), and fine particulate matter (PM_{2.5}) emissions are less than any applicable

budgets or baseline established for all analysis years. The Executive Summary of the TIP conformity finding are included as Appendix C in this document. A complete description of the conformity procedures can be found in the *Connections 2040: Plan for Greater Philadelphia* long-range plan and on DVRPC's website.

How is the TIP Funded?

The major funding source for the projects in the TIP is MAP-21, administered through the U.S. Department of Transportation's Federal Highway Administration and Federal Transit Administration. In addition, funds are made available by the states of New Jersey and Pennsylvania to match federal funding in varying ratios and to provide 100 percent financing for selected projects. Local counties, municipalities, and private developers or toll authorities, as well as transit operators, may also participate in providing matching funds for federal aid. New funding sources and innovative funding techniques are constantly being sought.

Who are the Players?

Approximately 20 agencies directly participate in the TIP development process. They include member governments, operating agencies, and state and federal agencies. Municipalities within the region participate through their respective county governments. Countless other groups, the business community, and the general public become involved through the DVRPC public participation process in addition to their involvement at the municipal and county level. The multiplicity of jurisdictions and agencies in the region necessitates a high degree of coordination during the TIP development process by DVRPC.

How Does a Project Get on the TIP?

Securing a spot on the TIP is not a simple task. Sometimes years of pre-implementation research and public input precedes a project's inclusion on the TIP. Although there are several ways in which a project can get on the TIP, the most typical course is described here. First, a particular transportation need is identified. In many cases, municipal planners and engineers generate lists of potential improvements based on their needs analyses and citizen complaints and inquiries. Since only DVRPC member agencies are allowed to formally submit candidate TIP projects, the local proposals are, in turn, reviewed at the county or major city level, often in consultation with locally based state engineers. If the county agrees that a particular idea has merit, it may decide to act as the project sponsor and work toward refining the initial idea and developing clear project specifications. Project proposals are also generated at the county and state level in much the same way.

Once each county and operating agency has developed its own lists of projects and priorities, they are brought to DVRPC, where the Regional Technical Committee (RTC) reviews them. The RTC seeks to ensure that the highest priorities of the region are being addressed within the limits of available resources and to assure consistency among projects and with the region's goals. The RTC is composed of state, county, and city planners; transit operators; citizen representatives from the Public Participation Task Force; and transportation-related interest groups, and makes recommendations to the DVRPC Board.

Finally, the DVRPC Board provides the forum through which the elected officials of the region's counties and major cities and representatives of the states and operating agencies determine each year's TIP projects. After considering the recommendations of the RTC and the comments received from the public, the Board determines the final list of projects to be included in the TIP and adopts it as its selection of projects to be advanced.

What Happens to a Project Once It is on the TIP?

Once a project is on the TIP, a considerable amount of work remains to be done to bring it to completion. The designated lead agency is responsible for ensuring that its project moves forward. The lead agency, in most cases, is the state DOT or transit operator, and in some cases, a county or city.

Highway projects typically proceed in phases (preliminary engineering, final design, right-of-way acquisition, construction). Each phase is included in the TIP, showing funding and anticipated schedule. Transit projects are programmed in the TIP according to the annual grant application cycle under which the funds will be sought. Ideally, a project will advance according to its programmed schedule. In reality, however, projects are often delayed due to unforeseen obstacles, such as environmental issues and community concerns. Tracking each project's progress is important in order to identify and resolve delays as soon as possible and to reallocate resources as necessary.

Once federal funds have been made available (termed federally "authorized") for a project's final construction phase, it will no longer appear in future TIP documents (even though the project may not yet be constructed or completed).

Why is Municipal and Interest Group Involvement Important?

DVRPC believes that a collaborative process between all levels of government and the public and business communities will ensure that the best transportation program is produced. This type of process is one in which state, county, and local governments and transportation providers become partners in the planning and programming process, and interest groups and community leaders have a voice. For this reason, planning efforts for the region's capital improvements exhibit a "bottom-up" approach within the context of a regional plan that gives a top-down perspective.

In What Ways Can the Public Participate?

Public participation occurs during all stages of a project's development. Letters of concern to municipal and county officials and transit agency managers are one of the most effective starting points. As local investigations begin, public input may be provided at formal meetings or informal sessions with local and county planning boards and staff. Citizens are also asked to participate in special task forces to review transportation improvement concepts at the corridor, county, and regional level. Finally, once a project is on the TIP and it enters the preliminary engineering phase, the detailed environmental review process affords yet another opportunity for the public to offer input.

DVRPC provides various opportunities for the public to review its planning and programming activities. Representatives from the private sector, social service entities, environmental organizations, partnering agencies, and citizens are encouraged to comment on DVRPC's policies and plans. To this end, an online commenting feature is available for Board action items. The Commission's website provides a wide array of information and interactive mapping. Materials are available in hard copy at DVRPC's Resource Center as well as at various libraries throughout the region. Project-specific open houses and listening sessions are held to inform the public and gather input.

Specifically, the public and other interest groups have the opportunity to comment on the Draft DVRPC TIP for New Jersey before it is officially adopted by the DVRPC Board. DVRPC conducted a 30-day public comment period and held open-house meetings to allow the public an opportunity to present comments about the process and projects to state, county, transit, and DVRPC staff. Copies of the FY2014 TIP are available online, as well as at the DVRPC resource center. The TIP documents are viewable on DVRPC's website at <u>www.dvrpc.org/TIP</u>.

Program Summaries

Tab

PROGRAM SUMMARIES

The DVRPC FY2014 TIP for New Jersey contains project maps, project descriptions, and the appendices for DVRPC's New Jersey region. There are 124 projects (excluding Statewide and Study and Development projects), totaling more than \$1.7 billion for the phases to be advanced over the next four years (FY2014-2017), averaging \$436 million per year. Programmed funds include approximately \$903 million for projects primarily addressing the highway system and \$843 million for transit projects for NJ TRANSIT and DRPA/PATCO, as Table 1 and Figure 1 show.

Table 1: Cost Summary by County and Transit Operator (\$000)

Source: DVRPC, 2013

Per the Financial Guidance documents in Appendix B of the NJ TIP, 20 percent of \$8.4 billion state and federal resources over the four years (FY2014-2017) of the TIP are administered through DVRPC (see Table 8 in Appendix B of the NJ TIP). DVRPC administers close to 11 percent of the \$8.4 billion in resources for the DVRPC Highway Program and nine percent of the resources for the DVRPC Transit Program. There is an additional \$2.9 billion that NJDOT directly administers on a statewide basis, and a portion of those funds are also directed to DVRPC throughout the four years.

Table 2: Cost by TIP Funding Category (\$000)

Source: DVRPC, 2013

Financial Constraint

At the beginning of each TIP update, the state DOT develops "financial guidance" for use by DVRPC and its other MPOs. The financial guidance establishes highway and transit funding levels that may be reasonably anticipated by the MPO over the TIP period from appropriate federal and state resources. Each region must develop its TIP within the funding levels established by this guidance, thus maintaining the "fiscal constraint" of the TIP. The guidance explains how each of the various federal and state varieties of funds is distributed to the regions. The NJDOT Financial Guidance is included in Appendix B. It should be noted that actual levels of federal and state transit funding are determined annually through the budget development and appropriations processes, so the amounts actually applied to projects during a given year will vary (generally lower) from what is shown in the TIP. Since the DVRPC FY2014 TIP for New Jersey has been developed according to the state guidance, it meets the federal requirement of being financially constrained.

The NJ TIP makes information available for project costs beyond the formal four-year constrained period (FY2014–2017). Project phases appear in these Later Fiscal Years (LFY) because it may take several years before the phase can advance due either to the technical effort that needs to be completed or to the severe funding constraints on the region. In any case, project costs that show in the TIP under "Later Fiscal Years" (FY2018–2023) do not technically have available or committed funding and cannot be federally authorized since they fall outside the four-year TIP period per federal regulation. However, in order to demonstrate a longer planning and programming horizon, to provide more realistic costs, and to indicate a certain commitment level to those projects by the region, the DVRPC FY2014 TIP for NJ does show a financially constrained 10-year program from FY2014–2023 using assumptions of funding levels that are currently available.

There are also projects in the DVRPC region that have been identified as needs and that have been TIP projects in a previous TIP, but for which there are insufficient funding resources even within a 10-year constrained programming horizon. These projects are shown on the NJDOT "Tier 2" Unfunded list at the end of this document. Therefore, not only do these projects *not* show up in the first four years of the DVRPC TIP, there is no expectation that adequate funding will be available to fully fund them by FY2023. It will be many years until planned projects are able to advance to construction if additional funding is not made available to the region through new revenue sources.

Federal regulations also require transit operators that receive federal funds for new capital facilities to prepare a Transit Financial Capacity Analysis showing the agency is capable of maintaining its existing operations, as well as take on the new capital projects and new services.

NJ TRANSIT prepares a Financial Capacity Analysis when required for specific projects, which are submitted, in turn, to FTA (Federal Transit Administration). Additionally, NJ TRANSIT is subject to annual financial and single audits conducted by Ernst and Young, attesting to the financial position of the corporation, the integrity of its internal controls, and its compliance with applicable grant provisions, laws, and regulations.

NJ TRANSIT also certifies its financial capacity when it submits FTA's Certification and Assurances in Transportation Electronic Award Management System (TEAM) each year. In addition, the FTA periodically conducts Triennial or State Management Reviews, which include an FTA-directed review of NJ TRANSIT's compliance in different areas, including its financial practices. As of February 22, 2013, NJ TRANSIT has corrected all deficiencies found from the last FTA State Management Review in 2012.

Project Selection and Evaluation Process

Only a few state "asset management" type projects that ranked very high within NJDOT's statewide management systems for bridges, pavement projects, and drainage improvements were included as new projects. Due to severe funding constraints and overwhelming needs that far outreach the region's resources, the decision was made to identify project candidates for the local concept development process before they could be programmed, in order to address potential issues that could arise and that may impact their overall schedule. New and existing projects are consistent with and have been drawn from DVRPC's long-range plan, Connections 2040. Program development occurs through a TIP Subcommittee composed of regional stakeholders and was determined mostly by schedule and cost of existing projects, constrained by the level of funding available. All project costs and schedules were updated by project managers and stakeholder subcommittee members. A series of subcommittee meetings were held including NJDOT, NJ TRANSIT, and DRPA/PATCO staff, as well as City and County partners and a citizen representative, to review projects and identify the highest priorities, costs and schedules, and to vet concerns and negotiate final programming. A constrained draft program was put out for a minimum 30-day public comment period, and the program with some recommended changes was adopted by the DVRPC Board on July 25, 2013.

Investing in the Region's Planning Areas

The Delaware Valley Region is a mosaic of 352 townships, boroughs, and cities, each making their own land use decisions. In an effort to categorize and simplify types of communities and corresponding long-range planning policies, DVRPC organized the region into four community types as part of the development of *Connections 2040: Plan for Greater Philadelphia*, the region's long-range plan. Those four areas are Core Cities (Trenton and Camden in the New Jersey subregion, and Philadelphia and Chester in the Pennsylvania subregion); Developed Communities, which represent the region's older boroughs and townships; Growing Suburbs, which are experiencing or are forecasted to experience significant additional growth; and Rural Areas, where preservation and limited development are key.

As the implementation tool of the long-range plan, the TIP funds a variety of projects that address the transportation needs of all four categories of planning areas. Planning areas for all New Jersey TIP projects are included on each project listing in the DVRPC FY2014 TIP document for New Jersey, and can be found in the current DVRPC FY2013 TIP for Pennsylvania. A more complete discussion and illustration of planning areas can be found in the *Connections 2040: Plan for Greater Philadelphia* long-range plan on the DVRPC website at www.dvrpc.org/LongRangePlan.

Congestion Management Process

A Congestion Management Process (CMP) is a systematic process for managing congestion that provides information on transportation system performance. It identifies specific multimodal strategies for all locations in the region to minimize congestion and enhance the ability of people and goods to reach their destinations. These multimodal strategies include, but are not limited to, operational improvements, travel demand management, policy approaches, and additions to roadway and transit capacity. The CMP advances the goals of the DVRPC Long-Range Plan and strengthens the connection between the Plan and the Transportation Improvement Program (TIP).

In coordination with other management systems, the CMP serves the following purposes:

- It provides technical information for consideration in updating the TIP as to what may be the most efficient subcorridors and transportation strategies for investment of the limited dollars available.
- It helps with reviewing and prioritizing the list of existing study and development proposals and with feeding new ones into the pipeline.
- It is used in selecting corridor studies for DVRPC, which later results in Study and Development proposals along with other means of follow-through.

The CMP evaluates all new or amended TIP projects proposed for federal funding and, where Major Single-Occupancy Vehicle (SOV) capacity is consistent, the CMP includes the required table of supplemental strategies to reduce travel demand and to get the most value from the investment. Project managers are encouraged to contact DVRPC to check whether project alternatives are consistent early in planning phases for the most effective coordination.

The CMP category of Major SOV Capacity-adding Projects refers to projects that add roadway capacity in a way that affects regional or corridor travel patterns. The projects are noted as such in their TIP descriptions. This review considers, though is not determined by, projects modeled for air quality conformity purposes and studies considered likely to result in non-exempt projects. Being categorized as Major SOV makes a project eligible for additional support from CMP staff to help it generate the most long-term positive effect possible in an environment of limited funding.

The CMP completes its cycle by evaluating the effectiveness of transportation improvements and then starts updating the analysis again on approximately a three-year cycle. Further information about the CMP can be obtained from the DVRPC resource center or on DVRPC's website at www.dvrpc.org/CongestionManagement.

Goods Movement and Economic Development

DVRPC proactively seeks to fulfill the federal requirement to include freight as a primary planning factor through its long-range transportation planning, TIP development, and the conduct of technical studies. DVRPC's goal is to serve the region's manufacturers, businesses, ports, freight railroads, truckers, air cargo interests, and developers, and to maintain the Philadelphia-Camden-Trenton region as an international freight center.

At the forefront of DVRPC's freight-planning program is the Delaware Valley Goods Movement Task Force (DVGMTF). This broad-based freight advisory committee provides a forum for the private and public sector freight community to interject its unique perspectives on regional plans and specific projects. Since there is no special funding category for freight-related projects, the input of the committee is central to assuring the advancement of eligible projects that facilitate the flow of goods and promote economic development in concert with community goals.

The Delaware Valley contains an impressive freight transportation network consisting of highways, rail lines, ports, airports, and pipelines. There are also many related support facilities such as warehouses, manufacturing sites, rail yards, and truck stops. To support its freight planning activities, DVRPC recently developed the PhillyFreightFinder freight mapping and data platform for the Delaware Valley, including access to the PhillyFreightFinder application. This web-based mapping application can be found at <u>www.dvrpc.org/webmaps/PhillyFreight</u><u>Finder/index.htm</u>. It pinpoints freight facilities and freight activity in the region and highlights how the various freight system components intertwine and complement one another. PhillyFreightFinder contains 20 individual layers of infrastructure and facilities that are organized into seven categories. PhillyFreightFinder has been created with a variety of uses and users in mind, ranging from county and city planners to the general public and municipal officials. Further information about the Freight Program at DVRPC can be obtained from DVRPC's website at <u>www.dvrpc.org/freight</u>.

Projects listed in Table 3 illustrate a sampling of projects in the TIP that promote goods movement and economic development, and some of the benefits they provide to the freight industry. The identified projects have a direct, significant, and positive association with the flow of goods at intermodal facilities, near manufacturing, office, or commercial locations, or along strategic corridors. The projects improve National Highway System (NHS) connector routes, operating conditions for commercial vehicles, and access to economic activity centers. The benefits of the projects can be expressed in terms of increasing safety and efficiency, spurring economic activity, creating jobs, protecting the environment and the region's quality of life, and promoting primary freight corridors and industrial centers.

Toll Authority Highway and Port-Related Projects

The toll authorities with facilities in this region (Burlington County Bridge Commission, Delaware River Joint Toll Bridge Commission, Delaware River Port Authority/Port Authority Transit Corporation, New Jersey Turnpike Authority, and South Jersey Transportation Authority) undertake numerous significant highway and port-related projects utilizing their own funds. Although not included in the project listings or funding summaries, it is important to identify toll

authority projects to provide a more complete picture of the transportation issues being addressed throughout the region. The projects are listed, along with their associated costs, in Table 4.

Selected Studies

Future TIP projects are likely to be generated from Environmental Impact Statements (EIS)/Environmental Assessment (EA), Transportation Investment Studies (TIS) (formerly known as Major Investment Studies), and Feasibility Assessments (FA) that are currently underway. An EIS is an in-depth technical analysis of the significant environmental impacts of a project, and it identifies alternatives that would avoid or minimize the adverse impacts. The purpose of a TIS is to provide policy-level information about the impact of alternative transportation investments in order to ensure cost-effective decisions when major new facilities are contemplated. DVRPC's Unified Planning Work Program identifies ongoing studies. Feasibility Assessments (FA) are part of the first stage of New Jersey DOT's project development process, which involves data collection, public input, and the evaluation of potential conceptual improvements. Selected studies for FY14, including those from the DVRPC Work Program, are listed in Table 5.

Excluded in Table 5 are studies that already appear in either the TIP or NJDOT's Study and Development Program. The Study and Development process takes a selected highway deficiency through the steps of problem documentation and concept development in order to make candidate projects ready for consideration in the next TIP update for the phases of Preliminary Engineering, Final Design, Right-of-Way, and Construction. The entire Study and Development Program for the New Jersey counties is presented in the Project Description section of this document.

Table 3: Supporting Projects that Facilitate Goods Movement & Economic Development

Benefit	Project DB#	County			
Advances Safety and Security					
Mercer County Roadway Safety Improvements	D0412	Mercer			
Balances Freight Operational Needs with Community	y Goals

Special Programs

Special programs are often established that set aside funding for projects that will be selected at a future date, or that earmark funds for specific types of projects. Examples are the Congestion Mitigation and Air Quality Improvement Program (CMAQ) and the Transportation Alternatives Program (TAP) that includes the Transportation Enhancement Program and the Home Town Streets/Safe Routes to School Program from previous federal authorization.

DVRPC Competitive CMAQ Program

The Congestion Mitigation and Air Quality Improvement Program (CMAQ) was established by ISTEA and has continued under TEA-21, SAFETEA-LU, and MAP-21. CMAQ funds are allocated to the states for use in air quality non-attainment and maintenance areas for projects that contribute to the attainment of the Clean Air Act standards by reducing emissions from highway sources. The types of projects that are eligible for CMAQ funding include public transit improvements; bicycle and pedestrian facilities and outreach efforts; traffic flow improvements; ridesharing and other demand management programs; alternative fuel vehicles; and projects that will reduce idling emissions. In addition to the projects that use CMAQ funds and are selected through the regular TIP development process, DVRPC periodically sets aside a specific amount of CMAQ funds for a DVRPC Competitive CMAQ Program. Any public agency or public–private partnership may submit projects to DVRPC for consideration. The CMAQ subcommittee of the Regional Technical Committee evaluates the projects and makes recommendations to the Board for final selection. Since 1994, DVRPC has conducted four rounds of the competitive program. The most recent round that concluded in October 2012 selected projects for CMAQ funding programmed from FY13 to FY15.

Transportation Alternatives Program (TAP)

In MAP-21, the Transportation Alternatives Program (TAP) is an amalgamation of the previous authorization's Transportation Enhancements (TE), Recreational Trails (REC TRAILS), and Safe Routes to School/Home Town Street programs. As such, eligibility requirements from these programs have remained largely the same.

Former Transportation Enhancement (TE) eligible projects that are TAP-eligible still focus on nontraditional projects designed to enhance the experience of transportation, mitigate the impact of transportation facilities on communities and the environment, and enhance community character through transportation-related improvements. For example, projects may involve on- and off-road trail facilities for pedestrians, bicyclists, and other non-motorized forms of transportation. However, TE-eligible projects that involve safety and educational activities that do not target children; scenic or historic activities, facilities, or sites; and transportation museums are not eligible for TAP-funding in MAP-21.

The Recreational Trails Program (REC TRAILS) will continue funding the development and maintenance of recreational trails and trail-related facilities for motorized and non-motorized uses as a set-aside from the TAP.

The Safe Routes to School program (SRTS) will work with both school districts and pedestrian and bicycle safety advocates to make physical improvements that promote safe walking and biking passages to schools. The NJDOT Office of Bicycle and Pedestrian Projects will continue to manage the Technical Advisory Committee, which worked to coordinate program training and the project selection process for the New Jersey Safe Routes to School Program. See Table 6 for the complete list of selected SRTS projects from fiscal years 2008, 2009, and 2012.

Year	Municipality	Project Description	Total Award
BURLING

Projects seeking TAP funds are required to be submitted by TAP-eligible sponsors and to undergo a competitive selection process. In previous years, New Jersey's TE project selection process occurred at the state level. New TAP requirements include provisions for more MPO selection of projects, and NJDOT is working closely with the three New Jersey MPOs on a new process. Table 7 provides a full listing of projects that were selected since the year 2000 through the TE Program for New Jersey.

Table 7: New Jersey Transportation Enhancement (TE) Projects from Statewide LineItem, DB# X107, for FY2000-2012

Year	Municipality	Project Description	Total Award*
BURLINGTON COUNTY			
	Beverly City	Cooper Street Gateway Project	\$228,000*

Responding to Environmental Justice Concerns

The Transportation Improvement Program (TIP), as the agreed-upon list of priority projects for the region, serves to manage funding for construction, improvement, and expansion of the region's transportation system, a system that affects every resident of the Delaware Valley. Title VI of the Civil Rights Act of 1964 states that no person or group shall be excluded from participation in or denied the benefits of any program or activity utilizing federal funds, and the 1994 President's Executive Order on Environmental Justice (#12898) ensures "the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies."

Each federal agency is required to identify any disproportionately high and adverse health or environmental effects of its programs on minority populations and low-income populations. In turn, metropolitan planning organizations (MPOs), as part of the United States Department of Transportation's certification requirements, are charged with evaluating their plans and programs for Title VI and environmental justice (EJ) sensitivity, including expanding their outreach efforts to low-income and minority populations.

As the MPO for the nine-county, bi-state Philadelphia-Camden-Trenton region, DVRPC is committed to responding to the federal guidance on Title VI and EJ and has designated the Planning Division and Public Affairs Office to address technical and public involvement activities, respectively, as they relate to Title VI and EJ. To meet the requirements of these laws, the Commission must:

1. Enhance its analytical capabilities to ensure that the long-range plan and the TIP comply with Title VI;

2. Identify residential, employment, and transportation patterns of low-income and minority populations so that their needs can be identified and addressed and the benefits and burdens of transportation can be fairly distributed; and

3. Evaluate and, where necessary, improve the public outreach process to eliminate barriers and engage minority and low-income populations in regional decision-making.

DVRPC's technical work program involves the evaluation of EJ issues through quantitative and qualitative analysis and mapping. In 2001, DVRPC developed an EJ technical assessment to identify direct and disparate impacts of its plans, programs, and planning process on defined demographic groups in the Delaware Valley region. This assessment, called the Degrees of Disadvantage (DoD) Methodology, is utilized in a variety of DVRPC plans and programs, including the TIP. The EJ analysis tool is now available online at <u>www.dvrpc.org/webmaps/EJ2010/</u>. DVRPC publishes an annual update, Environmental Justice at DVRPC, which summarizes EJ and public outreach activities of the previous year and describes the methodology for evaluating the agency's long-range plan, TIP, and other projects and programs. In 2007, the DVRPC Board approved the Commission's Title VI Compliance Plan, which establishes a framework for DVRPC's efforts to ensure compliance with Title VI, as well as with other EJ and non-discrimination mandates. The Plan outlines how Title VI and EJ considerations are reflected

in the Commission's work program, publications, communications, public involvement efforts, and general way of doing business.

DVRPC believes that effective public outreach is a dynamic and ongoing process that is essential to meeting the future transportation and land-use needs of all residents of the Delaware Valley. Further, effective planning cannot be achieved without the consideration, cooperation, and consent of residents and stakeholders throughout the region. In April 2012, the DVRPC Board adopted an updated Public Participation Plan, which is designed as a resource for DVRPC's Board, staff, and the public to better understand the Commission's overall public participation strategy and procedures, as well as the federal mandates that inform DVRPC's public participation efforts. In addition to public meetings, events, and various communication channels, a primary outlet for public participation in DVRPC is the Public Participation Task Force comprised of appointed members and members-at-large throughout Greater Philadelphia bringing their own individual experiences to the planning table. The task force strives to represent the racial, ethnic, cultural, gender, age, and economic diversity of the region.

Environmental Justice Analysis of the TIP

DVRPC's Transportation Improvement Program (TIP) for New Jersey is an important component of the agency's EJ public involvement and technical work program activities. As the TIP is updated every other year for New Jersey, new EJ analyses and mapping are conducted, and public comment is received.

Technical EJ analysis and mapping of the TIP is based on the EJ methodology outlined in *Environmental Justice at DVRPC* (2011 update, publication number TM12007). Census data from 2010 is analyzed at the census tract level to identify demographic groups that may be underrepresented in the planning process, or might otherwise be disproportionately impacted by planning decisions. The eight population groups currently analyzed are households in poverty, non-Hispanic minority, Hispanic, elderly (75 years and over), car-less households, persons with physical disabilities, limited English proficiency, and female head of household with child.

Each census tract can contain a concentration greater than the regional average for each individual population group previously discussed that is considered regionally sensitive. Each census tract can contain zero to eight categories that are recognized as regionally sensitive. The number of sensitive demographic groups per census tract, with concentrations greater than the regional average, is referred to as its degree of disadvantage (DoD). For example, if a census tract meets or exceeds the regional average, or threshold, for elderly and physically disabled populations, then that census tract is said to have two degrees of disadvantage. Each census tract is mapped to illustrate the number of DoDs. TIP projects are mapped to identify low-disadvantage census tracts (with 1 to 4 DoDs) and high-disadvantage census tracts (with 5 to 8 DoDs), with and without a TIP project.

While a TIP project may not occur in an EJ sensitive area, disadvantaged populations can still be impacted by the proposed investment, especially if the project focuses on a highway or transit corridor that is used by a particular disadvantaged population.

For the DVRPC FY2014 TIP for New Jersey, 13 tracts (24 percent) of the 55 tracts with 5 to 7 DoD contain a TIP project, while 56 (23 percent) of the 245 census tracts with 1 to 4 DoD contain a TIP project. For the highway program of the DVRPC FY2014 TIP for New Jersey, 24 (44 percent) of the 55 tracts with 5 to 7 DoD contain a TIP project, while 24 (11 percent) of the 245 census tracts with 1 to 4 DoD contain a TIP project.¹

Included in the New Jersey analysis is a transit extension project: Transit Rail Initiatives. This project is mapped and funding has been allocated. There are currently three alternatives for the final location, and all three alternatives have been included in the analysis. Once the final design is selected, the remaining alternatives will be removed from the analysis, consequently lowering the number of census tracts with a TIP project.

¹ Only seven of the eight DoD were mapped for this project—population counts for physically disabled have not yet been released for the 2006–2010 American Community Survey. Population counts for minority populations and low-income populations, which are the two population groups mandated for investigation, are covered in the seven DoD population groups.

Public Involvement

Tab

PUBLIC INVOLVEMENT

The Delaware Valley Regional Planning Commission (DVRPC) firmly believes in the principle of public participation by reaching out to and satisfying as many populations as possible in an equitable and timely manner. Public participation is the only real way to ascertain the interests of a wide variety of citizens, including the under-involved and often unconcerned, the private sector, special interest activists, mature citizens, educators and parents, public officials, and the physically and economically disadvantaged. While today's citizens are far more sophisticated and modern standards are more inclusive, the need for public involvement is inherent to sound decision-making.

It is the responsibility of each citizen to become involved in regional issues and to play a role in the decision-making process; therefore, DVRPC will strive to provide as many opportunities as possible for residents to be informed and aware of the decisions that will affect the future of this region.

The public comment period for the Draft DVRPC FY2014 TIP for New Jersey opened on May 17, 2013, and closed on June 18, 2013, at 5:00 p.m. (EST). A public meeting was held in the following location:

WEDNESDAY, JUNE 12, 2013 4:00 p.m.–6:00 p.m. Cherry Hill Free Public Library 1100 Kings Highway North Cherry Hill, NJ 08034-1970

The meeting was conducted jointly with the New Jersey DOT and served as an opportunity to comment on the Draft New Jersey Transportation Improvement Program (STIP), which is available at <u>www.state.nj.us/transportation/capital/cpd</u>.

DVRPC's website (<u>www.dvrpc.org</u>) was a vital tool in public outreach and served a useful purpose during the TIP update cycle. The entire Draft TIP document was on the DVRPC website, including the dates and locations of the public meeting and other general information. In addition, an e-mail address link (<u>tip-plan-comments@dvrpc.org</u>) was provided to facilitate the submission of comments during the public comment period. Individuals could download or access current TIP materials any time.

Written comments via U.S. mail were forwarded to:

TIP Comments DVRPC Public Affairs Office 8th Floor 190 N. Independence Mall West Philadelphia, PA 19106

Comments were also made online as part of DVRPC's web-based TIP public comment application located at <u>www.dvrpc.org/TIP</u>. Users were able to click on the "Submit a comment on the Draft DVPRC FY2014 TIP for New Jersey" button to make general and project-specific comments. Responses provided by the appropriate agency were sought.

For those without access to the Internet, TIP documents were available at selected area libraries (see Table 8), including the DVRPC resource center at the DVRPC office in the American College of Physicians Building in downtown Philadelphia. Call (215) 592-1800 for more information.

Public Comment Guidance

In an effort to facilitate the public comment process, we offered some extended guidance. Listed below are issues that we asked the public to consider during the review of the TIP document.

- Siven the projects in the TIP, are we heading in the right direction? Are we meeting the needs of the region? Are we following the intent of MAP-21?
- For example, does the TIP contain the appropriate mix of projects with regard to (a) the amount of investment in highway projects versus the amount in transit projects, or (b) the types of improvements, such as maintenance and reconstruction of the existing system versus new capacity adding projects; or non-traditional projects (such as pedestrian, bicycle, smart technology, Transportation Enhancement, and Congestion Mitigation and Air Quality projects) versus the traditional highway and transit projects?
- Is this region getting its fair share of resources compared to other regions in the state or nation?
- Is the current transportation project development process, including environmental reviews and public input, effective?
- Siven financial constraints, are we spending money on the right types of projects?
- Is the TIP document easy to use? How could it be improved?

Of course, comments are not limited to these broader issues of concern. DVRPC, as always, welcomes opinions on specific projects contained in the TIP, the TIP development process, or any other topic of concern. However, we remind those intending to recommend new projects for the TIP that in order to earn a place on the TIP, projects must first progress through the screening and planning processes described earlier. As a result, requests for new projects are generally referred to the appropriate agency for further investigation through their respective pre-TIP study efforts. These study efforts may lead to the project winning a place on the TIP in some future year.

Maps, Listing, Codes & Abbreviations Overview

Tab

OVERVIEW OF MAPS, LISTINGS, CODES, AND ABBREVIATIONS

Project Map and Listing Explanations

The maps on the following pages show the location of the projects included in the DVRPC FY2014 TIP for New Jersey. Highway projects are shown on individual county maps, while transit projects are shown on a regional map. Projects are identified on the maps by their state DOT project number (DB#).

The different types of projects, such as intersection improvements, bridge replacements, or new transit facilities, are shown using various colors and symbols. Each map has its own legend and a companion index showing the project titles in DB# order.

Certain types of projects, such as roadway landscaping, lease payments for the use of railroad tracks, or preliminary studies, are not mapped. These projects are listed on the appropriate map by their DB# under the heading TIP Projects not mapped.

The Internet version of the TIP, found on the DVRPC website at <u>www.dvrpc.org/TIP</u>, includes an interactive method for displaying the maps and the project listings.

This document includes various project listings. The project listings include the New Jersey Highway, Transit, Statewide Highway, and the Study and Development programs, which are thoroughly explained in the following paragraphs.

DVRPC Region Highway and Transit Programs

The project listings within the Highway and Transit Programs are grouped by county and transit operator. Included are highway projects for Burlington, Camden, Gloucester, and Mercer counties, a listing of projects that apply to various counties, and transit projects for NJ TRANSIT and DRPA/PATCO.

Within each county grouping, individual highway and transit projects are listed alphabetically by project title. Each project listing provides information on total program period cost, cost by fiscal year, phase of work, and funding source. Costs are shown in millions of dollars. Also included are project location, project description, air quality code, improvement type, DVRPC Planning Area, NJDOT Capital Investment Strategies (CIS) program category, CMP category, EJ Degree of Disadvantage rating, and a variety of other information. To assist in quickly locating a project within the document, each county or transit section begins with an index of projects with page numbers listed. NJDOT and NJ TRANSIT have developed a STIP with a 10-year horizon, looking beyond the federal requirement of a four-year STIP, and that 10-year horizon is reflected in the finance records for all projects. The full New Jersey STIP is also available on the website www.state.nj.us/transportation/capital/stip1423.

Also note that all projects within the formal first four years of the TIP period (FY2014–2017) are considered funded and are able to be federally authorized for funding. By federal regulation, the TIP is the four-year constrained program for which revenues are reasonably expected to be available. However, the region developed a 10-year constrained programming horizon for highway and transit projects in order to provide more realistic expectations and time-frames in which to expect advancement of TIP projects with more realistic costs. Many projects that have phases within the first four years (FY2014–2017) also have phases (such as construction) that may be out in the later fiscal years (LFY2018–2023). This 10-year constrained programming horizon is illustrated on the project listings within the TIP document. Project phases which fall beyond the formal four-year TIP period (FY2014–2017) are technically "unfunded," but they are listed to represent the region's planned commitment to fund these phases in the future as funds become available.

In addition, NJDOT has identified several "Tier 2" projects that cannot be funded based on current 10-year revenue estimates. Availability of additional state or federal funds could allow them to be funded. A further refinement of the 10-year capital program could also lead to greater flexibility and accommodation of more projects. See Appendix G for a list of "Tier 2" unfunded highway and transit projects.

NJDOT Statewide Highway Projects

Following the lists of DVRPC region highway and transit projects are lists of NJDOT Statewide Highway Projects. Statewide projects are those projects managed by NJDOT on a statewide basis that are not specific to any particular MPO region or that provide direct support to NJDOT.

Study and Development Program

NJDOT has established a subset of highway projects in the capital program referred to as Study and Development (S&D). Projects marked with an "L" preceding any phase indicate a Local Agency Lead; otherwise, the state DOT is the lead agency. The objective of the S&D program is to make candidate projects ready for consideration in a future TIP update cycle for preliminary engineering, final design, right-of-way acquisition, and construction. Projects in the S&D program have been identified as priorities for further advancement but have not reached approval for advancement into preliminary engineering or final design. Reasonable strategies and alternatives that address the purpose and need are identified for S&D projects in the concept development phase.

Codes and Abbreviations Overview

Various codes and abbreviations are used in the project descriptions for the phase of work and source of funds. These codes and abbreviations are explained below.

Air Quality Codes

An alphanumeric air quality (AQ) coding scheme has been developed for all projects. The AQ code is applied by DVRPC for the conformity determination and exempt eligibility identification purposes.

For non-exempt projects, the first conformity analysis year following the project's opening or projected completion is listed: 2015, 2025, 2035, or 2040. The letter following the year indicates whether the project was modeled (M) in the regional simulation or if the project was analyzed using an off-model technique (O).

The Clean Air Act regulations also provide for projects that may be exempt from the conformity analysis. An exempt project of the final conformity rule (40 CFR 93) is defined as a project listed in Table 9 that primarily enhances safety or aesthetics, maintains mass transit, continues current levels of ridesharing, or builds bicycle and pedestrian facilities. There are several categories of exempt projects, and DVRPC is now indicating the specific exempt code in the project descriptions. In cases in which multiple codes apply, the most representative code is assigned. Exempt projects in design phases are classified under the planning and technical studies category. Tables 9 and 10 provide a complete list of exempt and non-exempt categories and corresponding air quality codes.

Projects under the Concept Development category are those that are still in the conceptual phase and are not yet part of the current TIP. However, they are likely to be included in future TIPs; therefore, they are assigned air quality codes that begin with "CD."

Projects that have been determined not to be regionally significant as defined in the final conformity rule and do not fit into an exempt category have been labeled "Not Regionally Significant" (NRS).

Long-Range Plan ID

The Long-Range Plan ID (LRP ID) indicates if a project is identified as a Major Regional Project in the DVRPC long-range plan with the corresponding ID number.

Status Codes

DVRPC has developed a coding scheme for projects that have been determined to be "new" projects in the TIP. New projects in the TIP are denoted with one of four status codes: NEW,

NEW-B, NEW-G, or RETURN. These status codes indicate which projects were not programmed in the final version of the preceding TIP (FY2012–2015) and assist in establishing the origin of these projects.

Projects indicated as "NEW" have never been programmed in a prior year TIP. These projects are programmed in the TIP for the absolute first time. Projects indicated as "NEW-B" are new "break-out" projects that have been "broken out of," or derived from, an existing TIP project. Projects indicated as "NEW-G" are new "graduate" projects that have advanced from the Study and Development Program into the TIP, and typically have advanced to the next phase of work requiring federal and/or state funding. Furthermore, as a result of funds being programmed over a 10-year horizon, many of these projects may be included in both the TIP and the Study and Development Program. Projects indicated as "RETURN" have previously been programmed in a prior year TIP, but through a variety of circumstances, have returned to be programmed in the DVRPC FY2014 TIP for New Jersey.

Planning Area Notation

The Delaware Valley region is a mosaic of 352 diverse cities, boroughs, and townships. To categorize and simplify the types of communities and define corresponding long-range planning policies appropriate for each type, each municipality has been assigned a planning area type associated with the long-range planning policies that will be most beneficial to the community as a whole. At the regional scale, Planning Areas guide the direction of policy. Planning Areas include: *Core cities,* which include Philadelphia, Trenton, Camden, and Chester; *developed communities/mature townships* that are composed of the region's inner-ring communities adjacent to core cities, railroad boroughs, trolley car communities, and developed suburban townships; *growing suburbs,* which are communities with considerable remaining developable upland acres and are experiencing or are forecast to experience significant population and employment growth; and *rural areas* that include the region's agricultural communities and communities with large remaining natural areas, including protected lands. "Planning Area" is a notation in the TIP project description.

Degree of Disadvantage

DVRPC uses the Degree of Disadvantage (DoD) methodology to identify direct and disparate impacts of its plans, programs, and planning process on defined population groups in the Delaware Valley region under Title VI of the Civil Rights Act and the Executive Order on Environmental Justice. Population groups assessed at the census tract level as defined by the U.S. Census Bureau include Non-Hispanic Minority, Carless Households, Households in Poverty, Female Head of Household with Child, the Elderly (over 75 years old), Hispanic, and Limited English Proficiency. Census tracts that have higher concentrations of a particular demographic group than the regional average for that population are considered to be at a disadvantage. The total number of demographic groups that are above the regional average concentration in each census tract is that tract's DoD. If a tract has higher than average population for three of the identified demographic groups, for example, then it has three DoDs. DoDs range from zero to

seven, with seven indicating a tract at the highest degree of disadvantage. "DoD" is listed in the project descriptions to note the highest number of DoD tracts impacted by a project on the TIP.

CMP Notation

Projects that have been determined to be major capacity or operational improvements are consistent with DVRPC's Congestion Management Process (CMP) and are noted as such in the TIP description, with indications of whether supplemental strategies for addressing congestion are required, and in which subcorridor. The CMP category of Major SOV Capacity Projects refers to projects that add capacity or improve operations in a way that impacts regional travel patterns. This review considers, though is not determined by, projects modeled for air quality conformity purposes and studies considered likely to result in non-exempt projects.

Freight Corridor Initiative

Projects that have a direct, significant impact on the flow of goods along strategic freight corridors, or that improve National Highway System connector routes to intermodal facilities are noted as integral to the Delaware Valley Freight Corridors Initiative.

Phase of Work

CAP (Capital Acquisition) - Used to denote the acquisition of rolling stock by NJ TRANSIT.

CD (Concept Development) – Involves traffic studies needs analyses, corridor studies, and other work preparatory to project development, which includes assessing alternatives and determining a Preliminary Preferred Alternative (PPA) based on environmental impact, constructability, and cost effectiveness to address the problem.

CON (Construction) – Involves the actual building of a project.

FD (Final Design) – Consists of taking a recommended solution and scope of work defined in the preliminary engineering phase and developing a final design, including right-of-way and construction plans.

EC (Engineering/Construction) – Funding can be used for both design and construction costs.

ERC (Engineering/Right-of-Way/Construction) – Funding can be used for design, right-of-way, and construction costs.

PE (Preliminary Engineering) – The process of advancing preliminary engineering and obtaining formal community and environmental approval of the Initially Preferred Alternative.

PLS (Planning Study) – Involves traffic studies, needs analyses, corridor studies, and other work preparatory to project development.

ROW (Right-of-Way Acquisition) – Involves purchasing the land needed to build a project.

SWI (Statewide Investment) – Used to describe a series of coordinated smaller-scale projects in multiple locations, and in multiple phases work, that address a specific mobility issue.

*Note: An "L" preceding any phase means Local Agency Lead; otherwise, state DOT is the lead agency.

Federal Highway Funding Sources

BRIDGE (Federal Bridge Program) – Provides funding for the rehabilitation or replacement of bridges defined as structurally deficient and/or functionally obsolete. This program has been merged into NHPP in MAP-21.

BRIDGE-OFF (Federal Bridge Program) – Provides funding for the rehabilitation or replacement of bridges that are off the federal-aid system and are defined as structurally deficient and/or functionally obsolete. This program has been merged into NHPP in MAP-21.

CMAQ (Congestion Mitigation and Air Quality Improvement Program) – Provides funding for projects that improve air quality and/or relieve congestion without adding new highway capacity, and now under MAP-21, include demand-shifting projects or programs such as telecommuting or establishing electric vehicle charging stations or natural gas vehicle refueling stations.

CTDG (Competitive TIGER (Transportation Investment Generating Economic Recovery) Discretionary Grants) – Special federal economic recovery funding used to spur a national competition for innovative, multi-modal, and multi-jurisdictional transportation projects that promise significant economic and environmental benefits to an entire metropolitan area, a region, or the nation.

DEMO (Demonstration Funds) – Special federal funding from congressional earmarks provided under ISTEA, TEA-21, and SAFETEA-LU. Project earmarks were discontinued under MAP-21.

EB (Equity Bonus Program) – Provides funding to states based on equity considerations. This program has been discontinued under MAP-21.

ER (Emergency Relief Program) –Provides funding for emergency and permanent repairs on federal-aid highways and roads on federal lands that have suffered serious damage in the event of a natural or manmade disaster.

FBP (Federal Ferry Boat Program or Sec 1121) – Provides funding for the leasing or construction of ferry boat, terminal facilities, or maintenance facilities except temporary ferry operations.

GARVEE (Grant Anticipation Revenue Vehicle) Bond Program – Program that provides securities upfront to advance the high cost federal-aid transportation projects and accelerate construction timelines based on future federal-aid funding for debt repayment. The state is

reimbursed for annual project debt service rather than construction outlays over a number of years. Once a project is selected for debt financing, the project is submitted to the FHWA for approval as an advance construction (AC) project.

HPP10 (High-Priority Projects) – Provides special federal funding from congressional earmarks provided under SAFETEA-LU.

HPP20 (High-Priority Projects) – Provides special federal funding from congressional earmarks provided under SAFETEA-LU.

HSIP (Highway Safety Improvement Program) – Provides funding for projects or strategies included in the state's strategic highway safety plan that correct or improve a hazardous road location or feature or addresses a highway safety problem. For the first time under MAP-21, truck parking is eligible.

I-MAINT or IM (Interstate Maintenance) – Provides funding for projects that promote resurfacing, rehabilitation, and preventive maintenance on the interstate system. This funding category has been discontinued under MAP-21.

NHS (National Highway System) – Provides funding for projects that improve and support the interstate highway system and other key highway links. This funding category has been discontinued under MAP-21.

National Highway Performance Program (NHPP) – Provides funding used to support the condition and performance of the National Highway System (NHS), and to construct new facilities on the NHS that support national performance goals. Three programs from the previous authorization (SAFETEA-LU) have merged into NHPP: the Federal Bridge Programs (BRIDGE and BRIDGE-OFF), Interstate Maintenance (MAINT), and the National Highway System (NHS). Eligible activities broadly vary from workforce development and training to construction of bridges, tunnels, highways, and bicycle and pedestrian facilities to ITS capital improvements, for example.

PL (Metropolitan Planning Funds - FHWA) – Provides funding for the federally mandated transportation planning process conducted within each MPO.

RCA (FHWA Redistribution of Certain Authorized Funds) – Provides authorized funds to be appropriated for federal-aid highway programs for FY2013 that will not be allocated to the state and not available for obligation in FY2013 under MAP-21. RCA funds will be available for obligation until September 30, 2016.

RHC (Rail Highway Grade Crossing) – Provides funding for safety improvement projects to reduce the number and severity of crashes at public highway-rail grade crossings under the Highway Safety Improvement Program (HSIP).

REC TRAILS or RTP (Recreational Trail Program) – Provides funding for the development and maintenance of recreational trails and trail-related facilities for non-motorized and motorized recreational trail uses, such as hiking, bicycling, off-road motorcycling, or cross-country skiing. This program has been incorporated into the TAP in MAP-21.

SCENIC BYWAYS (Scenic Byways Program) – Provides funding for byway-related projects. This was discontinued under MAP-21.

SPR (FHWA Statewide Planning and Research) – Provides funding for planning and research activities.

SRTS (Federal-Aid Safe Routes to School) – Provides funding that can be used for programs and projects that encourage children and their parents to walk and bicycle safely to school. This has been merged into MAP-21's Transportation Alternatives Program (TAP).

STP (Surface Transportation Program) – Provides funding previously made available under various smaller federal-aid categories as well as broad, flexible components, such as safety and projects under the new Transportation Alternatives program (TAP). For the first time, truck parking and surface transportation infrastructure improvements at port terminals are eligible. STP remains the core federal highway program and with the broadest eligibility criteria in MAP-21.

STP-TE (Surface Transportation Program-Transportation Enhancement) – Provides funding for pedestrian and bicycle infrastructure and safety programs, scenic and historic highway programs, landscaping and scenic beautification, historic preservation, environmental mitigation, rehabilitation of historic facilities related to transportation, renovated streetscapes, rail-trails and other transportation trails, transportation museums, and scenic and historic highway program visitor centers. STP-TE has been incorporated into the Transportation Alternatives Program (TAP) in MAP-21.

TIGER – See CTDG.

Transportation Alternatives (TAP) – Provides set-aside funding for programs from the previous authorization, SAFETEA-LU, which are: Transportation Enhancements (TE), Recreational Trails (REC TRAILS), and the Federal-Aid Safe Routes to School (SRTS). TAP funds may be transferred to NHPP, STP, HSIP, CMAQ or PL, or to the Federal Transit Administration for TAP-eligible projects.

State Highway Funding Sources

STATE or TTF (State Transportation Trust Fund) – Provides funding from the New Jersey Transportation Trust Fund.

STATE-DVRPC – Provides STATE funding from the Transportation Trust Fund for use by DVRPC for local projects. STATE funds are made available annually during FY2014 through FY2018 as a result of the MPO exchange of program funds with NJ TRANSIT and NJDOT. See Appendix E for detailed information.

Federal Transit Funding Sources

FED OTHER (Federal Other) – Used to denote unanticipated allocations of federal funds outside the regular apportionment process, so the funding source is not known.

FERRY (Federal Ferry Funds) – Provides funding for the rehabilitation and/or development of ferry facilities throughout the state. It has been discontinued in MAP-21.

HPP10 (High Priority Projects) – Provides special funding from congressional earmark under SAFETEA-LU.

HPP20 (High Priority Projects) – Provides special funding from congressional earmark under SAFETEA-LU.

JARC (Job Access and Reverse Commute Program) – Provides funding for selected municipal plans that either increase job accessibility for the most disadvantaged members of the population, or facilitate reverse commute movements. MAP-21 has repealed this program, but transit agencies can choose to use their formula funds from Section 5307 (Urbanized Area Formula Grants) and Section 5311 (Non-urbanized Area Formula Program) to continue funding JARC projects.

NEW FREEDOM (FTA 5317 Formula Program) – Provides funding for projects that improve public transportation services, and alternatives to public transportation, for people with disabilities beyond those required by the Americans with Disabilities Act of 1990. It has been merged with MAP-21's Section 5310 FTA Enhanced Mobility of Seniors and Individuals with Disabilities Program.

SEC 5307 (FTA Urbanized Area Formula Grants Program) – Provides funding for capital, planning, and JARC-eligible activities as well as discretionary passenger ferry grants, state safety oversight, and associated transportation improvements. Systems with 100 or fewer buses in urbanized areas with over 200,000 became eligible to receive funding for operating expenses in MAP-21. Sec 5307 transit funds can no longer be transferred to highway projects under MAP-21, but FHWA funds may be transferred to this program.

SEC 5309 (FTA Fixed Guideway Capital Investment Grants "New Starts") – Provides funding for new and expanded rail, bus rapid transit, and ferry systems that reflect local priorities, including core capacity projects. Fixed-guideway modernization projects and bus facilities projects are funded in Sec. 5337 (State of Good Repair Program, which provided grants to replace and rehabilitate rolling stock, signals and communications, security, maintenance, passenger facilities, etc.) and Sec. 5339 (Bus and Bus Facilities Program) in MAP-21. The previous authorization's Section 5309 funded only fixed-guideway modernization projects.

SEC 5310 (FTA Enhanced Mobility of Seniors and Individuals with Disabilities Program) – Provides funding for two programs merged from the previous authorization: NEW FREEDOM FTA's 5317 Formula Program, which has been discontinued by MAP-21, and the previous authorization's Section 5310 Elderly and Persons with Disabilities Program for the purchase of small buses or van-type vehicles with lifts for private or nonprofit agencies that serve the elderly and persons with disabilities.

SEC 5311 (Non-urbanized Area Formula Program) – Provides funding for rural public transportation programs in areas with a population fewer than 50,000 according to the Census, including JARC-eligible activities from previous authorizations and in MAP-21.

Sec 5324 (Public Transportation Emergency Relief Program) – Provides funding for capital and operating expenses to protect, repair, replace, or reconstruct equipment and facilities in danger of failing or have suffered serious damage in the event of a natural or manmade disaster that are not reimbursed by the Federal Emergency Management Agency (FEMA).

SEC 5326 (Transit Asset Management) – Provides requirements across FTA's grant programs. MAP-21 requires the FTA to define the term "state of good repair" and create objective standards for measuring the condition of capital assets, including equipment, rolling stock, infrastructure, and facilities. All FTA grantees and their subrecipients are required to develop transit asset management plans. FTA will support this effort through technical assistance, including the development of an analytical process or decision support tool that allows recipients to estimate their capital investment needs over time and assists with asset investment prioritization.

SEC 5337 (State of Good Repair Program) – Provides dedicated formula-based federal funding under MAP-21 for the replacement and rehabilitation of the fixed guideway system and high-intensity motor bus systems that use high-occupancy vehicle (HOV) lanes, including bus rapid transit (BRT), rail, and passenger ferries in order to maintain public transportation systems in a state of good repair. Projects must be included in a transit asset management plan.

SEC 5339 (Bus and Bus Facilities Program) – Provides formula-based federal funds based on population, vehicle revenue miles, and passenger miles to replace, rehabilitate, and purchase buses and related equipment, and to construct bus-related facilities with a 20 percent local match requirement. This replaces the previous authorization's Section 5309 Bus and Bus Facilities Program.

SEC 5340 (FTA 5340 Formula Program) – Provides additional apportionment of funding to the Urbanized Area Formula and Rural Area Formula programs in MAP-21 as in previous authorizations.

State Transit Funding Sources

CASINO REVENUE – Provides state transit funding from the annual allocation of the 7.5 percent of the Casino Tax Fund appropriated for transportation services for senior and disabled persons.

Other Fund Sources

Advance Construction (AC) – Procedure to advance a federally funded project phase into the current fiscal year and implement it with non-federal funds. The use of this procedure is subject to the availability of non-federal funds (e.g., state funds) in the year that the phase is to be implemented and the availability of federal funds in the year that the AC project is to be converted to a regular federal-aid project. AC projects are listed individually in the TIP in the year the project is to be implemented and the year conversion will take place.

DRPA – Delaware River Port Authority funds.

LOCAL/MATCH – Funding provided by counties, municipalities, or other non-federal sources to be used to match state or federal funds.

Multi-Year Funding – Procedure to program and authorize only a portion of a given project phase that is necessary to support the reimbursement of planned cash outlays for a given year. The remaining portions of the project phase are programmed in subsequent years with the condition that federal authorization to proceed is not a commitment or obligation to provide federal funds for the portion that is not fully funded. If sufficient federal funding is not available in any fiscal year, NJDOT will take full responsibility to fund the remaining portion of that phase of work in accordance with federal and state law, or the project may be terminated or placed on hold until funding is available.

TBD – To be determined.

OTHER – From a source other then federal or state transportation funds.

Table 9: Air Quality Codes for DVRPC Exempt Project Categories

Exempt Project C	ategory	AQ Code	Exempt Proj	ect Category	AQ Code	
	Railroad/Highway Crossing	S1		Operating assistance to transit agencies	M1	
	Hazard Elimination Program	S2		Purchase of support vehicles		
	Safer Non-Federal-Aid System Roads	S3		Rehabilitation of transit vehicles	М3	
	Shoulder Improvements	S4		Purchase of office, shop, and operating equipment for existing facilities		
	Increasing Sight Distance	S5		Purchase of operating equipment for vehicles (e.g., radios, fareboxes, lifts, etc.)		
	Safety improvement program	S6		Construction or renovation of power, signal, and communications systems	M6	
	Traffic control device and operating assistance other than signalization projects	S7	MASS TRANSIT	Construction of small passenger shelters and information kiosks		
	Railroad/highway crossing warning devices	S8		Reconstruction or renovation of transit buildings and structures	M8	
	Guardrails, median barriers, crash cushions	S9		Rehabilitation or reconstruction of track structures, track, and tracked-in existing rights-of-way	M9	
	Pavement resurfacing and/or rehabilitation	S10		Purchase of new buses and rail cars to replace existing vehicles or for minor expansions of the fleet	M10	
SAFETY	Pavement marking demonstration	S11		Construction of new bus or rail storage/maintenance facilities categorically excluded in 23 CFR part 771		
	Emergency relief (23 U.S.C. 125)	S12		Specific activities that do not involve or lead directly to construction, such as planning and technical studies	X1	
	Fencing	S13		Grants for training and research programs	X2	
	Skid treatments	S14		Planning activities conducted pursuant to title 23 and 49 U.S.C.	Х3	
	Safety roadside rest areas	S15		Federal aid systems revisions	X4	
	Adding medians	S16		6 Engineering to assess social, economic, and environmental effects of the proposed action or alternatives to that action		X5
	Truck-climbing lanes outside the urbanized area	S17		Noise attenuation	X6	
	Lighting improvements	S18	OTHER	Advance land acquisitions (23 CFR 712 or 23 CFR 771)	X7	
	Widening narrow pavements or reconstructing bridges (no additional travel lanes)	S19		Acquisition of scenic easements	X8	
	Emergency truck pullovers	S20	PROJECTS	Plantings, landscaping, etc.	X9	
AIR QUALITY	Continuation of ridesharing and van-pooling promotion activities at current levels	A1		Sign removal		
	Bicycle and pedestrian facilities	A2	Directional and informational signs		X11	
NOT REGIONALLY SIGNIFICANT PROJECTS	Projects determined to be "Not Regionally Significant" and do not fit into an exempt category	NRS		Transportation enhancement activities (except rehabilitation and operation of historic transportation buildings, structures, or facilities)	X12	
STUDY AND DEVELOPMENT PROJECTS (NJ)	Project in the Study and Development Program expected to result in an exempt project	SDX		Repair of damage caused by natural disasters, civil unrest, or terrorist acts, except projects involving substantial functional, locational, or capacity changes	X13	
NO REGIONAL EN	ISSIONS ANALYSIS REQUIRED					
Intersection channel	ization projects	R1	Truck size and	weight inspection stations	R4	
0	ation projects at individual intersections	R2	0	rtical and horizontal alignment	R5	
Interchange reconfig	guration projects R3 Bus terminals and transfer points		R6

Non-Exempt Project Category		
	Regionally Significant, non-exempt projects included in the 2015 and all subsequent analysis years	2015M
PROJECTS MODELED USING	Regionally Significant, non-exempt projects included in the 2025 and all subsequent analysis years	2025M
DVRPC'S TRAVEL DEMAND MODEL	Regionally Significant, non-exempt projects included in the 2035 and all subsequent analysis years	2035M
	Regionally Significant, non-exempt projects included in the 2040 and all subsequent analysis years	2040M
STUDY AND DEVELOPMENT	Project in the Study and Development Program expected to result in a non-exempt project	SDN
PROJECTS (NJ)	Project on the Illustrative/"Tier 2" Unfunded List expected to result in a non-exempt project	FYN

Table 10: Air Quality Codes for DVRPC Non-Exempt Project Categories

Notes on Tables 9 and 10:

- 1. Both exempt and not regionally significant project categories adhere to 40 CR 93 Sections 126 and 127.
- 2. In the PM₁₀ non-attainment or maintenance area, rehabilitation of transit vehicles is only exempt if they comply with control measures in the applicable implementation plan.
- 3. AQ codes are DVRPC designated.

New Jersey Highway Program

Burlington DB# 11368 Route 9, Jobs Creek Bridge The proposed work consists of replacing the existing two-lane bridge over Jobs Creek (Structure Number 0302-151) with a AQCODE: S19 new two-lane, single-span structure. The proposed bridge will have two lanes and shoulders supported by concrete beams on concrete abutments supported by piles. Retaining walls will be required along the south side of the widened roadway but the entire structure would remain within the existing right-of-way. About 800 feet of bridge approach roads will be reconstructed at each end of the bridge. All safety features such as bridge parapets, shoulder width, roadway curvature, and guiderail will be included and no design exceptions are proposed. Burlington DB# 10307 Route 70, East of North Branch Road to CR 539 Proposed pavement rehabilitation strategy to occur on this section of Rt. 70, which is a public facility and part of the NHS, AQCODE: S10 will provide for milling and overlay to either match existing grade or provide a 2 to 3 inch increase in profile grade. NOTE: NJDOT is evaluating the feasibility of rubblization for this project since it is in a low constraint area. This solution, if feasible, would increase the proposed cost but would significantly extend the service life of the repair by allowing construction of a perpetual pavement that will ultimately provide a superior product with significantly less future maintenance costs. Camden DB# 93266 Route 30, Blue Anchor Dam This project will address the proposed replacement of the spillway structure. The existing spillway structure is reported to AQCODE: S2 be deteriorated and inadequate to pass 100-year, 24-hour storm without overtopping the crest of roadway at the current setting of the stop logs. Operation of the stop logs during an emergency may be difficult without any operating mechanism. The replacement of the dam is necessary in order to prevent roadway deterioration due to flooding CMP: Not SOV Capacity Adding Adding Subcorr(s): . DVRPC Planning Area: Growing Suburb Municipalities: Winslow Township CIS Program Category: Bridge Assets CIS Program Subcategory: Roadway Preservation Project Manager: Pennell, Ed Degrees of Disadvantage: 2 Mileposts: 25.88 Sponsor: NJDOT Improvement Type: Bridge Repair/Replacement **TIP Program Years (\$ millions)** Later Fiscal Years (\$ millions) 2023 Phase Fund 2014 2015 2016 2017 2018 2019 2020 2021 2022 CON NHPP 9.898 **Fiscal Year Total** 9.898 Total FY2014-2017 9.898 Total Later FY2018-2023 NEW DB# 11338 Route 70, Route 38 to Cropwell Road This project consists of milling, resurfacing, reconstructing, and rehabilitating the mainline and shoulder pavement in both AQCODE: S10 the Eastbound and Westbound directions. Ramps and cross roads within the project limits are also included in the scope or work. The project is to mill and resurface the majority of Rt. 70 with a full depth pavement reconstruction for certain sections of the roadway where the pavement is in poor condition. In addition, the existing culvert at Cropwell's Brook is to be replaced. The proposed culvert will accommodate a 25-year storm. Drainage improvements include the construction of additional inlets and piping, increasing the size of existing piping, installation of underdrains in select areas, and the installation of a tide control check valve CMP: Not SOV Capacity Adding Adding Subcorr(s): 12A, 12B, 12C DVRPC Planning Area: Growing Suburb; Developed Municipalities: Evesham Township; Pennsauken Township; Cherry Hill Township Community CIS Program Subcategory: CIS Program Category: Road Assets Project Manager: Maevsky, Andrew Degrees of Disadvantage: Mileposts: 0.00 - 7.7 Sponsor: NJDOT Improvement Type: Roadway Rehabilitation **TIP Program Years (\$ millions)** Later Fiscal Years (\$ millions) 2022 2023 Phase Fund 2014 2015 2016 2017 2018 2019 2020 2021 DES NHPP 3.000 ROW NHPP 2.500 CON NHPP 20.000 NHPP CON 18.277 **Fiscal Year Total** 3.000 2.500 20.000 18.277 Total FY2014-2017 5.500 Total Later FY2018-2023 38.277

New Jersey Highway Program

Final Version

Camden DB# 08366 NEW-G Route 130, Camden County, Drainage NJDOT Operations reports multiple closures due to flooding in this area. The current storm water pipes are inadequate to AQCODE: S2 drain the storm water which is causing the flooding in the roadway. The past flood closures and daily traffic results in a high probability that the traveling public will continue to be impacted during major storm events. Hydrology and hydraulics studies are needed to identify the storm water drainage needs in order to reduce future flooding. The project area ranks #26 of 200 locations in the Drainage Management System. CMP: Not SOV Capacity Adding Adding Subcorr(s): 5B, 6L Municipalities: Haddon Township; Pennsauken Township DVRPC Planning Area: Developed Community CIS Program Subcategory: CIS Program Category: Road Assets Roadway Preservation Project Manager: Bousenberry, Bob Degrees of Disadvantage: 6 Mileposts: 28.82-29.15 Sponsor: NJDOT Improvement Type: Roadway Rehabilitation TIP Program Years (\$ millions) Later Fiscal Years (\$ millions) Phase Fund 2014 2015 2016 2017 2018 2019 2020 2021 2022 2023 NHPP PE 0.500 NHPP DES 1.000 NHPP ROW 0.500 CON NHPP 7.100 **Fiscal Year Total** 0.500 1.000 0.500 7.100 1.500 Total FY2014-2017 Total Later FY2018-2023 7.600 DB# 10341 Route 168, Merchant Street to Ferry Avenue, Pavement Pavement rehabilitation rank #30 on the 2008 Pavement Projects List. The pavement project is identified as a priority AQCODE: S10 need in the Pavement Management System. The project requires various levels of pavement reconstruction and resurfacing. All sections will be paved with asphalt. Significant sections of the project will require only milling and paving. The other sections require full reconstruction. The reconstruction involves the removal of the existing pavement and 9" thick concrete slab, further excavation of the subbase, and the installation of Geotextile, and Roadway Stabilization prior to base and surface courses CMP: Not SOV Capacity Adding Adding Subcorr(s): 6L Municipalities: Haddon Township; Camden City; Woodlynne Borough DVRPC Planning Area: Developed Community; Core City CIS Program Subcategory: CIS Program Category: Road Assets Project Manager: McCleerey, John Degrees of Disadvantage: Mileposts: 8.56 - 10.75 Sponsor: NJDOT Improvement Type: Roadway Rehabilitation **TIP Program Years (\$ millions)** Later Fiscal Years (\$ millions) Phase Fund 2014 2015 2016 2017 2018 2019 2020 2021 2022 2023 NHPP 0.700 PF NHPP DES 1.000 NHPP CON 11.480 **Fiscal Year Total** 0.700 1.000 11.480 Total FY2014-2017 13.180 Total Later FY2018-2023

NJ T	RANSIT										
DB# T	135	Preventive M	aintenand	ce-Bus							
<u>AQCOD</u>	<u>DE:</u> M3					cluding preventive ase Reporting M			accordance	with federal	
There are 3 NJ TRANSIT bus garages in the DVRPC region. Statewide in 2008, NJ TRANSIT operated a fleet of just over 2100 buses. 283 buses (14%) provided service in the DVRPC region and operated accordingly: Hamilton Township garage operates 69 local buses for service in Trenton and surrounding towns in Mercer County. Washington Township garage operates 112 commuter buses for service linking the Philadelphia/Camden market with Gloucester, Cumberland, Salem, Atlantic, and Cape May Counties. Some local service operates solely in suburban Camden and Gloucester Counties. Newton Avenue Garage operates 102 local and commuter buses for service in the Philadelphia/Camden area and suburban locations mostly in Camden and Burlington Counties. Some service extends to Mercer County (#409/418 lines to Trenton) and to Gloucester County (#455 line). Toll Credit will be used as the non-federal match. An explanation of toll credit can be found in the Introduction Section of the STIP. In addition, expenditures are for costs of projects in specific years only. ARRA funds added is for preventive maintenance (\$2,259,000). CMP: Not SOV Capacity Adding											o nd, ea 18

New Jersey Transit Program - NJ TRANSIT

DB# T630	J BRT/Avanda	ale Park Rid	е					LRPID: X	NEW		
<u>AQCODE:</u> 2025M	Funding during this TIP period will be used to commence with the early phase of the South Jersey Bus Rapid Tra BRT) system. Improvements include the addition of 150 new parking spaces to the existing 322 spaces at the Av Park and Ride, transit signal priority equipment at key intersections, offboard fare collection systems (e.g., ticket v machines), dynamic signage at major terminals such as the Avandale Park and Ride and Walter Rand Transport. Center, and the design of enhanced BRT stops that will brand and standardize BRT shelters. This initial project a support the long term advancement of the SJBRT system. When fully completed, the SJ BRT system is expected to serve Gloucester and Camden county residents travellii between Downtown Camden and Center City Philadelphia and the Avandale Park and Ride in Winslow Township Camden County. The total cost of the SJ BRT is approximately \$46 million. The full SJ BRT line will commence a Avandale Park and Ride lot and travel on the Atlantic City Expressway, Route 42, I-76, and I-676 to Camden and Philadelphia cities. A branch of the service will also serve a new Park and Ride lot at Delsea Drive in Gloucester by travelling along Route 55 prior to linking the other branch of service at the merge of Routes 55 and 42. Funding is also provided for the implementation of the Bus Rapid Transit serving Camden County, NJ including a expanded park/ride, traffic signal priority at select intersections to improve bus vehicle travel speeds, fare collect dynamic signage.									e ng will y

FY2012 Major Project Status

Delaware Valley Regional Planning Commission (DVRPC)

Major Project Status Report

State Transportation Improvement Program (STIP) for New Jersey (FY2014-2017)

Federal regulations require that the STIP lists major projects from the previous STIP and identify any significant delays in the planned implementation. The table below is a list of major projects from the FY2012-2015 STIP and their status.

DB#	FY2012-2015 Total Cost	Project Name	Project Status
BURLING	TON COUNTY		
11334	\$13,500,000	Route 38, MP 0.0 - 6.1 Pavement	This Limited Scope Project graduated from Concept Development directly to Final Design in May 2013. CD report was approved by FHWA in April 2013.
D9912A	\$34,200,000	South Pemberton Road, CR 530, Phase 2	The South Pemberton Road, CR 530 project was broken into two projects in FY2012-2015 TIP for NJ. Construction for Phase I of the project (DB# D9912) has been authorized. Phase 2 of the project (DB# D9912A) is waiting for right-of-way authorization by NJDOT. The county is expecting to receive a revised ER based on FHWA comments to the original ER by August 5, 2013.
CAMDEN	COUNTY		
08366	\$9,500,000	Route 130, Camden County, Drainage	Alternative Development in progress, a Core Group Meeting was held May 29, 2013. An officials briefing was held June 21, 2013. Five conceptual solutions to flooding were initially identified through project screening to mitigate flooding problems at Route 130 and Comly Lane: 1.Modify Existing NJDOT Pump Station - Comly Lane Runoff Only 2.Modify Existing NJDOT Pump Station - Comly Lane Runoff 3.New Pump Station - Comly Lane Runoff Only 4. New Pump Station - Comly Lane and Route 130 Runoff 5. Detention Basin.
10341	\$9,800,000	Route 168, Merchant Street to Ferry Avenue, Pavement	Currently waiting for PE proposal from Consultant. CPC approved in Feb '13; CD Graduation in Feb. 2013; presented to CPSC on 2/11/13; Project will not be broken into two parts as previously thought. The project will continue as Pavement Reconstruction. Local Officials Meeting was held In July 2012. Public Information Center was scheduled for October 25, 2012. Next step is PE Agreement with Designer.
11326	\$31,540,000	Route 76/676, Bridge Deck Replacements	A meeting was scheduled with the FHWA on 08/05/2013 to go over the developments of the project. The designer has completed the testing for the additional bridge decks for chlorides. The testing was completed and the results received in June 2013. A request to the CCB will be sent to the Director's office for approval when the new scope for the project is finalized. A new schedule will be developed to reflect the scope changes when approvals from the Change Control Board and the Consultant Selection Committee are received.
11338	\$25,800,000	Route 70, Route 38 to Cropwell Road, Pavement	STIP approval obtained 07/27/2013. DVRPC met at the end of June 2013 to process the STIP request. A TIP amendment is needed and is being processed. Funding request prepared and submitted on 04/29/2013 to Federal Aid for authorization. The ICE and budget has been finalized. The designer's proposal has been negotiated. The project was presented at the 04/10/2013 CPSC meeting and was approved to advance to PE. A PIC was held on 1/22/2013 in Cherry Hill. A local officials meeting was held on 12/19/2012. A Core Group meeting was held on 12/18/2012.
93266	\$10,100,000	Route 30, Blue Anchor Dam	On June 7, 2013, NJDOT sent a funding request to FHWA for a contract mod. with Taylor Wiseman Taylor to move the water quality basin.

CAMDEN	COUNTY (CONT	INUED)	
355A	\$133,900,000	Route 295/42, Missing Moves, Bellmawr	Waiting for funding to advance PE Effort. Received consultant proposal for alignment outside of Landfill. Revised PE required for new alignment.
355B	\$184,600,000	Route 295/42/I-76, Direct Connection, Contract 1	PRE CON: February 20, 2013 CON PIC: February 21, 2013 AWARDED: JANUARY 18, 2013. Notice to Proceed: February 6, 2013
355C	\$215,100,000	Route 295/42/I-76, Direct Connection, Contract 2	Pre-PS&E submitted June 28, 2013. PS&E in August 2013 Supreme Court ruled in NJDOT's favor on 4/26/13.
355D	\$198,000,000	Route 295/42/I-76, Direct Connection, Contract 3	Designer proceeding with features of FD to coordinate contracts. Final design funding approved and modification executed for this work.
355E	\$225,100,000	Route 295/42/I-76, Direct Connection, Contract 4	Final Design funding was authorized and modification executed December 2011. Proceeding with some design elements to coordinated design with other contracts.
355F	\$7,400,000	Route 295/42/I-76, Direct Connection, Camden County, Advanced ITS Contract	Contract Executed: August 20, 2012. Awarded: August 2, 2012 Advertisement: June 14 2012 Bids: July 10, 2012
X227A2	\$30,500,000	Route 168, I-295 Interchange Improvements	The intersection of Rt. 168 and Browning Road is included in the Concept study.
GLOUCE	STER COUNTY		
			Work for this State-sponsored project has been completed using a total of \$16 million State Aid Trust fund dollars. Some of this amount was programmed from FY2010 to FY2018 in the FY2010 and FY2012 TIPs. \$8 million State dollars are currently programmed in the FY2014-2017 TIP. The following phases have been completed (Phase 1) Aura/Richwood Rte. 322 widening relief project - Gloucester
			County used approximately \$6 million to construct roadway improvements of Rte. 322 near Rte. 55 overpass in the Richwood area of Harrison Township.
07369	\$8,000,000	Route 322, Corridor Congestion Relief Project	(Phase 2) Gloucester County used funds to complete the Rte. 322 By-pass in Harrison Twp. from Rte. 45 to CR. 618. The construction of the By-pass was completed in two phases:
			 Phase 1: Approximately \$6 million for purchase of right-of-way, \$2.5 million in construction costs installing a new traffic signal and basin area near CR 618 in Phase 1 for the Rte. 322 By- Pass,
			 Phase 2: \$12 million Phase 2 construction of the bridge and roadway completing the by-pass tie-in with Rte. 45 in 2012.
			These improvements have been extremely successful in alleviating past traffic congestion in the two areas of Rte. 322 since construction was completed.

Major Project Status Report Continued

DB#	FY2012-2015 Total Cost	Project Name	Project Status
GLOUCES	TER COUNTY (C	ONTINUED)	
98344	\$57,930,000	Route 130, Raccoon Creek Bridge Replacement and Pavement Rehabilitation	The funding for Final Design was authorized by FHWA on 9/26/12. The Environmental document (CED) for the project has been approved by FHWA on 8/28/12. Agreement for Structural Design Consultant was negotiated and has been approved by the DAGs Office. In-house Design and Support funding included in FHWAs authorization. Final Design is underway as of Nov. 2012.
D0503	\$13,850,000	Egg Harbor Road, Hurffville- Cross Keys Road to Hurffville- Grenloch Road, CR 630	As of July 19, 2013, NJDOT Local Aid will complete reviewing preliminary submission of the project's PS&E package for construction in FY2013. The county needs to submit an ER.
MERCER (COUNTY		
99362	\$34,550,000	Trenton Amtrak Bridges	A draft concept has been developed to replace the East State Street Bridge. A meeting with Trenton officials is being requested to discuss impact on Firehouse and EMS facilities.
01330A	\$14,170,000	Route 1, Southbound, Nassau Park Boulevard to I-95, Safety Improvements	The Design phase is progressing. Base maps are completed. A traffic circulation study was performed at Mercer Mall. ROW is being established, and property lines are identified. A Public Information Action Plan has been initiated.
L064	\$8,462,000	Route 206, South Broad Street Bridge over Assunpink Creek	A consolidated Alternative Analysis was submitted to SHPO on May 12, 2012 for review and comments. Project is awaiting SHPO's comments. Senior management to make a decision regarding reassignment of South Broad Bridge project to the county since the Department has no jurisdiction over either the bridge or this portion of Route 206 roadway. At the recommendation of the Environmental team, a meeting was held on October 7, 2010, with the City, County, FHWA, SHPO, and the department staff involved with the project. All Alternatives Analyses are to be merged into one for submission to FHWA and SHPO. Preliminary Design Development is near completion. The Environmental Document is still being prepared.

DVRPC FY2014 TIP FOR NEW JERSEY

Appendix A

Board Resolutions

B-FY14-002

RESOLUTION

by the Board of the Delaware Valley Regional Planning Commission

ADOPTION OF THE DVRPC FY2014 TRANSPORTATION IMPROVEMENT PROGRAM (TIP) FOR NEW JERSEY (FY2014-FY2017)

WHEREAS, the Delaware Valley Regional Planning Commission (DVRPC) is the Metropolitan Planning Organization (MPO) responsible for developing and updating the Transportation Improvement Program (TIP) for the nine-county. Philadelphia, Camden, and Trenton metropolitan areas as required by Section 134 of U.S.C. Title 23 and Section 5303 of U.S.C. Title 49; and,

WHEREAS, the Statewide and Metropolitan Planning Regulations (23 CFR Part 450 and 49 CFR Part 613) require that regional transportation plans and programs be developed by MPO's, approved by the Governor, reviewed by the Federal Transit Administration (FTA) and the Federal Highway Administration (FHWA); and,

WHEREAS, DVRPC has certified that the transportation planning process has been conducted in a manner meeting the requirements of all appropriate federal regulations; and,

WHEREAS, the nine county DVRPC planning area has been designated as a nonattainment area for ozone by US EPA; portions of the counties of Burlington, Camden, Mercer, and Philadelphia have been designated as a limited maintenance areas for carbon monoxide (CO); and the nine county planning area is part of two nonattainment areas for fine particulate matter (PM2.5) as required by the Clean Air Act as Amended (CAAA) under respective ozone, CO and PM2.5 National Ambient Air Quality Standards (NAAQS); and,

WHEREAS, MPO transportation plans and programs are required to conform to the purposes of the State Implementation Plan and the Clean Air Act under the Final Conformity Rule promulgated by EPA on November 24, 1993 and amended by guidance issued in July 2004; and,

WHEREAS, the Final Conformity Rule requires that the MPO determine that the transportation plans and programs conform with the CAAA requirements by meeting criteria described in the Final Rule¬, and,

WHEREAS, DVRPC has completed conformity analysis of the TIPs and the Long-Range Plan according to the procedures detailed in the Final Rule under the CAAA in a manner meeting the requirements of all appropriate federal and state regulations pertaining to statewide and metropolitan planning and air quality; and,

WHEREAS, the analysis demonstrates that emissions of ozone precursors, direct PM2.5 and PM2.5 precursors are less in 2015, 2025, 2035, and 2040 than the applicable established budgets for the respective analysis year;

and that emissions estimates of CO are not required for areas with limited maintenance plans, and,

WHEREAS, all other requirements of the Final Rule and all appropriate federal and state regulations have been met; and,

WHEREAS, the projects included in this TIP have been drawn from a long-range plan developed in accordance with this certified planning process and which plan has been found to conform to all applicable state and federal laws and rules pertaining to air quality, and,

WHEREAS, the DVRPC has provided a reasonable opportunity for citizens, transit users, private transportation providers and all interested parties to participate and have their views considered in the development and adoption of this TIP; and,

WHEREAS, this TIP is consistent with and furthers the implementation of the DVRPC's Connections 2040 Long-Range Plan, as well as local, county, regional and state plans and policies; and,

WHEREAS, the projects in this TIP have been fiscally constrained by the member agencies to a funding level which is reasonable for the Greater Philadelphia region to expect to receive; and,

WHEREAS, the projects included in this TIP were selected using a cooperative approach based on reaching consensus of the regional priority for all transportation improvements;

NOW, THEREFORE, BE IT RESOLVED, that the Delaware Valley Regional Planning Commission adopts the FY 2014 Transportation Improvement Program (TIP) for New Jersey (FY2014-FY2017) as the region's official selection of transportation projects for federal funding.

BE IT FURTHER RESOLVED, that the Delaware Valley Regional Planning Commission determines that the FY 2014 Transportation Improvement Program for New Jersey (FY2014-FY2017) conforms to the State Implementation Plan of New Jersey and is consistent with the Final Conformity Rule.

Adopted this 25th day of July 2013 by the Board of the Delaware Valley Regional Planning Commission.

I do hereby certify that the foregoing is a true copy of Resolution No. B-FY14-002.

Renee Wise, Recording Secretary

B-FY14-002

No. B-FY14-001

RESOLUTION

By the Board of the Delaware Valley Regional Planning Commission

ADOPTION OF THE CONFORMITY FINDING OF THE DVRPC CONNECTIONS 2040 LONG-RANGE Plan (LRP) AND THE TRANSPORTATION IMPROVEMENT PROGRAMS (TIPS)

- WHEREAS, the Governors and Legislatures of the Commonwealth of Pennsylvania and the State of New Jersey developed an interstate compact in 1965 establishing the Delaware Valley Regional Planning Commission (DVRPC) and charged it with the responsibility of preparing comprehensive plans for the physical development of the region; and,
- WHEREAS, DVRPC acts as the duly designated Metropolitan Planning Organization (MPO) for the nine-county Philadelphia-Camden-Trenton metropolitan area as required by section 134 of the United States Code (U.S.C.) Title 23 and section 1607 of U.S.C. Title 49; and,
- WHEREAS, the Statewide and Metropolitan Planning Regulations (23 CFR Part 450 and 49 CFR Part 613) require that regional transportation plans and Transportation Improvement Programs be developed and updated by MPO's, approved by the Governor, reviewed by the Federal Transit Administration and the Federal Highway Administration; and,
- WHEREAS, MPO transportation plans and programs are required to conform to the purposes of State Implementation Plans (SIPs) and the Clean Air Act as amended (CAAA) under the Final Conformity Rule ("Final Rule") promulgated by the United States Environmental Protection Agency (US EPA) in November 1993 and amended in July 2004; and,
- WHEREAS, the nine-county DVRPC planning area has been designated as a non-attainment area for ozone by US EPA for the 1997 and 2008 eight-hour ozone standard, portions of the counties of Burlington, Camden, Mercer and Philadelphia have been designated as a maintenance area for carbon monoxide (CO), and the nine-county planning area is part of two nonattainment areas for the annual and 24-hour fine particulate matter (PM_{2.5}) standards as required by CAAA under the respective ozone, CO and PM_{2.5} National Ambient Air Quality Standards (NAAQS); and,
- WHEREAS, there exist SIP motor vehicle emissions budgets (MVEBs) governing ozone precursors, direct PM_{2.5}, and PM_{2.5} precursors for transportation conformity purposes in the nine-county DVRPC planning area; and,

WHEREAS, applicable SIP budget tests are performed for ozone and PM_{2.5} in the areas where there are existing SIP MVEBs; and,

WHEREAS, DVRPC has completed the conformity analysis of the TIPs and the Plan according to the procedures detailed in the Final Rule under the CAAA in a manner meeting the requirements of all appropriate federal and state regulations pertaining to statewide and metropolitan planning and air quality; and,

WHEREAS, the analysis demonstrates that emissions of ozone precursors are less than the established MVEB test for both the 1997 and 2008 ozone standard and below the established MVEB test for PM_{2.5} and PM_{2.5} precursor NO_x in New Jersey and Pennsylvania; and,

WHEREAS, DVRPC has provided a reasonable opportunity for citizens, transit users, private transportation providers, and all interested parties to participate and have their views considered in the development and adoption of this conformity determination;

NOW, THEREFORE, BE IT RESOLVED, that the Delaware Valley Regional Planning Commission determines that the *Connections 2040* Long-range Plan and the DVRPC FY 2013 Transportation Improvement Program for Pennsylvania and FY 2014 Transportation Improvement Program for New Jersey, as amended, conform to the respective State Implementation Plans of Pennsylvania and New Jersey, all applicable National Ambient Air Quality Standards requirements under the Clean Air Act as amended, and that the finding is consistent with the Final Conformity Rule.

Adopted this 25th day of July 2013 by the Board of the Delaware Valley Regional Planning Commission.

I do hereby certify that the foregoing is a true copy of Resolution No. B-FY14-001.

Renee Wise, Recording Secretary

B-FY14-001

RESOLUTION

by the Board of the Delaware Valley Regional Planning Commission

DVRPC SELF CERTIFICATION OF THE TRANSPORTATION PLANNING PROCESS

- WHEREAS, the US DOT Statewide and Metropolitan Planning Regulations (23 CFR Part 450 and 49 CFR part 613) which implement the planning provisions of 23 USC Sec.134 and 49 USC Sec.5303, requires the Metropolitan Planning Organization (MPO) to certify that its transportation planning process is in conformance with all applicable regulations; and
- WHEREAS, the Federal Planning Regulations require that a continuing, cooperative, and comprehensive transportation planning process be carried out by the State and Local officials; and
- WHEREAS, the requirements of Sections 174 and 176(c) and (d) of the Clean Air Act as amended (42 USC Sec 7504 and 7506 (c) and (d)), which require an air quality implementation plan that will bring the Metropolitan Area into conformance with requirements of the Clean Air Act; and require that the MPO not approve any project, program, or plan which does not conform to the aforementioned implementation plan, have been met; and
- WHEREAS, private citizens, affected public agencies, representatives of transportation agency employees, other affected employee representatives, private providers of transportation, and other interested parties were provided with reasonable opportunity to comment on the proposed Transportation Improvement Program, Long Range Plan and planning process; and
- WHEREAS, the TIP has been financially constrained by year as required by Section 450.324(e) of the Planning Regulations; and
- WHEREAS, the provision of 49 CFR part 20 regarding restrictions on influencing certain activities has been met; and
- WHEREAS, the requirements of Title VI of the Civil Rights Act of 1964 and the Title VI assurance executed by each state under 23 USC Sec.324 and under 49 USC Sec.794 have been met and the requirements of Executive Order #12898 (Federal Order to Address Environmental Justice in Minority Populations and Low-Income Populations) are being addressed; and,

B-FY13-002

- WHEREAS, the requirements of 23 CFR and 49 CFR regarding the involvement of disadvantaged or minority business enterprises in FHWA and FTA funded planning projects have been met; and
- WHEREAS, the provisions of the Americans with Disabilities Act (Public Law 101-336, 104 Statute 327, as amended) and US DOT regulations entitled "Transportation for Individuals with Disabilities" (49 CFR, Parts 27, 37 and 38) have been met; and,
- WHEREAS, DVRPC recognizes the federal standards that are in place, but strives to exceed those standards, whenever possible, to ensure the health of the region's citizens and the sustainability of the Delaware Valley.
- NOW, THEREFORE, BE IT RESOLVED, the Delaware Valley Regional Planning Commission, the Metropolitan Planning Organization for the nine county Philadelphia, Camden and Trenton metropolitan areas, certifies that the urban transportation planning process is being carried out in conformance with all applicable Federal requirements and certifies that the local process to enhance the participation of the general public, including the transportation disadvantaged, has been followed in developing all plans and programs.
- **BE IT FURTHER RESOLVED**, that a copy of this resolution be forwarded to the respective Departments of Transportation of Pennsylvania and New Jersey for inclusion with the State certification that the planning process complies with FHWA/FTA joint regulations on Metropolitan Transportation Planning.

I certify that this is a true and correct copy of Resolution No. B-FY13-002.

Renee Wise, Recording Secretary

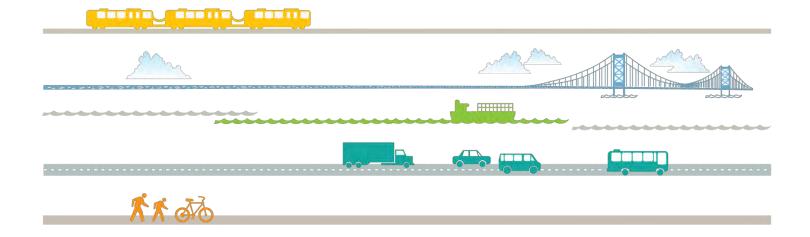

B-FY13-002

DVRPC FY2014 TIP FOR NEW JERSEY

Appendix B

Financial Guidance and STIP Introduction

FY 2014-2023 STATEWIDE TRANSPORTATION IMPROVEMENT PROGRAM INTRODUCTION

a. Overview

This document is the Statewide Transportation Improvement Program for the State of New Jersey for federal fiscal years 2014 (beginning October 1, 2013) through 2023.

The Statewide Transportation Improvement Program (STIP) serves two purposes. First, it presents a comprehensive, one-volume guide to major transportation improvements planned in the State of New Jersey. The STIP is a valuable reference for implementing agencies such as the New Jersey Department of Transportation (NJDOT) and the New Jersey Transit Corporation (NJ TRANSIT), and all those interested in transportation issues in this state. Second, it serves as the reference document required under federal regulations (23 CFR 450.216) for use by the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) in approving the expenditure of federal funds for transportation projects in New Jersey.

Federal legislation requires that each state develop one multimodal STIP for all areas of the state. In New Jersey, the STIP consists of a listing of statewide line items and programs, as well as the regional Transportation Improvement Program (TIP) projects, all of which were developed by the three Metropolitan Planning Organizations (MPOs). The TIPs contain local and state highway projects, statewide line items and programs, as well as public transit and authority sponsored projects.

This STIP conforms to, and in many cases exceeds, the specific requirements of the federal regulations:

- 1. It lists the priority projects programmed for the first 4 years of the planning period. It also includes a priority list of projects to be funded over an additional 6 years.
- 2. It is fiscally constrained for the entire 10 years. A detailed discussion of fiscal constraint issues is found in subsection "i".
- 3. It contains all regionally significant projects regardless of funding source.
- 4. It contains all projects programmed for federal funds.
- 5. It contains, for information, state-funded projects.
- 6. It contains expansive descriptive information.

Finally, the STIP is a 10-year plan that is fiscally constrained based on federal resources remaining flat for NJDOT and NJ TRANSIT. State resources were assumed to remain flat in FY 2014 through 2023. State support consists of the Transportation Trust Fund, as well as Port Authority of New York and New Jersey funding sources.

b. Performance-based Planning and Asset Management

In January 2008, NJDOT implemented an Asset Management policy. This policy is the official, institutional approach to managing infrastructure assets and making capital investment decisions related to these assets. This approach serves to support and complement the 10-year Capital Investment Strategy, the 10-year Statewide Transportation Improvement Program, the annual Transportation Capital Program, and the biennial Study and Development Program.

NJDOT recognizes that there are ever-increasing challenges to funding transportation improvements. Asset Management offers an alternative to focusing solely on problem spots or the worst conditions. NJDOT defines Asset Management as the systematic process of maintaining, upgrading, and operating physical assets cost-effectively.

More recently, performance-based planning and performance management are terms used in relation to the broader use of performance to manage and improve the transportation system. While, asset management focuses on the subset of performance-based planning and performance management related to physical assets, NJDOT has and is continuing to use a performance-based planning approach to make capital investment choices, NJDOT is also continuing to look to take advantage of better data and predictive models to make better investment choices.

c. Public Participation Process

New Jersey is completely covered by three Metropolitan Planning Organizations (MPOs): the Delaware Valley Regional Planning Commission (DVRPC), the South Jersey Transportation Planning Organization (SJTPO), and the North Jersey Transportation Planning Authority Inc. (NJTPA). The STIP incorporates the three MPO Transportation Improvement Programs (TIPs) without modification.

Each MPO has a public participation process for their Transportation Plan, TIP and conformity determination. The state makes copies of the STIP available for each MPO public meeting and representatives from the NJDOT and NJ TRANSIT are present to answer questions and concerns raised by the public on the programs. The public comment period for each MPO TIP and the STIP runs for a period of 30 days.

d. Statewide Transportation Plan

The federal statewide planning rule requires that the STIP contain projects consistent with the statewide long-range transportation plan. New Jersey's statewide plan, <u>*Transportation Choices 2030*</u>, was prepared and made available to the public in October 2008 and submitted to FHWA and FTA in January 2010, following public review and addressing comments.

The NJDOT and NJ TRANSIT collaborated to prepare the Long Range Transportation Plan, <u>*Transportation Choices 2030.*</u> The agencies conducted extensive public outreach and inter-agency coordination along with technical assessments to examine the state's transportation system; describe a vision for the future; identify goals, objectives, strategies and actions; and identify needs and resources. Results of the work have been posted on the <u>www.njchoices.com</u> website so it can be an easily accessible source of information on the development of the Long Range Plan, as well as a way for the public to offer comments on the Long Range Transportation Plan to the NJDOT and NJ TRANSIT.

<u>Transportation Choices 2030</u> provided the foundation for development of the FY 2014-2023 Statewide Capital Investment Strategy (SCIS) that shaped the investment priorities for this STIP. The SCIS functions as an instrument that links the long range transportation plan to the 10-year capital plan (STIP) by connecting broad goals to specific investment choices. Within the context of an asset management approach, the SCIS guides the selection of projects and programs to shrink the backlog of deficiencies and to improve the condition of the transportation system to achieve the best possible performance. Thus, both the SCIS and STIP serve as mechanisms to achieve the vision of the long range transportation plan and therefore the projects and programs in the STIP are consistent with the Long Range Transportation Plan, <u>Transportation Choices 2030</u>.

e. Conformity for MPO Plans and Programs

Each MPO Regional Transportation Plan goes through a conformity analysis to demonstrate that each MPO Plan conforms to the State Implementation Plan (SIP). Each MPO TIP must be consistent with their conforming plan such that the regional emission analysis performed on the plan applies to their TIP. This determination means that the implementation of projects and programs in the MPO TIPs will have a

positive impact in the aggregate on air quality. Since the STIP contains the three MPO TIPs without modification, the implementation of the STIP, in aggregate, conforms to the metropolitan transportation plans and will also have a positive impact on air quality.

f. Congestion Management Process

All projects in this STIP that will result in a significant increase in carrying capacity for single occupant vehicles result from a fully operational Congestion Management Process in place at each MPO.

g. Development of the STIP

This Statewide Transportation Improvement Program is the product of months of staff work and deliberations involving the NJDOT, NJ TRANSIT, county and municipal transportation planners and engineers, other transportation implementing agencies, the public and elected officials at the state, county, and municipal levels. The main decision-making forums for selecting projects for this program were the state's three metropolitan planning organizations:

- The North Jersey Transportation Planning Authority (NJTPA), covering Bergen, Essex, Hudson, Hunterdon, Middlesex, Monmouth, Morris, Ocean, Passaic, Somerset, Sussex, Union, and Warren counties.
- The Delaware Valley Regional Planning Commission (DVRPC), covering Burlington, Camden, Gloucester, and Mercer counties.
- The South Jersey Transportation Planning Organization (SJTPO), covering Atlantic, Cape May, Cumberland, and Salem counties.

The process of building the current STIP began in the fall of 2012, with intensive staff work by NJDOT, NJ TRANSIT, and the MPOs.

All projects that were identified as potential candidates for inclusion in the regional transportation improvement programs of each of the three MPOs were subjected to intensive screening to verify project scope, status, schedule, and cost. The resulting "pool" of projects was analyzed independently by NJDOT, NJ TRANSIT, and the MPOs to assign each project a priority based on the extent to which it would advance identified regional and statewide objectives, such as objectives set forth in the statewide transportation plan, <u>Transportation Choices 2030</u>, and the three MPO Regional Transportation Plans, the Statewide Capital Investment Strategy, air quality objectives, and the broad social and economic goals of the State Development and Redevelopment Plan. NJDOT and NJ TRANSIT developed and circulated revenue projections for planning purposes to each of the MPOs, based on the best current assessment of available state, federal, and other funds. NJDOT, NJ TRANSIT and each of the three MPOs entered into intensive discussions to negotiate a list of deliverable transportation projects that best fit the composite statewide and regional priorities within a financially constrained program. These negotiated project lists were used as the basis for publishing the Fiscal Year 2014 Proposed Transportation Capital Program by NJDOT and NJ TRANSIT in March 2013, and for preparing TIPs for further analysis by each of the MPOs. Projects in the STIP and three MPO TIPs are consistent with the three MPO Regional Transportation Plans.

h. STIP Modifications and Amendments

The STIP may be modified or amended at anytime according to the procedures set forth in the Memorandum of Understanding (MOU) for TIP/STIP changes between the three MPOs, NJ TRANSIT, and the NJDOT. This MOU was fully executed in October 2012. STIP changes, once approved by the MPOs in concert with either NJ TRANSIT or the NJDOT, are forwarded to the FHWA and/or FTA for their approval, when necessary. The modified and amended STIP is available for viewing through the eSTIP system available on the NJDOT website.

i. Financial Plan

Federal law and regulations require that the STIP be fiscally constrained for the first four years. Specifically, "planned federal aid expenditures" cannot exceed "projected revenues." The major sources of funding identified in this document are the FHWA, the FTA, the New Jersey Transportation Trust Fund (TTF) and the Port Authority of New York and New Jersey (PANYNJ). NJDOT and its transportation planning partners (NJ TRANSIT, NJTPA, DVRPC, SJTPO, FHWA, and FTA) have developed an estimate of \$15.3 billion in available state, other and federal revenues to support the state's transportation budget during the four fiscal years from FY 2014 through FY 2017. (For planning purposes, state revenues are estimated on the basis of state fiscal years, which begin on July 1, and federal revenues are estimated on the basis of federal fiscal years of constrained resources into the 10-year STIP. The 10-year total is estimated to be \$34.0 billion. This amount constitutes the funding expected to be available to support the whole FY 2014-FY 2023 STIP. These revenue estimates were developed cooperatively by NJDOT, NJ TRANSIT, and New Jersey's three MPOs, with full consultation with FHWA and FTA, in a meeting on November 9, 2012.

Tables 1 through 5 set out these amounts by year and by funding category and compares them to the actual amounts programmed in the TIPs and STIP. Following are the revenue assumptions used in developing these tables.

- 1. Dollar amounts shown in federal funding categories are based, except as otherwise noted below, on *Moving Ahead for Progress in the 21st Century Act* (MAP-21) federal-aid apportionment tables or equivalent data obtained from the FHWA, FTA, and Federal Aviation Administration (FAA), as appropriate. It should be noted that the apportionment tables are greater than the obligation authority that will ultimately be provided. Obligation authority applies only to FHWA formula funds. Since the passage of SAFETEA-LU, obligation authority has been approximately 8 to 10 percent below appropriated levels.
- 2. The Transportation Trust Fund (TTF) has sufficient funds to fully fund projects in FY 2014-FY 2016. TTF revenues will support a \$1.224 billion program in FY 2014, \$1.225 billion in FY 2015, and \$1.247 in FY 2016.
- 3. Construction cost estimates are escalated to the mid-point of construction to address "year of expenditure dollars." NJDOT uses the American Association of State Highway and Transportation Officials (AASHTO) Trns*port software to prepare detailed and long range cost estimates. The AASHTOWare Project Cost Estimation software includes the ability to use historical pricing information to project costs. This historical pricing includes a programmed general default inflation factor that automatically calculates based on past pricing history. NJDOT employs this feature where possible.
- 4. Funds in the Surface Transportation Program (STP) and Transportation Alternatives Program (TAP) categories are broken down into the allocations and minimums required by federal law.
- 5. "High Priority" funds and "demo" funds are shown only as authorized by federal legislation. These Congressional earmark projects are shown with the fund type "Demo" in the STIP.
- 6. The State will provide \$1.6 billion in FY 2014 and FY 2015 to support the Capital Program. For programming purposes, it is assumed that NJDOT's share of State funds is \$728.5 million of TTF and \$376 million of PANYNJ in FY 2014 and \$729.5 million of TTF and \$375 million of PANYNJ in FY 2015, and NJ TRANSIT's share of the TTF is \$495.5 million in both FY 2014 and FY 2015.
- 7. The following transfers are programmed between NJDOT and NJ TRANSIT:
 - a. In FY 2014-FY 2017 \$50 million of FHWA CMAQ and \$50 million of STP funds and \$1 million of TAP funds is to be transferred annually for use by NJ TRANSIT.
 - b. In FY 2014-FY 2017 \$94 million of FHWA STP suballocated funds is to be flexed annually to NJ TRANSIT in return for \$94 million of TTF for local project support.

- c. In FY 2014-FY 2016 \$32.5 million of FHWA STP is to be flexed annually to NJ TRANSIT in return for \$32.5 million of TTF for use by NJDOT.
- 8. In FY 2006, NJDOT began using a federal innovative financing program (Grant Anticipation Revenue Vehicles, or "GARVEEs") to finance a portion of its high-cost bridge program. NJDOT is facing a critical need to fund a series of bridges, each costing more than \$100 million, over the next several years. Route 52 Contract A was selected for GARVEE funding because of the poor condition of the four bridges, the delay in construction that would be caused by waiting for conventional financing, the cost and annoyance of continual emergency repairs, and the importance of the causeway as an emergency evacuation route. Use of the GARVEE mechanism enabled this important project to be completed without a major impact on the use of federal funding in any one year and without a massive dislocation in the normal share of federal funding available in each of three MPO areas in the state. Although GARVEE funding requires the assumption of some debt over time, well under 10 percent of New Jersey's expected annual federal funding will be encumbered. The financing plan requires debt service payments. However, the cost of debt service was offset by avoidance of the costs of delay: recurring expenditures for maintenance and potential increases in construction costs.
- 9. The Route 278 Goethals Bridge Replacement is a Public-Private Partnership (P3) awarded by the Port Authority of New York & New Jersey to NYNJ Link Partnership that provides for a 40-year design-build-finance-maintain contract to replace the 80 plus year old bridge with a new state-of-the-art cable-stayed bridge.

Because New Jersey is classified as a "non-attainment" area with regard to air quality, certain project funding must meet a federal standard of "available or committed" revenue in FY 2014 and FY 2015 to be considered fiscally constrained. These projects are those which are funded with federal resources and all other "projects of regional significance," regardless of funding source. All federal funds in FY 2014 and FY 2015 are based on the current federal-aid apportionment tables, allocations or equivalent data obtained from FHWA, FTA and the Federal Aviation Administration (FAA), as appropriate and are therefore considered available. All Transportation Trust Fund funding for FY 2014 will be appropriated July 1, 2013. Sufficient funds are available and committed to cover funding of projects and programs in the FY 2014-FY 2015 period. New Jersey's transportation authorities use authority revenues to fund various projects classified as projects of regional significance. These projects are listed in Section VI.

The State of New Jersey has made a significant commitment to public transportation through operating support from the State's general fund. Since the inception of NJ TRANSIT, the state has contributed over \$6.8 billion of operating assistance, almost \$3.0 billion in the last 10 years alone. During this last 10-year period, the state also has chosen to supplement that operating assistance with over \$1 billion of funding allocated to transportation operations from the state's general fund contribution to the Transportation Trust Fund.

With two notable exceptions, federal and state funds are not "allocated" to—that is, required to be spent within the boundaries of—the state's three MPOs. The first exception is STP funds, some of which are required under a formula in federal regulations to be allocated to MPOs. These allocated funds are shown in the following tables as "STP-NJTPA," "STP-DVRPC," "STP-SJTPO," and "TAP." The second exception is Trust Fund state aid funds, which are allocated on a county-by-county basis under a statutory and regulatory formula.

The actual budgeting of federal and state funds for projects within the MPO areas is a product of the development of the three regional transportation improvement programs, the statewide transportation improvement program, and legislative approval of the annual transportation capital program. On a statewide basis, the cost of projects programmed for a particular fiscal year must equal the planned resources for that year. Each project must also be assigned to a funding category that is appropriate for the project and for which adequate funding is available. From year to year there may be significant variations in the amount of funds actually programmed within an MPO area, as needs and specific project

implementation schedules dictate. These programming decisions are made on a cooperative basis with the participation of NJDOT, NJ TRANSIT, local government representatives, and other agencies (all of whom are members of the MPOs), the State Legislature, citizens' groups, and the general public.

For the purpose of defining a project line item estimate in the STIP, each item includes an estimate of independent contractor costs to produce the project, an estimate of implementing agency costs anticipated in support of the development and delivery of the project, and any other payments to third parties in matters of right-of-way and utility relocations. The implementing agency costs include activities such as inspection, testing and equipment along with salary costs.

The current STIP and Capital Program provides funding for NJDOT employee salaries, leave and fringe benefits, overhead, and other administrative costs which benefit the development and delivery of the transportation program. This funding is provided from both Federal-aid and state TTF sources and these funds are allocated for multi-year and previously authorized project costs. Federal-aid in support of NJDOT employee and administrative costs is programmed on an individual project basis, while TTF is programmed as a single item under the heading of Program Implementation Costs, NJDOT. The TTF commitment to NJDOT employee costs and administrative expenses for FY 2014 is budgeted at \$97 million. The Federal-aid commitment to these NJDOT costs and expenses is not disclosed within individual STIP items, but NJDOT estimates the annual commitment of Federal funds to be \$105 million.

Table 6 shows the overall distribution of funds within the STIP by MPO. Tables 7 through 10 provide detailed breakdowns of expenditures by funding category for each of the three MPOs and for statewide programs.

j. Advance Construction Projects

Advance Construction (AC) is a procedure to advance a federally funded project phase into the current fiscal year and implement it with other than federal funds. Use of AC is subject to the availability of other than federal funds (e.g., state funds) in the year in which the project is to be implemented, and the availability of federal funds in the year in which the AC project is to be converted to a regular federal-aid project. AC projects are to be listed individually in the TIP and STIP in both the year that the project is to be implemented and the year in which the conversion is to take place. Appropriate notification will be provided in the TIPs and STIP so it is clearly understood that these "other funds" are available and that future federal funds may be committed to these AC projects. Fiscal constraint must be maintained throughout this process for both the implementing and conversion years. The MPOs and State agree that the project can be converted to federal funding when federal funds become available and the decision is made to convert.

k. Multi-Year Funding

Multi-year funding is an innovative financing technique to program and authorize only that portion of a given project phase necessary to support reimbursement of planned cash outlays for a given year. Remaining portions of the project phase are programmed in subsequent years. In the first fiscal year of funding for a multi-year funded phase of work, the NJDOT will only seek federal authorization for that portion of the federal funds shown in that fiscal year in the STIP. The remaining balance of funds for that particular phase of work will appear in the STIP in the fiscal year the NJDOT intends to request Federal authorization for the remaining funds needed for continuation/completion of the phase/project. Each multi-year federal funded project will be submitted to FHWA with the condition that authorization to proceed is not a commitment or obligation to provide federal funds for that portion of the undertaking not fully funded herein. Fiscal constraint will be maintained at all times throughout this process.

In the event that sufficient federal funding is not available in any fiscal year to complete a multi-year funded phase of work, the NJDOT will take full responsibility to fund that portion of the phase of work in accordance with applicable Federal and New Jersey State law. In the event that State or other funding would not be available to complete a project, the project may be terminated or placed on hold until such time as funding is made available and the NJDOT would need to comply with applicable Federal and New Jersey State law, including, where applicable, providing a revised air quality conformity determination to FHWA/FTA and reimbursing FHWA/FTA for any federal funds expended on the project.

Table 11 shows current fiscal year and future fiscal year funding needed to complete multi-year federally funded highway projects. Table 11 contains NJDOT let construction projects ranging from just over \$10 million to over \$200 million in value. The federal multi-year construction level peaks in FYs 2017-2019 with approximately \$240 million of payments due. Table 12 shows current fiscal year and future fiscal year funding needed to complete multi-year state funded highway projects. The individual project STIP pages contain specific information for these projects such as a detailed project description, project funding source and a total estimated project cost. Table 13 shows current fiscal year and future year funding and the estimated total funding needed to complete federal equipment lease payments for transit projects.

l. Non-Federal Match – Toll Credit

Toll Credits were created in the *Transportation Equity Act for the 21st Century* (TEA-21) and are to be used as a credit toward the non-Federal matching share of programs authorized by Title 23 (except for the emergency relief program) and for transit programs authorized by Chapter 53 of Title 49.

The amount of credit earned is based on revenues generated by the toll authority (i.e., toll receipts, concession sales, right-of-way leases or interest), including borrowed funds (i.e., bonds, loans) supported by this revenue stream, that are used by the toll authority to build, improve or maintain highways, bridges or tunnels that serve interstate commerce. The federal government has allowed the state and local governments to use toll credits to be part of the 20% local matching funds in regard to transit grants. This results from the recognition that different modes of transportation are interconnected. Capital expenditures to reduce congestion in a particular corridor benefit all modes in that corridor, be they automobiles, transit buses, or a rail system.

New Jersey began federal FY 2013 with a balance of \$3,051 million in available toll credits. An additional \$901 million in new credits for federal FY 2013 were earned. New Jersey has been utilizing \$254 to \$275 million in toll credits each year over the past three years; whereas between \$449 and \$901 million in additional toll credits have been earned in each of the past three years.

Toll Credits Availability for Soft Match (\$ in millions)											
	FFY FFY FFY FFY FFY FFY FFY FFY FFY 2016* 2017*										
Toll Credit	Toll Credit										
Starting											
Balance	\$2,037	\$2,232	\$2,528	\$3,051	\$3,677*	\$4,302*	\$4,927*	\$5,552*			
New Toll Credits											
Earned	\$449	\$568	\$797	\$901	\$900*	\$900*	\$900*	\$900*			
Toll Credits Used											
for Soft Match	-\$254	-\$272	-\$275	-\$275*	-\$275*	-\$275*	-\$275*	-\$275*			

Toll Credit								
Ending Balance	\$2,232	\$2,528	\$3,051	\$3,677*	\$4,302*	\$4,927*	\$5,552*	\$6,177*

*Projected amounts for NJDOT and NJ TRANSIT assuming federal apportionments remain flat and requests for new toll credits remain steady.

With the assumption that federal funds apportionments will continue to remain flat and a steady or increasing request for additional credits, there is an expectation for the available balance of toll credits to accrue over the next 10 years. With new credits outpacing usage, New Jersey expects to have sufficient toll credits to continue to utilize soft match of federal funds over the entire 10 year plan.

m. Maintaining the Federal Aid Highway System

The FHWA and the FTA expect states to adequately maintain facilities on the designated federal-aid system. In New Jersey, the federal-aid system includes transportation facilities under the jurisdiction of many agencies including the NJDOT, NJ TRANSIT, counties, certain municipalities and authorities. To date, FHWA/FTA has not specified at what levels the system(s) need to be maintained. Prior to MAP-21, FHWA and FTA left that decision to the state agencies, metropolitan planning organizations and the local decision making process. MAP-21 initiates a process to define asset management standards.

NJDOT inspects all bridges in New Jersey over 20 feet in length every two years. Standards for measuring the condition of bridges have been established nationally and the program carried out by NJDOT provides a very good assessment of the health of all the state's bridges greater than twenty-feet long, regardless of owner. Currently, 90% of NJDOT maintained bridges on the National Highway System (NHS) are structurally acceptable. Under MAP-21 legislation, it is expected that states will be charged with meeting or making progress toward a minimum performance level of 90% sufficiency for bridges on the NHS. Bridges on the NHS include not only NJDOT, but also bridges owned by counties and other jurisdictions. The \$626 million annual average targeted for bridge repair and replacement in the FY 2014-2023 STIP will allow for the maintenance of this level of good repair. It is important to note that a structurally deficient bridge does not equate to an unsafe bridge. If a bridge were deemed unsafe, the State would take immediate action to bring the bridge to a safe condition or close it to traffic.

The other major transportation asset, roads, is not as easily assessed. Like bridges, federal-aid system pavements are under the jurisdiction of many owners. The majority of the roads on the federal-aid system fall under the jurisdiction of the NJDOT, the 21 counties, and the toll authorities. There is no one national standard of measure for the condition of pavement and NJDOT does not currently compile condition levels for federal-aid system facilities under the ownership of other agencies. NJDOT has created a standard of measure that combines a measure of smoothness (International Rideability Index) and a measure of visible surface distress (Surface Distress Index). This standard of measure is not applied to other jurisdictions within the state or across the nation.

NJDOT's combined "acceptability" measure indicates that approximately 59% of the NJDOT-owned pavements (lane-miles) are in acceptable condition. As noted with bridges, unacceptable does not equate to unsafe. It does relate to the useful remaining life of the pavement and the optimal time for preservation and renewal. NJDOT's goal is to bring 80% of its pavement into acceptable condition, but as a minimum, NJDOT wants 60% of NJDOT-owned pavements to meet the acceptable condition. This STIP plans a robust annual average investment of \$294 million per year for pavement improvement on the state highway system. This investment will bring NJDOT-owned pavements close to and possibly exceed the desired 80% acceptability by 2023. It is anticipated that 60% acceptability of NJDOT pavements will be achieved over the next one to two years.

County-owned roads make up a large portion of the federal-aid system; however, there is not comprehensive data on the condition of the county-owned network. Each county is responsible for

managing its own network of roads, which includes facilities both on and off the federal-aid system, and each county may have its own way to measure performance. A similar situation applies to the toll facilities.

To get an adequate picture of the condition of pavement on the federal-aid system, it will be necessary to establish a standard of measure(s) that would be used across all jurisdictions and initiate an effort to collect data using such a measure. While FHWA has yet to establish MAP-21 performance measurers and targets, NJDOT and its regional planning partners are in consultation with each other in preparation for those measures. FHWA is required by law to adopt performance measures and targets for Interstate and non-Interstate facilities that are on the NHS within 18 months of the July 6, 2012 enactment of MAP-21.

Bridges and pavements make up the largest investments on the federal-aid system, but it is important to recognize that there are other assets that need to be maintained, such as signing, lighting, guiderail and other appurtenances. These assets are in a very good state of repair and NJDOT does not expect them to degrade over the next 10 years. NJDOT makes a concerted effort to address any items in disrepair as quickly as possible.

n. Maintaining the Transit System

The FTA oversees NJ TRANSIT's system with respect to state of good repair. In 2009, FTA conducted a thorough review of NJ TRANSIT's state of good repair efforts as part of FTA's Financial Capacity Assessment of the agency. That effort, for which the FTA engaged consultant support, included both a review of NJ TRANSIT's current infrastructure condition as well as the agency's 20 year capital program. The review concluded that NJ TRANSIT's infrastructure and rolling stock is generally in a state of good repair.

o. How to use this document

The individual descriptions, found in Sections II through V, provide detailed information for each project or program in the 10-year plan. The top portion of each project lists the project/program name (route and section) as well as the location. The Project ID reference number is assigned at project inception and remains with that project until its completion. These are the same reference numbers used by the MPOs in their TIPs. Other information contained within the description includes county, municipality, Metropolitan Planning Organization (MPO) jurisdiction, mileposts (for state highway projects), structure number (for bridge projects), project sponsor, a detailed description of the project, asset management category, air quality code used for the conformity determination, and financial plan requirement. An explanation of the asset management categories and air quality codes can be found in the Glossary, located in Section VIII of this document. The anticipated funding schedule for each project/program is displayed in the columns at the bottom of each project page. The phases of work and types of funds are further defined in the Glossary.

Appendix C

Executive Summary of the Documentation of the Conformity Finding

Executive Summary

Overview

Transportation conformity is the process by which Metropolitan Planning Organizations (MPOs) or departments of transportation (DOTs) demonstrate that transportation projects included in a region's Long-Range Plan (Plan) or Transportation Improvement Programs (TIPs) do not cause new air quality violations, worsen existing violations, or delay timely attainment of the National Ambient Air Quality Standards (NAAQS). Transportation conformity is a requirement of the Clean Air Act (CAA) in areas that do not meet the NAAQS or have previously been in violation of the NAAQS. Areas currently not meeting the NAAQS are known as nonattainment areas. Once a previously nonattaining area meets the NAAQS and submits plans to demonstrate how the area will continue to meet federal air quality standards, the United States Environmental Protection Agency (US EPA) can re-designate that area as either an attainment area or a maintenance area. The transportation conformity requirements are still applicable for up to 20 years after a nonattainment area is re-designated to ensure that the region continues to meet the NAAQS.

A transportation conformity demonstration is required at least once every four years or when an MPO: (1) adopts a new Plan or TIP; or (2) amends, adds, or deletes a regionally significant, nonexempt project to a Plan or TIP. This conformity demonstration is required due to the new *Connections 2040* Long-Range Plan, addition of regionally significant and nonexempt projects being amended to the Fiscal Year (FY) 2013 Pennsylvania TIP and a new FY 2014 New Jersey TIP. This transportation conformity demonstration shows that the region's TIPs and *Connections 2040* Long-Range Plan are following or "conforming to" the respective State Implementation Plans (SIPs) to meet the NAAQS.

The Delaware Valley Regional Planning Commission (DVRPC) region is in nonattainment for two of the NAAQS (ozone and fine particulate matter [PM_{2.5}]).¹ Portions of the region are maintenance areas for a third NAAQS (carbon monoxide [CO]).

Since ozone is not directly emitted but is formed by the combination of volatile organic compounds (VOCs) and nitrogen oxides (NOx) in the presence of sunlight, conformity is demonstrated by analysis of the component pollutants. PM_{2.5} is directly emitted, and precursor pollutants—in this case NOx—are also analyzed to demonstrate transportation conformity.

¹ The US EPA has published "Clean Data Determinations" in the *Federal Register* for the DVRPC Region for the 1997 Eight-Hour Ozone Standard and the 1997 Annual PM_{2.5} Standard and has proposed a Clean Data Determination for the 2008 24-Hour PM_{2.5} Standard. The region will remain designated as nonattainment areas until the states submit, and the US EPA approves, plans to re-designate the region as either attainment or maintenance areas for each of these pollutants.

This Executive Summary highlights DVRPC's conformity demonstration for:

VOCs and NOx meeting the 1997 and 2008 Eight-Hour Ozone NAAQS requirements in:

the DVRPC portion of the Philadelphia–Wilmington–Atlantic City Ozone Nonattainment Area.

Direct PM_{2.5} and Precursor NOx meeting the PM_{2.5} NAAQS requirements in:

- the DVRPC portion of the Philadelphia–Wilmington, Pennsylvania–New Jersey–Delaware (PA–NJ–DE) Annual PM_{2.5} Nonattainment Area;
- the DVRPC portion of the Philadelphia–Wilmington, PA–NJ–DE 24-Hour PM_{2.5} Nonattainment Area;
- the DVRPC portion of the New York–Northern New Jersey–Long Island, New York–New Jersey–Connecticut (NY–NJ–CT) Annual PM_{2.5} Nonattainment Area; and
- the DVRPC portion of the New York–Northern New Jersey–Long Island, NY–NJ–CT 24-Hour PM_{2.5} Nonattainment Area.

CO meeting the CO NAAQS requirements in:

- the Philadelphia–Camden CO Maintenance Area;
- the City of Burlington in Burlington County, New Jersey CO Maintenance Area; and
- the City of Trenton in Mercer County, New Jersey CO Maintenance Area.

This summary serves as an inclusive document that demonstrates the transportation conformity of the DVRPC Plan and TIPs with all applicable SIPs and NAAQS requirements for the above pollutants within the noted areas. The full conformity determination document is available at www.dvrpc.org.

Analysis Approach

Plan and TIP Projects

There are three categories of projects in the Plan and TIPs:

- REGIONALLY SIGNIFICANT PROJECT: a nonexempt highway or transit project on a facility that, regardless of its length, serves regional needs and is normally included in the regional travel simulation model;
- EXEMPT PROJECT: a project listed in Table 2 or 3 of the Final Conformity Guidance (Final Rule; 40 CFR 93), that primarily enhances safety or aesthetics, maintains mass transit, continues current levels of ridesharing, or builds bicycle and pedestrian facilities; and
- NOT REGIONALLY SIGNIFICANT PROJECT/NONEXEMPT: a highway or transit project on a facility that does not serve regional needs or is not normally included in the regional travel

simulation model and does not fit into an exempt project category in Table 2 or 3 of the Final Rule (40 CFR 93).

Regional Emissions Analysis

Conformity Test

The Final Rule stipulates that the emissions analysis of transportation plans and programs must model all regionally significant, nonexempt projects. Each project has an associated alphanumeric air quality code for the conformity determination and exempt eligibility identification purposes.

For an area with an implemented SIP, the motor vehicle emissions budget (MVEB) prescribed in the SIP sets a regional emissions amount that functions as a threshold against which conformity is tested. This process is commonly known as the "budget" test. The Final Rule stipulates that each SIP is sovereign and that, for a multi-state MPO such as DVRPC, conformity applies separately to individual state portions of its planning area under respective SIPs.

Beginning in March 2013, MPOs and state DOTs are required to use the Motor Vehicle Emissions Simulator (MOVES) emissions model to demonstrate transportation conformity by the US EPA. The MOVES model replaces the MOBILE 6.2 emissions model. This change of model reflects a significant shift from vehicle emission rates based on aggregate driving cycles to an operational mode that accounts for different driving patterns and emission profiles from various vehicle types. The expanded capabilities of the MOVES model result in substantially different results in emissions analysis from the MOBILE 6.2 model, particularly for NO_x and Direct PM_{2.5}.

The DVRPC region has implemented SIP budgets for the 1997 Eight-Hour Ozone Standard in Pennsylvania and New Jersey. The Final Rule requires that for regions with existing MVEBs for a standard of the same pollutant (i.e., 1997 Eight-Hour Ozone and 2008 Eight-Hour Ozone), the approved budget test is required to demonstrate conformity for the new standard. Therefore, DVRPC will utilize the 1997 Eight-Hour Ozone MVEBs in Pennsylvania and New Jersey to demonstrate conformity to the 2008 Eight-Hour Ozone Standard.

On April 30, 2012, the US EPA published guidance for implementing the 2008 Eight-Hour Ozone Standard. In that guidance (77 FR 30160), the US EPA stated that the 1997 Ozone Standard will be revoked for transportation conformity purposes beginning in July 2013. Because of the concurrence of this finding and that revocation, this finding demonstrates transportation conformity to both the 1997 and 2008 Eight-Hour Ozone NAAQS.

In December 2012, the New Jersey Department of Environment Protection (NJ DEP) submitted a Maintenance Plan SIP to demonstrate attainment for both the Annual and 24-Hour $PM_{2.5}$ standards. The Maintenance Plan contained MOVES emissions-model-based MVEBs to replace the MOBILE 6.2-based budgets that had previously been found adequate for conformity purposes. Due to the differing results between the two models for NO_x and PM_{2.5}, these revised budgets are necessary for the region to demonstrate transportation conformity. The MOVES-based MVEBs contained in New Jersey's Maintenance Plan were found adequate for conformity

purposes by the US EPA in May 2013 and the final approval of that finding became effective in July 2013 (78 FR 37717).²

The US EPA published a proposal to approve Pennsylvania's $PM_{2.5}$ Attainment SIP for the Annual $PM_{2.5}$ Standard in August 2012 (77 FR 51930) and also published an adequacy finding of MOVES-based $PM_{2.5}$ MVEBs for the Annual $PM_{2.5}$ Standard in February 2013 (78 FR 11122).

Current conformity guidance states that nonattainment areas with Annual $PM_{2.5}$ SIP budgets must use those budgets to demonstrate conformity for the 24-Hour $PM_{2.5}$ Standard. In practice, this means that the budget test for the Annual $PM_{2.5}$ Standard is a surrogate that demonstrates conformity to the 24-Hour $PM_{2.5}$ Standard. Therefore, DVRPC's Pennsylvania counties will use the Annual $PM_{2.5}$ Standard Budget Test to demonstrate conformity for both $PM_{2.5}$ standards. In New Jersey, the MVEBs are identical for both the Annual and 24-Hour $PM_{2.5}$ Standards in the SIP.

Analysis Years

For this conformity demonstration, the mobile source ozone emissions analysis years for VOCs and NOx, in the Philadelphia–Wilmington–Atlantic City Ozone Nonattainment Area are 2015 (the attainment date for the 2008 Eight-Hour Ozone Standard), 2025 (an interim year selected to keep all analysis years no more than 10 years apart), 2035 (a second interim year selected to keep all analysis years no more than 10 years apart), and 2040 (the horizon year of the DVRPC Plan). VOCs and NOx, which are heat-sensitive ozone precursors, are estimated for a July day. To demonstrate conformity, projected ozone emissions in all analysis years must not exceed the established MVEBs in prior years.

In the New York–Northern New Jersey–Long Island, NY–NJ–CT PM_{2.5}, and Philadelphia– Wilmington, PA–NJ–DE PM_{2.5} Nonattainment Areas, the analysis years are 2015 (a near-term year within the four-year TIP), 2025 (a SIP budget year in New Jersey and interim year selected to keep all analysis years no more than 10 years apart), 2035 (a second interim year selected to keep all analysis years no more than 10 years apart), and 2040 (the horizon year of the DVRPC Plan.

To demonstrate conformity, projected PM_{2.5} emissions in analysis years must not exceed the 2009 (for analysis years before 2025) and 2025 (for analysis years 2025 and later) budgeted emissions in the New Jersey portion of the Philadelphia–Wilmington, PA–NJ–DE PM_{2.5} Nonattainment Area and Mercer County in the New York–Northern New Jersey–Long Island, NY–NJ–CT PM_{2.5} Nonattainment Area; and the 2009 budgeted emissions in the Pennsylvania portion of the Philadelphia–Wilmington, PA–NJ–DE PM_{2.5}

Both New Jersey and Pennsylvania have approved limited maintenance plans for CO, and regional emissions analysis for CO is no longer required to demonstrate conformity.

² An "Adequacy Finding" is an official action of the US EPA that confirms that MVEBs contained in SIPs are adequate for transportation conformity purposes. MVEBs can be found adequate without full approval of the Attainment or Maintenance Plan SIP.

Findings

The DVRPC Plan and the TIPs are found to be in conformity with the current Pennsylvania and New Jersey SIPs under the CAA. The forecasted emissions levels of VOCs, NOx, and PM_{2.5} do not exceed the respective budgets established by the state departments of environmental protection (state DEPs) in accordance with the Final Rule under the current NAAQS governing applicable pollutants.

The transportation conformity analysis meets all applicable conformity criteria, including, but not limited to, the following:

- that the Plan and the TIPs are fiscally constrained [40 CFR 93.108];
- that this determination is based on the latest planning assumptions [40 CFR 93.110];
- that this determination is based on the latest emissions estimation model available [40 CFR 93.111];
- that DVRPC has made the determination according to the applicable consultation procedures [40 CFR 93.112];
- that the Plan and the TIPs do not interfere with the timely implementation of transportation control measures (TCMs) [40 CFR 93.113]; and
- that the Plan and the TIPs are consistent with the MVEBs in the applicable implementation plans [40 CFR 93.118].

Figures 1 through 4 detail the emissions analysis results for transportation projects included in the Plan and TIPs for Pennsylvania and New Jersey. The data for these figures is detailed in Tables 6 through 8, found on pages 34 and 35. These estimates of emissions results confirm that the transportation projects in the Plan and TIPs conform to the respective SIP and Final Rule conformity requirements.

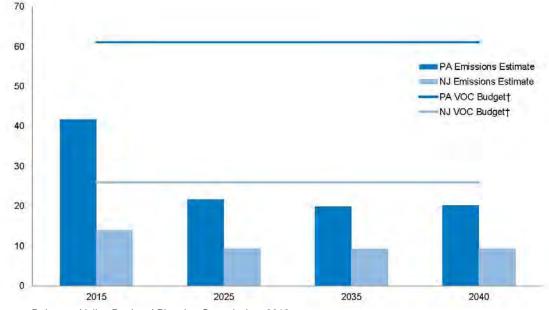

Figure 1. Volatile Organic Compounds Emissions Analysis Results (Tons/July Day)

Note :[†] The most recent Eight-Hour Ozone SIP MVEBs (2008 in Pennsylvania or 2009 in New Jersey) will apply to all future analysis years.

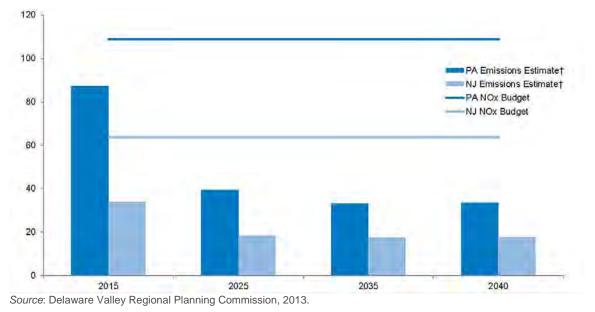

Figure 2. Nitrogen Oxides Emissions Analysis Results (Tons/July Day)

Note :[†] The most recent Eight-Hour Ozone SIP MVEBs (2008 in Pennsylvania or 2009 in New Jersey) will apply to all future analysis years.

Source: Delaware Valley Regional Planning Commission, 2013.

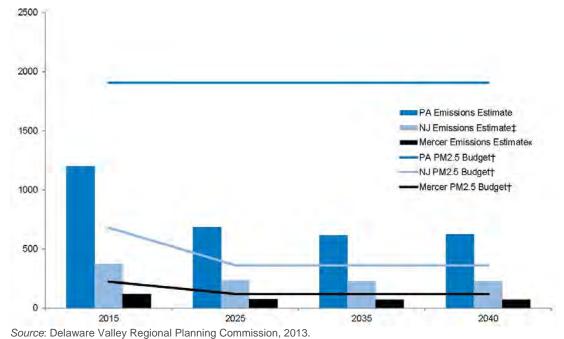

Figure 3. Annual and 24-Hour Direct Fine Particulate Matter Emissions Analysis Results (Tons/Year)

Note:
 † Associated 2009 and 2025 (in New Jersey only) MVEBs apply to all future analysis years.

 ‡ Results are only for Burlington, Camden, and Gloucester counties, which are the New Jersey portion of the Philadelphia–Wilmington, PA–NJ–DE PM_{2.5} Nonattainment Area

 « Results are only for Mercer County, which is the DVRPC New Jersey portion of the New York–Northern New Jersey–Long Island, NY–NJ–CT PM_{2.5} Nonattainment Area.

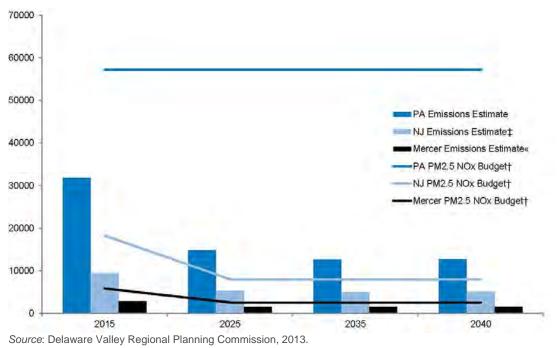

Figure 4. Annual and 24-Hour NOx Precursor Emissions Analysis Results (Tons/Year)

Note: [†] Associated 2009 and 2025 (in New Jersey only) MVEBs apply to all future analysis years.

 Results are only for Burlington, Camden, and Gloucester counties, which are the New Jersey portion of the Philadelphia–Wilmington, PA–NJ–DE PM_{2.5} Nonattainment Area
 Results are only for Mercer County, which is the DVRPC New Jersey portion of the New York–Northern New

Servery Long Island, NY–NJ–CT PM_{2.5} Nonattainment Area.

These findings demonstrate transportation conformity of the FY 2013 Pennsylvania TIP, the FY 2014 New Jersey TIP, and the DVRPC *Connections 2040* Long-Range Plan with the corresponding state SIPs and the Final Rule requirements under CAA, including:

- № the 1997 and 2008 Eight-Hour Ozone NAAQS in the Philadelphia–Wilmington–Atlantic City Ozone Nonattainment Area;
- № the Annual and 24-Hour PM_{2.5} NAAQS in the Philadelphia–Wilmington, PA–NJ–DE PM_{2.5} Nonattainment Area;
- № the Annual and 24-Hour PM_{2.5} NAAQS in the DVRPC portion of the New York–Northern New Jersey–Long Island, NY–NJ–CT PM_{2.5} Nonattainment Area; and
- the Eight-Hour CO NAAQS in the Philadelphia–Camden CO Maintenance Area; in the City of Burlington in Burlington County, New Jersey; and in the City of Trenton in Mercer County, New Jersey.

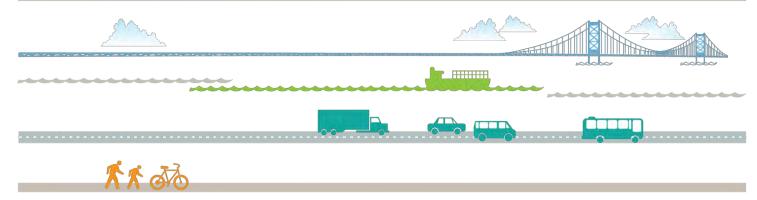

DVRPC FY2014 TIP FOR NEW JERSEY

Appendix D

Memorandum of Understanding on Procedures to Amend and Modify the TIP

MEMORANDUM OF UNDERSTANDING

Statewide Procedures for TIP/STIP Revisions

Among the

Delaware Valley Regional Planning Commission, North Jersey Transportation Planning Authority, South Jersey Transportation Planning Organization, New Jersey Transit Corporation, and New Jersey Department of Transportation

PURPOSE

This Memorandum of Understanding (MOU) establishes a set of procedures to be used for processing and implementing revisions to the Regional Transportation Improvement Program (TIP) of each of the three Metropolitan Planning Organizations (MPOs), as well as the New Jersey Statewide Transportation Improvement Program (STIP). The three MPOs responsible for TIP revisions are the Delaware Valley Regional Planning Commission (DVRPC), the North Jersey Transportation Planning Authority (NJTPA), and the South Jersey Transportation Planning Organization (SJTPO). The two state agencies responsible for STIP revisions are the New Jersey Department of Transportation (NJDOT) and the New Jersey Transit Corporation (NJ TRANSIT).

This MOU represents the parties' entire understanding and agreement with respect to TIP/STIP revisions and supersedes all prior agreements between and among any of the parties with respect to such revisions.

DEFINITIONS

For the purposes of this MOU the following meanings will apply:

<u>Advance Construction</u> – A technique which allows a State to initiate a project using nonfederal funds while preserving eligibility for future federal-aid funds. Eligibility means that the Federal Highway Administration (FHWA) has determined that the project technically qualifies for federal-aid; however, no present or future federal funds are committed to the project. After an Advance Construction project is authorized, the State may convert the project to regular federal-aid funding provided federal funds are made available for the project.

<u>e-STIP¹</u> – A transaction tool to enhance the development and management of the TIP/STIP through Internet-based submission, processing and approval of amendments and modifications to the TIP/STIP. e-STIP reports financial information, tracks and archives amendment and modification actions and promotes interagency collaboration. It supports policy makers in making better informed decisions and promotes electronic Government services.

<u>Fiscal Constraint</u> – A demonstration of sufficient funds (federal, state, local or private) to implement proposed transportation system improvements, as well as to operate and maintain the entire system, through the comparison of revenues and costs.

<u>Flexing Funds</u> – The transfer of federal funds between the federal highway and transit programs (i.e., from Title 23 of the highway program to transit projects and from Title 49 of the transit program to highway projects) pursuant to the provisions of the Intermodal

Memorandum of Understanding - State of New Jersey and the MPOs

¹ Note, for TIP/STIP actions that amend or modify "Unobligated Prior Year Balance", these TIP/STIP actions may advance provided that the affected parties are notified in writing until such time that e-STIP is capable of processing such actions in a manner acceptable to FTA Region 2.

Surface Transportation Efficiency Act of 1991 (ISTEA) and subsequent Transportation Equity Act for the 21st Century (TEA-21).

Interagency Consultation Group (ICG) – A group of stakeholders consisting of state and federal agency representatives empowered to guide the transportation conformity process, review and approve the conformity demonstration's assumptions and methodology, and fulfill the federal requirement for interagency consultation. Included are members from the United States Department of Transportation—including both the FHWA and the Federal Transit Administration (FTA)—the United States Environmental Protection Agency (USEPA), the New Jersey Department of Environmental Protection, the NJDOT, NJ TRANSIT, and an MPO. This group works cooperatively to insure the MPO's conformity demonstrations and processes are following federal guidance and meeting federal requirements.

<u>Memorandum of Understanding (MOU)</u> – An official agreement among the MPOs, the NJDOT, and NJ TRANSIT establishing the principles that will govern how revisions to the TIP/STIP are processed and implemented.

<u>Metropolitan Planning Organization (MPO)</u> – A federally mandated and federally funded transportation policy-making organization that is made up of representatives from local government and governmental transportation authorities. MPOs plan all federally funded transportation investments and serve as a forum for local officials, public transportation providers, and state agency representatives to cooperatively plan to meet a region's current and future needs.

<u>Program Line Item</u> – A commitment of funds to an item identified in the TIP/STIP with a specific scope of work but not a precise geographic location, the effort of which will improve the transportation system.

<u>Project</u> – A commitment of funds to an item identified in the TIP/STIP with a specific scope of work at a precise geographic location, the effort of which will improve the transportation system.

<u>Project Sponsor</u> – The lead agency with primary responsibility for implementing a project, typically the NJDOT or NJ TRANSIT, but may also include an MPO, a county or city government, or an independent authority.

<u>Regional Transportation Plan</u> – A federally mandated long-range transportation plan prepared by an MPO for its region.

<u>Statewide Transportation Improvement Program (STIP)</u> – A staged, multi-year, statewide, intermodal program of transportation projects, consistent with the statewide transportation plan and planning processes as well as metropolitan plans, TIPs, and processes.

Memorandum of Understanding – State of New Jersey and the MPOs

Sub-region – The jurisdictions that comprise an MPO.

<u>Transportation Improvement Program (TIP)</u> – A document prepared by an MPO that lists projects that are drawn from the Regional Transportation Plan and are to be funded with FHWA/FTA funds for a multi-year period, as well as all regionally significant projects regardless of funding source.

<u>Unobligated Prior Year Balance</u> – The portion of the funds authorized by a federal agency that has not been obligated by the grantee and is determined by deducting the cumulative obligations from the cumulative funds authorized.

AGREEMENT

In adopting a TIP, the parties to this MOU (DVRPC, NJTPA, SJTPO, the NJDOT, and NJ TRANSIT) agree to a shared set of capital investments that implement each of the MPO's Regional Transportation Plans. After approval of the TIPs by the MPOs and the Governor of the State of New Jersey or the New Jersey Commissioner of Transportation, if so designated, each of the three TIPs for New Jersey is consolidated without revision into the New Jersey STIP, pursuant to 23 U.S.C. § 135 (Statewide Transportation Planning). The New Jersey STIP is submitted to the FHWA and the FTA for joint approval. The approved STIP serves as the reference document required under federal regulations (23 CFR § 450.216) for use by the FHWA and the FTA in approving the expenditure of federal funds for transportation projects in New Jersey.

The Federal Statewide and Metropolitan Planning regulations contained in 23 CFR Part 450 govern the development of individual MPO TIPs, the STIP, and the process for revisions of these documents. 23 CFR § 450.326 permits the use of expedited procedures to revise the TIP/STIP, as agreed to by the cooperating parties consistent with federal regulations for TIP/STIP development and approval. This MOU shall in its entirety constitute such agreement.

The parties agree to demonstrate Fiscal Constraint for all amendments and modifications to a TIP/STIP pursuant to 23 CFR Part 450 and 49 CFR Part 613 and to identify all projects involved in such revisions on a Fiscal Constraint chart to be developed by each party. The parties agree to provide the information via e-STIP. These confines apply to statewide projects and Program Line Items as well as regional and local projects.

A. AMENDMENTS

The parties agree that a TIP/STIP amendment shall be required under the following circumstances. There are two classes of amendments:

1. Major Amendment

Any TIP/STIP action which affects air quality conformity and would require a new regional conformity determination is a Major Amendment. This type of amendment requires the approval of the FHWA and the FTA. The MPO, in consultation with the ICG as necessary, will determine if the change to or addition of a project would:

- a) Add a new project that is non-exempt from conformity analysis as per the Transportation Conformity Rule (40 CFR §§ 93.126 and 93.127) (unless it is deemed "Not Regionally Significant (NRS)" or can be subject to a project level analysis that would not change the conformity finding);
- b) Change the project scope so that it becomes non-exempt from conformity analysis as per the Transportation Conformity Rule (40 CFR §§ 93.126 and 93.127); or
- c) Change the project completion date such that it would change the conformity analysis year.

If the MPO determines that any of these conditions exists, then the change qualifies as a Major Amendment. If none of these conditions exists then the change qualifies as either a Minor Amendment or Modification.

2. Minor Amendment

Any TIP/STIP amendment which does not affect air quality conformity and does not require a new regional conformity determination may be a Minor Amendment or Modification. A Minor Amendment, like a Major Amendment, requires the approval of the FHWA and the FTA. The parties agree that, provided the TIP/STIP action is not a Major Amendment, it is a Minor Amendment under any of the following circumstances:

- a) When there is an addition of a new project or program into the TIP/STIP that uses federal funds or unobligated prior year balances;
- b) When there is a deletion of a project or program from the TIP/STIP that uses federal funds in its entirety from the TIP/STIP;
- c) When there is an addition of a development phase to a project that results in moving all major phases of work (e.g., Construction and Right-of-Way for the NJDOT) out of the TIP/STIP;

- d) When there is a funding source change for a project in the TIP/STIP from the use of non-federal funds to the use of federal funds;
- e) When there is a swap of FHWA or FTA funds in exchange for a commensurate amount of non-federal funding between the NJDOT and NJ TRANSIT; or
- f) When any phase of work of a project has a cost increase of more than \$15,000,000.

If none of these conditions exist, and the action does not affect conformity, then the change qualifies as a Modification and section B applies.

3. Procedures

Whenever any circumstance requiring a Major or Minor Amendment occurs, the Project Sponsor shall give the MPO (whose TIP the revision affects) sufficient notice (as defined by the MPO) to acquire the necessary technical and policy level approvals. The Project Sponsor shall provide documentation with a clear explanation justifying the amendment. The Project Sponsor shall also provide the necessary project data required for the TIP/STIP listing including the funding source(s), how Fiscal Constraint shall be maintained, and sufficient descriptive information for a conformity and/or congestion management process (CMP) determination, if required.

The MPO, in consultation with the ICG, shall determine if the proposed amendment requires a new TIP/State Implementation Plan (SIP) conformity determination. If the project is exempt under the USEPA Air Quality Conformity Rule (40 CFR Parts 51 and 93), no such determination by the MPO shall be required and this MOU's procedures pertaining to Minor Amendments shall apply. If the project is not exempt, the MPO shall determine through consultation with the ICG whether a new TIP/SIP air quality conformity determination will be required and request that the ICG determine whether a project is NRS. The Project Sponsor shall provide information on the project design and scope to enable the MPO to code the travel networks for the regional emissions analysis. Upon receipt of the project design and scope information, the MPO shall conduct the regional emissions analysis.

For amendments requiring a new MPO conformity determination, the NJDOT shall forward the conformity determination for its projects to the FHWA and the FTA and apply for a joint conformity finding to be made by the FHWA and the FTA after consultation with the USEPA. Following FHWA/FTA approval, the NJDOT will notify the MPO of the approval. NJ TRANSIT shall follow the same procedures for its projects and programs.

Amendments to the TIP/STIP require public review according to their classification as Major or Minor. Major Amendments must have a 30-day public comment period as

delineated by the MPO. Minor Amendments must comply with the MPO public policy document but do not require a 30-day review period.

Following amendment approval by the MPO Board, the MPO shall forward to the NJDOT or NJ TRANSIT via e-STIP a completed package containing the following documents: (a) a document acknowledging Board approval, requesting approval from the FHWA or the FTA for the amendment and providing assurance of all necessary compliance (i.e., adherence to public participation, congestion management, conformity and Fiscal Constraint requirements); (b) the TIP Modification Request Form (which states the type of project change, the action taken and the reason for the action); and (c) the revised TIP/STIP page(s). Upon receipt of this approval package from the MPO the NJDOT shall submit the STIP amendment via e-STIP to the FHWA for review and approval. NJ TRANSIT shall submit the STIP amendment via e-STIP to the FTA for review and approval.

B. MODIFICATIONS

The parties agree that all changes to the TIP/STIP that are not amendments as described above shall be considered modifications (of which there are three classes as defined below).

1. Modifications Not Requiring Further MPO Action Beyond This MOU *(Informational Modifications)*

The parties agree that changes to the TIP/STIP under the following circumstances do not require further MPO action and are referred to as Informational Modifications:

- a) When the cost of a Concept Development or Preliminary Engineering phase of work of a project increases by an amount less than or equal to \$500,000.
- b) When the cost of a Final Design, Right-of-Way, or Utility phase of work of a project increases by an amount less than or equal to \$1,000,000.
- c) When the cost of a Construction phase of work of a project increases by an amount less than or equal to \$5,000,000.
- d) When the cost of a Program Line Item increases by an amount less than or equal to \$5,000,000.
- e) When there is additional cost for incidental right-of-way. Incidental right-of-way is the purchase of real property or a property interest (e.g., an easement) for an amount less than or equal to \$250,000 that shall not involve the taking of residential or business structure(s) or environmentally sensitive property. The parties agree that if a project is listed in an approved TIP/STIP for a Final Design or Construction phase of work and an incidental right-of-way need is discovered

during the Final Design phase, the right-of-way purchase may be authorized and funded as part of the Final Design or Construction phase of work of the project without modifying the TIP/STIP.

- f) When either the NJDOT or NJ TRANSIT deems it appropriate to shift funding between interchangeable federal funding sources, to change the federal or state funding mix of a project and/or to introduce state funds to a project
- g) When the NJDOT and NJ TRANSIT modify and use statewide Program Line Item funds throughout the State. Both agencies shall list these items, broken out by MPO, wherever appropriate. The amount of funds authorized within each program by the MPO(s) shall be included in a written notice submitted to the MPO(s) and in the updated e-STIP report available to the MPO(s).
- h) When the Project Sponsor can apply federal Advance Construction procedures to a project in the TIP/STIP, provided the federal funding is shown for the project in the TIP/STIP.
- i) When correcting technical information (including non-material changes to any text of the TIP/STIP, typographical errors, misspellings, and coding corrections).

2. Modifications That May Be Approved by Administrative Action (*Administrative Modifications*)

The parties agree that, under the following circumstances, changes to the TIP/STIP may be handled by the Executive Director of the MPO as Administrative Modifications. In each case, the Executive Director of the MPO upon consultation with the affected sub-regions may approve the action administratively.

- a) When the cost of a Concept Development or Preliminary Engineering phase of work of a project increases by an amount more than \$500,000 but less than or equal to \$1,000,000.
- b) When the cost of a Final Design, Right-of-Way, or Utility phase of work of a project increases by an amount more than \$1,000,000 but less than or equal to \$4,000,000.
- c) When the cost of a Construction phase of work of a project increases by an amount more than \$5,000,000 but less than or equal to \$7,500,000.
- d) When the cost of a Program Line Item increases by an amount more than \$5,000,000 but less than or equal to \$10,000,000.
- e) When a phase of work of a project is moved among the constrained years of the TIP/STIP.

Memorandum of Understanding – State of New Jersey and the MPOs

- f) When a major phase of work is added to or deleted from the current year of the TIP/STIP and the overall project schedule is not adversely affected (i.e., the Construction phase of work of a project is not delayed).
- g) When the Project Sponsor chooses to apply federal Advance Construction procedures to a project listed in the current year of the TIP/STIP for which federal funding has not been provided in any future year.
- h) When changing a federally funded, NRS project to non-federal funding.
- i) When the project experiences an excessive bid overrun subject to a 30-day acceptance by the NJDOT. An excessive bid overrun occurs when the following conditions are met:
 - 1) When the scope of the project has not expanded from that anticipated in the TIP/STIP;
 - 2) When the final estimated cost in the Plans, Specification and Estimate (PS&E) package agrees with the TIP/STIP programmed amount or is within the threshold permitted for a Construction phase of work by administrative action, as per section B.2.(c); and
 - 3) When the NJDOT has received written concurrence from the FHWA that the bid would otherwise be acceptable.
- j) When federal unobligated prior year balances are added to a federally-funded project or program.
- k) When other modifications, not defined in this sub-section, are identified as an administrative action.
- 1) When the Executive Director of the MPO determines that administrative action is appropriate.

3. Modifications Requiring Committee Action (Committee Modifications)

The parties agree that the following circumstances require action by the MPO at the Committee level. Additionally the Executive Director of the MPO can determine at any time that Board action is necessary.

- a) When the cost of a Concept Development or Preliminary Engineering phase of work of a project increases by more than \$1,000,000.
- b) When the cost of a Final Design, Right-of-Way, or Utility phase of work of a project increases by more than \$4,000,000.
- c) When the cost of a Construction phase of work of a project increases by more than \$7,500,000 but not more than \$15,000,000.

- d) When the cost of a Program Line Item increases by more than \$10,000,000.
- e) When breaking out a new Project from the MPO's Local CMAQ Initiatives Line Item. The act of flexing those CMAQ funds to FTA for breakout Projects from the Local CMAQ Initiatives Line Item and listing them in the transit program does not require processing of an additional Project action.
- f) When the Executive Director of the MPO determines that Committee action is appropriate.

4. Procedures

TIP/STIP modifications shall be processed via e-STIP with a completed package containing the following documents: (a) a document acknowledging Board approval, requesting approval from the FHWA or the FTA for the amendment and providing assurance of all necessary compliance (i.e., adherence to public participation, congestion management, conformity and Fiscal Constraint requirements); (b) the TIP Modification Request Form (which states the type of project change, the action taken and the reason for the action); and (c) the revised TIP/STIP page(s). Upon receipt of this approval package from the MPO the NJDOT shall submit the STIP amendment via e-STIP to the FHWA for concurrence. NJ TRANSIT shall submit the STIP amendment via e-STIP to the FTA for concurrence.

C. FISCAL CONSTRAINT BANK

The federal statewide and metropolitan planning rules (23 CFR Part 450 and 49 CFR Part 613) stipulate that each year of the TIP/STIP must be fiscally constrained to available resources. The parties agree to manage the demonstration of Fiscal Constraint for amendments and modifications through the establishment of a "Fiscal Constraint Bank" for each MPO and NJ TRANSIT, plus four Fiscal Constraint Banks for NJDOT (one for statewide projects and programs and one for each of the three MPO regions). Fiscal Constraint for amendments and modifications may be demonstrated by using available balances in a Fiscal Constraint Bank.

1. Addition of Funds

Funds may be added to a Fiscal Constraint Bank for a given year through any of the following means:

- a) De-obligation of funds from projects that were authorized under prior TIP/STIPs.
- b) Excess funds available from low bids or awards on current projects.
- c) Deletions of projects from the current four-year TIP/STIP.

- d) Modification to the current constrained TIP/STIP which results in a net decrease to the cost of project(s) in a given year.
- e) Modification to the current constrained TIP/STIP which moves a phase of work of a project from that year to another year in the constrained TIP/STIP or to a year beyond the current constrained TIP/STIP period.
- f) Additional appropriations.

In addition, federal obligation authority may be transferred from one Fiscal Constraint Bank to another Fiscal Constraint Bank at the transferring party's discretion and only when such obligation authority is available and necessary for the receiving party's projects.

2. Procedures

The NJDOT shall provide to the MPOs, via e-STIP and other formats as needed to provide sufficient information for MPO purposes, reports listing programmed projects by fund source and MPO region that have not been obligated during the current federal fiscal year. MPO action (as per section A., B.2., or B.3.) may be required for such projects for which it is determined funds will not be obligated in the current federal fiscal year. The unobligated funds may be used for subsequent amendments or modifications to address Fiscal Constraint within the MPO.

The parties agree that in accounting for Fiscal Constraint when making TIP/STIP amendments (as per section A.) or modifications (as per section B.2. or B.3.), the net result for the first fiscal year must be that the Fiscal Constraint Bank has a zero or positive balance and that the net result for the constrained TIP/STIP period must also be a zero or positive balance. This will allow for temporary imbalances in the second, third, and fourth years, but will still maintain the overall Fiscal Constraint of the TIP/STIP.

If there are no outstanding balances in the Fiscal Constraint Bank, the parties shall demonstrate Fiscal Constraint for each amendment and modification. Fiscal Constraint by year shall be demonstrated by the parties through such other amendments and/or modifications as may be necessary.

The parties agree that the NJDOT shall apply these same procedures to the statewide program Fiscal Constraint Bank. NJ TRANSIT shall apply similar procedures to its Fiscal Constraint Bank.

D. PUBLIC PARTICIPATION

The MPO shall follow its adopted public participation procedures for amendments, modifications and conformity determinations to provide the appropriate level of public involvement prior to the MPO Committee or Board taking action. The parties agree that the MPO public participation procedures shall also serve as the public participation procedures for the STIP. The NJDOT shall provide access to public participation by linking to the MPO's website sites via e-STIP. The MPO shall state in notices to the public that comments received on the proposed action to the TIP are comments on the same action to the STIP.

E. PROJECT REPORTING

The NJDOT and NJ TRANSIT agree to provide information on the TIP/STIP and project status to the MPOs. The NJDOT maintains a Project Reporting System (PRS). Project-specific information from the PRS including schedule dates, authorization dates, project costs, and pertinent issues are available to the MPOs on-line. It will be the NJDOT's responsibility to keep the information in the PRS current. It will be the responsibility of the MPOs to reformat the data into reports they deem usable.

The NJDOT Division of Capital Program Management will be the clearinghouse for additional information related to MPO project inquiries. The NJDOT shall respond to all MPO inquiries within seven (7) business days. The NJDOT Office of Community Relations will be the clearinghouse for project inquiries from local elected officials.

NJ TRANSIT is required to submit Progress Reports to the FTA on a quarterly basis. These reports will continue to be shared with the MPOs in a database format. NJ TRANSIT shall respond to all MPO inquiries within seven (7) business days.

The MPOs may request meetings for projects with critical issues at any time. Invited attendees may include local elected officials and staff, MPO staff, NJDOT and/or NJ TRANSIT project management staff, capital programming staff, and NJDOT and/or NJ TRANSIT liaison staff. The purpose of the meetings on key projects is to enhance the information flow on important projects to the community and shall supplement information provided to the MPO in the reporting requirements enumerated above.

The NJDOT and NJ TRANSIT will each produce an Annual Listing of Obligated Projects report within sixty (60) days after the close of the federal fiscal year. The report will contain all federally funded projects that were obligated during the previous federal fiscal year. The NJDOT and NJ TRANSIT reports shall be available in e-STIP. A similar listing for state funded programs and projects will be provided under separate cover.

F. DISPUTE RESOLUTION

Any party with a dispute under this MOU shall promptly notify the involved party or parties in writing. Those parties shall then submit to non-binding informal dispute resolution and meet within fifteen (15) days. The disputing parties shall endeavor in good faith to resolve their differences within thirty (30) days after meeting, or may mutually agree to extend the time for resolution.

We, the undersigned, agree to use the above procedures to amend and modify the Metropolitan Planning Organizations' Transportation Improvement Programs (TIPs) and the New Jersey Statewide Transportation Improvement Program (STIP).

DVRPC Local Program

DVRPC LOCAL PROGRAM

One of the funding sources in the DVRPC TIP is noted as federal STP-STU funds. "STP" stands for Surface Transportation Program and "STU" stands for Surface Transportation Urban, as the "urban allocation" for DVRPC, an MPO region of over 200,000 people. These funds constitute the MPO suballocation of the Surface Transportation Program per federal regulation. These funds are typically used for locally generated projects, not NJDOT State projects, and make up what is commonly referred to as the "DVRPC Local Program". Beginning in FY14, there will be an exchange of program funds between the three New Jersey MPO's (DVRPC, the North Jersey Transportation Planning Authority, and the South Jersey Transportation Planning Organization) and NJ TRANSIT. Close to \$100 million of STP sub-allocated funding (federal funds dedicated for MPO assignment) will be made available annually during federal fiscal years 2014 through 2018 for NJ TRANSIT's use. In return, an equal amount of State Transportation Trust Fund (TTF) funding will be made available for MPO assignment. The Program Exchange for DVRPC in FY14 entails exchanging \$16 million State TTF for an equal portion of DVRPC's STP-STU federal funds for local projects in the TIP.

This exchange will not result in any loss or gain of funds. Some of the historically funded STP-STU federal projects will advance with state rather than federal funds. The State funds provided to DVRPC will not be administered the same way as the existing state funded County and Local Municipal Aid Programs, but will instead more closely resemble our existing federal aid program. Local projects will be evaluated to determine whether they should advance with state or federal funds, and the program exchange funding levels for the DVRPC region in fiscal years FY15, FY16, and FY17 will vary depending on the exact amount of STP sub-allocation, the annual state Transportation Trust Fund (TTF) appropriation, and on the evaluation of which funding type (federal or state) is most appropriate for a given project. Projects in the TIP document which are designated to be funded with state program exchange funds are noted as "State-DVRPC" in project records. A DVRPC Local Program Report has been generated to identify anticipated funding sources for particular projects over the next five years.

A new MOU (Memorandum of Understanding) has also been developed to outline the general parameters of the exchange of program funds among those agencies for implementing capital projects in the NJ Transportation Improvement Programs (TIPs) for all three New Jersey MPO's and the State Transportation Improvement Program (STIP). Anticipated benefits resulting from this exchange of program funds are:

- More flexible schedules for state obligation and ability to "roll over" funds from one fiscal year to the next. This is because TTF funds do not face the same expiration and obligation deadlines as federal funds.
- Federal STP funds are beneficial for NJ TRANSIT's use in its capital program.
- Funding sub-regional projects with TTF funds eliminates the risk of federal inactivity. New Jersey's rate of inactivity is higher than most states.

<u>DRAFT</u>

MEMORANDUM OF UNDERSTANDING AMONG NEW JERSEY TRANSIT CORPORATION. THE NEW JERSEY DEPARTMENT OF TRANSPORTATION. THE NORTH JERSEY TRANSPORTATION PLANNING AUTHORITY. THE DELAWARE VALLEY REGIONAL PLANNING COMMISSION AND THE SOUTH JERSEY TRANSPORTATION PLANNING ORGANIZATION FOR EXCHANGE OF PROGRAM FUNDS FEDERAL FISCAL YEAR 2014 THROUGH 2018

WHEREAS, NJT programs federal and State of New Jersey ("State") funding for use in carrying out its projects and programs; and

WHEREAS, NJDOT programs federal and State funding for use in carrying out its projects and programs; and

WHEREAS, under 23 USC Section 134, NJTPA, DVRPC and SJTPO are metropolitan planning organizations, hereinafter collectively referred to as the "MPOs," established by agreement between the Governor of the State and units of general purpose local government to carry out a continuing, cooperative, and comprehensive multimodal transportation planning process, including the development of a metropolitan transportation plan and a transportation improvement program (TIP), for designated urbanized areas with populations greater than 50,000; and

WHEREAS, NJDOT receives federal funding through the Federal Highway Administration (FHWA) and NJT receives federal funding through the Federal Transit Administration (FTA); and

WHEREAS, FHWA apportions federal funding for various programs and uses; and

WHEREAS, one of the programs by which FHWA apportions federal funding is the Surface Transportation Program (the "FHWA Surface Transportation Program"); and

WHEREAS, a portion of FHWA Surface Transportation Program funds are suballocated by NJDOT to each MPO (which is responsible for a particular urbanized area) to be programmed for regional projects on the federal-aid system; and

WHEREAS, NJT and NJDOT program State Transportation Trust Fund (TTF) funds for capital projects; and

WHEREAS, by federal and State law, NJT, NJDOT, and the MPOs, biennially, establish the federal and State revenue levels that each organization will program for projects and programs in the State's Transportation Capital Program and the Statewide Transportation Improvement Program ("STIP"); and

WHEREAS, from time to time, NJT, NJDOT, and the MPOs may face circumstances that require changes in the mix of federal and State funding that each organization allocates; and

WHEREAS, FHWA permits NJDOT to initiate transfers of FHWA apportionments to FTA for certain purposes; and

WHEREAS, FTA permits NJT to initiate transfers of FTA apportionments to FHWA for certain purposes; and

WHEREAS, NJDOT, NJT, and the MPOs are permitted to make certain funding adjustments within the budget for the State's Transportation Capital Program and within the STIP subject to State and federal laws and regulations; and

WHEREAS, this MOU provides for the general parameters of the exchange of program funds for federal and State fiscal years 2014 through 2018 (the "Five-Year Period") and for the specific exchange of program funds for the first year of the Five-Year Period which is federal and State fiscal year 2014; and

WHEREAS, this MOU may be amended to provide for the specific exchange of program funds for federal and State fiscal years 2015 through 2018 subject to federal and State appropriation; and

WHEREAS, for federal and State Fiscal Year 2014, a total amount of \$94 million of FHWA Surface Transportation Program Funds is scheduled to be sub-allocated to the MPOs;

NOW, THEREFORE, NJT, NJDOT, and the MPOs agree as follows:

A. Preambles

The WHEREAS clauses above are incorporated into this paragraph as though set forth in verbatim.

- B. Programming Exchange in General
 - 1. NJDOT, NJT, and the MPOs agree to exchange program funds, for each of the federal and State fiscal years within the Five-Year Period, in amounts commensurate with the annual federal apportionments made available to each MPO for this program for allocation for each respective federal fiscal year, subject to the conditions set forth in Paragraph B.4 below.
 - 2. NJDOT, NJT and the MPOs agree to enter into amendments to this MOU to set forth for each of the subsequent fiscal years within the Five-Year Period, the specific exchange of program funds, subject to federal and State appropriation;
 - 3. NJDOT, NJT, and the MPOs agree that in order for the exchange of program funds to take place for each federal fiscal year within the Five-Year Period, each MPO, to the extent applicable, annually shall obtain its Board's approval for each federal fiscal year to revise the TIP and STIP for such annual funding amounts as determined and agreed to by all parties participating, from time to time, in the process set forth in this MOU.
 - 4. In order to exchange program funds for any fiscal year within the Five-Year Period, the State's Transportation Capital Program must appropriate the TTF funds for use by the MPOs and the STIP shall also reflect the appropriation. There will be no program exchange for any fiscal year within the Five-Year Period if the TTF funds have not been so appropriated by the State Legislature, and enacted into law, or if such appropriation and enactment shall contain any limitations or restrictions regarding the use of such funds that are inconsistent with the intended use of the funds as set forth in this MOU.
 - 5. An action taken by any individual MPO Board, or failure to take action by any individual MPO Board, shall not affect the funding exchange program contemplated by this MOU for other MPO parties who have complied with the provisions of this MOU.
 - 6. Notwithstanding anything contained in this MOU to the contrary, no MPO shall be required to participate in the funds exchange program in any fiscal year unless and until the MPO Board has approved participation by such MPO in the program for such fiscal year.
- C. Programming Exchange for Fiscal Year 2014
 - 1. In Federal Fiscal Year 2014, NJDOT agrees to direct the transfer of \$94 million of FHWA Surface Transportation Program funds from FHWA to FTA to be allocated by NJT for the program items, Preventive Maintenance Rail and Preventive Maintenance Bus.

- The \$94 million comprises \$70.5 million that would have been allocated by NJTPA, typically identified as STP-NJ funds; \$16 million that would have been allocated by DVRPC, typically identified as STP-STU funds; and \$7.5 million that would have been allocated by SJTPO, typically identified as STP-SJ funds.
- 3. As a result of NJDOT's directive to transfer funds as stated in paragraph C.1 above, NJT's 2014 FTA funds will reflect an increase of \$94 million;
- 4. As a result of such transfer, NJT's TTF appropriations are reduced by \$94 million and NJDOT's TTF appropriations are increased by \$94 million.
- 5. NJDOT will allocate the \$94 million in TTF funds in the Fiscal Year 2014 Transportation Capital Program and in the 2014 program year of the Federal Fiscal Year 2014-2023 STIP for allocation by the MPOs to projects that would be Progress in the 21st Century Act (MAP-21) Sect. 1108 under 23 U.S.C. 133.
- 6. NJDOT will allocate the \$94 million in TTF funds to each MPO as follows: \$70.5 million to NJTPA, \$16 million to DVRPC and \$7.5 million to SJTPO.
- 7. The State Fiscal Year 2014 Transportation Capital Program provides a TTF funded line item for each MPO showing where these funds will be allocated.
- 8. The Federal Fiscal Year 2014-2023 STIP and MPO TIPs identifies the individual projects and funds allocated to each MPO for each year.
- D. Administration of TTF Funds Allocated to the MPOs
 - 1. Each MPO will select projects for the use of these funds, with the understanding that this funding is provided in lieu of the FHWA funds, which were intended for use on the federal-aid system.
 - 2. Each MPO will be responsible for managing programming changes related to additions and deletions of projects, and increases and decreases in costs for these allocated TTF funds.
 - 3. TTF funds allocated to a respective MPO and not obligated in a fiscal year will carry over for use in future years by the same MPO.
 - 4. Each MPO will determine the process and methodology for programming within its respective organization regarding any allocated TTF funds not specifically identified in the State Transportation Capital Program and STIP.
 - 5. By March 1 of each year, each MPO will provide NJDOT with a list of projects it intends to program for obligation in the upcoming State Fiscal Year.
 - 6. Projects carried out under this program will be administered in accordance with

the document entitled, "<u>Guidance for Locally Administered Projects Funded</u> <u>through the NJDOT/MPO Program Funds Exchange</u>," which was prepared in consultation with the MPOs and NJDOT. It is understood that the "<u>Guidance for</u> <u>Locally Administered Projects Funded</u> through the NJDOT/MPO Program Funds <u>Exchange</u>" may be revised from time to time. Such revisions will be made in consultation with NJDOT and the MPOs (NJTPA, DVRPC and SJTPO) prior to adoption.

- NJDOT agrees to prepare monthly financial reports and provide the MPOs with access to such reports for the MPOs to track expenditures and obligations for each TTF funded project selected by each MPO.
- 8. NJDOT will execute a project-specific agreement with each sub-recipient (county or municipality) for each project selected by each MPO.
- 9. Each sub-recipient shall be required to follow the process established by NJDOT and the MPOs for authorization to advertise and award the project as well as for administration, oversight and closure.
- 10. NJDOT will provide payment for each project on a reimbursement basis in accordance with procedures established by NJDOT's Division of Local Aid.
- 11. NJDOT will coordinate with the MPOs to report on account balances and additional obligation needs as a result of project cost increases or decreases.
- 12. Project cost changes will be reviewed and approved by NJDOT in accordance with the terms outlined in the Memorandum of Understanding titled "Statewide Procedures for TIP/STIP Revisions Among the Delaware Valley Planning Commission, North Jersey Transportation Planning Authority, South Jersey Transportation Planning Organization, New Jersey Transit Corporation and New Jersey Department of Transportation," dated October 24, 2012.
- E. General Provisions
 - 1. This MOU represents the parties' entire understanding and agreement with respect to the programming exchange which is the subject of this MOU, and supersedes all prior agreements between and among any of the parties with respect to this exchange.
 - 2. All obligations of the parties pursuant to this MOU are subject to appropriations and the availability of funds. A failure by any party to observe and perform any condition on its part to be performed under this MOU as a result of the failure of the Legislature to appropriate shall not in any manner constitute a breach or default by that party and that party shall not be held liable in any manner whatsoever because of the absence of available funding.

Page 🦯 🐪

- 3. The parties' commissioners, officers, agents, or employees shall not be held personally liable under any provision of this MOU or because of its execution, breach, or alleged breach hereof.
- 4. In the event a dispute or difference arises between the parties regarding the terms of this MOU, the parties shall meet in a good-faith effort to resolve the dispute. Should any party determine that it does not desire to participate in the exchange of funds in accordance with this MOU, such party shall use its best efforts to provide reasonable notice to the other parties of its intent to withdraw as a party to this MOU for the yearly funding cycle for which the notice is provided.
- 5. This MOU shall bind and inure to the benefit of the parties and their respective successors and assignees. No third-party beneficiary rights are created by this MOU.
- 6. This MOU shall be construed under and shall be governed in accordance with the Constitution and the laws of the State of New Jersey.

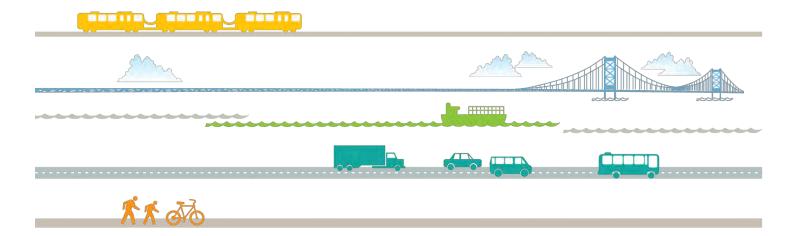

IN WITNESS WHEREOF, NJT has caused this instrument to be signed and attested by its duly authorized representative, NJDOT has caused this instrument to be signed by its Commissioner of Transportation, or a designee of the Commissioner, and attested by the Secretary of NJDOT, the MPOs have caused this instrument to be signed and attested by their duly authorized representatives, and the Seals of NJT and NJDOT to be hereunto affixed the day, month and year first written above.

Appendix F

Summary of Public Outreach, Public Comments, and Agency Responses

DVRPC PUBLIC INVOLVEMENT PROCESS

A critical component of the DVRPC TIP development and adoption process is the Public Involvement Process which is documented in this Appendix. This Appendix includes multiple documents:

- The overview summary of the TIP Public Involvement Process
- The abbreviated summary/index of the public comments that were received during the formal Public Comment Period that was held from May 17, 2013 through June 18, 2013.
- The responses to the public comments, which have been provided by the appropriate agency for whatever project or issue is raised in the public comment. DVRPC compiles the comments and responses that were received during the Public Comment Period and provides this information to the DVRPC Board prior to requesting adoption of the TIP. This process is meant to provide the DVRPC Board with viewpoints and input from the general public on the program, and to assist the Board in determining whether adoption of the TIP is appropriate.
- The table of Recommended Changes to the Draft DVRPC FY2014-2017 TIP for New Jersey is based on comments made during the Public Comment Period. When approved by the Board, these changes are incorporated into the final FY2014-2017 TIP. The DVRPC Board is presented with the Draft Program and the List of Recommended Changes for adoption as the region's official selection of transportation projects;
- Several items of supporting documentation from the Public Involvement Process are: the DVRPC formal public notice on the Public Comment Period; a "Highlights" document of the Draft TIP, which is emailed to a wide distribution list and made available to the public to describe the program, process, and projects in an abbreviated manner; documentation of outreach to Tribal Nations; and proofs of publication of the legal notices for the formal 30-day Public Comment Period in area newspapers as required.

TIP TRANSPORTATION IMPROVEMENT PROGRAM

ødvrpc

Summary of the Public Involvement Process

for the FY2014 Transportation Improvement Program (TIP) for New Jersey

SUMMARY OF THE PUBLIC INVOLVEMENT PROCESS FOR THE FY2014 TRANSPORTATION IMPROVEMENT PROGRAM (TIP) FOR NEW JERSEY

The Delaware Valley Regional Planning Commission (DVRPC) has a long history of public participation in its planning process. We firmly believe in the principles of public participation by reaching out to as many stakeholders and members of the public as possible in an equitable and timely manner. Public participation is the only way to ascertain the interests of a wide variety of residents across the region. The need for public involvement is inherent to sound decision-making. It is the responsibility of each citizen to become involved in regional issues and to play a role in the decision-making process; therefore, DVRPC will strive to provide a variety of opportunities for residents to be informed, participate, and be made aware of the decisions that will affect the future of this region.

DVRPC engages in an extensive public outreach program in order to provide a variety of opportunities to comment and receive information on the TIP. DVRPC encourages the public to pose questions about the TIP to state, county, transit, and DVRPC staff through its ongoing public involvement process, and in particular, during the 30-day public comment period. The public comment period for the DVRPC FY2014 TIP for New Jersey opened on May 17, 2013, and closed on June 18, 2013 at 5:00 p.m. (EST). Notices of the public comment period and the scheduled public meeting were distributed to over 10,500 individuals and organizations that comprised a variety of stakeholders in the region, including: non-profit organizations; traditional transportation and transit users; underserved, minority and low income populations; the private sector; and the general public.

Legal notices were placed in The Inquirer, The Philadelphia Tribune, Al Dia, and The Courier Post, and press advisories were issued to a wide variety of electronic and print media outlets. Draft TIPs were available at DVRPC's Resource Center, and by request; the TIP document was mailed to area libraries for public review; public notices and requests for comment were sent to Tribal organizations; and additional announcements on the TIP and the public comment period were posted on DVRPC's website, www.dvrpc.org, and at @DVRPC on Twitter. A public meeting was held on:

WEDNESDAY, JUNE 12, 2013 4:00 p.m. - 6:00 p.m. Cherry Hill Free Public Library 1100 Kings Highway North Cherry Hill, NJ 08034-1970

Copies of the announcements, media releases, public notices, and public information document follow this summary.

This public comment period also served as an opportunity to comment on the New Jersey Department of Transportation (NJDOT) Statewide Transportation Improvement Program, available online at: http://www.state.nj.us/transportation/capital/cpd/. The public involvement process for the TIP conducted by DVRPC was in cooperation with NJDOT to satisfy the requirements placed by federal legislation and regulation for all Federal Transit Administration and Federal Highway Administration funded projects in the TIP. Public Involvement for the TIP was used to satisfy public involvement requirements for NJDOT's Section 5307 program of projects as well.

DVRPC's website (www.dvrpc.org) is a vital tool in public outreach, and continued to serve a useful purpose during this TIP update cycle. The public notice and the entire TIP document was placed on the DVRPC website, as were the date and location of the public meeting, and other general information. People were able to download and/or access the TIP materials during the public comment period, use the search and mapping tool, and submit their comments through the TIP online commenting feature provided. In addition, an email address was established (tip-plan-comments@dvrpc.org) to facilitate the submission of comments. Comments were also received by U.S. Mail and fax.

Public Comment Guidance

In an effort to facilitate the public comment process, we offered some extended guidance. Listed below are issues that the public was asked to consider during the review of the Draft TIP document.

- Given the projects in the TIP, are we headed in the right direction? Are we meeting the needs of the region? Are we following the intent of MAP-21?
- For example, does the TIP contain the appropriate mix of projects with regard to (a) the amount of investment in highway projects versus the amount in transit projects, or (b) the types of improvements, such as maintenance and reconstruction of the existing system versus new capacity adding projects; or non-traditional projects (like pedestrian, bicycle, smart technology, Transportation Enhancement, and Congestion Mitigation and Air Quality projects) versus the more traditional highway and transit projects?
- Is this region getting its fair share of resources compared to other regions in the state or nation?
- Is the current transportation project development process, including environmental reviews and public input, effective?
- Given financial constraints, are we spending money on the right types of projects?
- Is the TIP document easy to use? How could it be improved?

Of course, comments are not limited to these broader issues of concern. DVRPC, as always, welcomes opinions on specific projects contained in the Draft TIP, the Draft TIP development process, or on any other topic of concern. However, we reminded those intending to recommend new projects for the Draft TIP that in order to earn a place on the Draft TIP, projects must first progress through the screening and planning processes described earlier. As a result, requests for new projects are generally referred to the appropriate agency for further investigation through their respective pre-TIP study efforts. These study efforts may lead to the project winning a place on the TIP in some future year.

County: Various Counties

Project Title: General Comment

Comment:

To whom it may concern:

The below are comments submitted on behalf of the NJ Bike & Walk Coalition (NJBWC) to the 2014 DVRPC TIP and the state's TIP:

Burlington County

DB# 203 Route 130 Crystal Lake Dam.

Route 130 is the likely alignment of the Delaware River Heritage Trail. NJBWC would like to see consideration of installation of bike/ped facility concurrent with the dam repair, if feasible.

DB# 02397 Route 130, Columbus Road/Jones Street

This is one of the most dangerous sections for pedestrians on US 130. NJBWC supports high visibility crosswalks, a pedestrian refuge (at Columbus Rd) and continuous sidewalks. The road has no shoulders and bicyclists ride on this stretch of Route 130 at their own peril.

DB# 9912A South Pemberton Road

NJBWC recommends bike lanes on this road including treatments to guide bicycles through the wider intersection. Since commercial attractions are on all 4 sides of the intersections, sidewalks and crosswalks should be included.

Camden County

DB#99312 Route 130 at the Brooklawn Circle

The Brooklawn Circles are within an urbanized area but they lack crosswalks and continuous sidewalks. Are these features included in the new design?

This circle should be reconfigured as a modified roundabout. All traffic should yield to the traffic within the circle. Similar to the treatment of the Red Lion and 4 Mile Circles on NJ Route 70 in Burlington County.

The circles are also barriers to bicyclists traveling between Camden and Gloucester Counties. Improving bike access between the Broadway Bridge and Creek Road to avoid the circles should be considered.

Gloucester County

#DB D1203 - Gloucester County Multi-Purpose Trail Extension

NJBWC strongly supports this project

Statewide Projects (Capital Program)

DB # 99358 Safe Routes to Schools - NJBWC strongly supports the continued funding of this program and appreciates the allocation of HSIP safety funds to do this.

If further clarification is needed, please feel free to contact me at this email address.

Sincerely,

Cyndi Steiner

DB# X185 Bicycle & Pedestrian Facilities/Accommodations - Since over a quarter of the fatalities in NJ are pedestrians and bicyclists, NJBWC strongly supports greatly increasing the funding of this important program.

DB# X107 Transportation Alternatives Program - We would like to see the state allocate its leftover Transportation Enhancements money included in this program. We believe that technical assistance in managing these projects given directly to townships and municipalities will improve outcomes as well as increase participation in federal competitive funding programs.

DB # 103470 Local Aid Consultant Services - "Funding for consultant services to assist local public agencies in administering projects and providing oversight to recipients receiving Local Aid funds;" this should be expanded to include Transportation Alternative, Transportation Enhancements and local CMAQ programs

General Comments

Bicycle Compatible Roadways -

NJ DOT should reconsider its definition of shoulders as bicycle compatible due to the following factors:

1. The NJ State Supreme Court has ruled that shoulders do not constitute bikeways - "Bicyclists do not have special privileges on a roadway's shoulder. Indeed, a bicycle rider is directed to ride on the furthest right hand side of the roadway, not on the roadway's shoulder. The Motor Vehicle Code does not designate the roadway's shoulder as a bicycle lane."

2. Shoulders do not mitigate conflicts with turning vehicles, Well designed bike lanes include pavement markings that guide bicyclists and motorists through these conflict zones such as intersections and exit ramps.

3. Bikeway design standards have improved since NJ devised its bicycle compatibility roadway matrix.

Complete Streets Policies

Counties, municipalities and MPOs in New Jersey should adopt complete streets policies. Mercer County, Gloucester Twp., Lawrence, Medford, Mantua, West Windsor and Woodbury have already done so.

DVRPC Regional Trails Fund

Only one project on the TIP is a trails project (DB# D1203 – Gloucester County Multi-Purpose Trail Extension). New Jersey has been awarded only 10% of the DVRPC Regional Trail Fund due to the lack of projects.

The TIP should be modified to include replenishment of the Regional Trails Fund. NJBWC recommends allocation based on NJ's population share of the DVRPC Region. The requested amount for NJ and PA is \$10 Million over 3 years.

If there are any questions or clarification is needed on any points, please feel free to contact me.

Thank you for the opportunity to provide input on the 2014 NJ TIP/STIP.

Sincerely,

Cyndi Steiner

Project Title: Route 1, Penns Neck Improvements (CR 571)

DB#: 031

Comment:

West Windsor has committed to development of a "Main Street" neighborhood for this portion of town. Speeds of ~25-30 MPH and safe facilities for biking and walking are priorities to encourage this development. The plan for CR571 as listed in the Draft FY2014 DRVPC TIP is primarily a capacity increase from 2 to 3 lanes, which will increase speeds and decrease bike/ped safety. Additionally, capacity increase on this road is not needed at this time. Please reconsider the plans for CR571 to focus on a "town center" design with bike/ped infrastructre and slower speeds before finalization of the FY2014 TIP.

Comment:

I live within 1/4 mile of that intersection and have for 22 years. I strongly support the position of the WWBPA: that speeds of 25-30 mph and a main street design will not be enhanced by the planned capacity increase. Instead, maintaining the current two lanes and focusing on increased safety for all road users including pedestrians and bicyclists is a better improvement to advance a town center type corridor.

TIP TRANSPORTATION IMPROVEMENT PROGRAM

Item ID# A.19

Name:	Jerry Foster
County:	Mercer
Project Title:	Princeton-Hightstown Road Improvements, CR 571
DB#:	D0701

Comment:

Despite the official description, the design calls for a major capacity increase, from 2 to 3 lanes, that is a step away from a main street design, not toward it. Please see our recommendations, which include supporting increased capacity: http://wwbpa.org/wp-content/uploads/2010/01/WWBPA-Rt-571-Recommendations-Final.pdf

It is worth noting that the township's consulting traffic engineer recently commented at a public meeting that volume has not increased on this stretch of CR571 in the past 10 years, and that a new traffic study is justified.

The primary goal of the WWBPA is to implement a design that supports the desired operating speed of 25-30mph, consistent with the township's Redevelopment Plan goal to create a bicycle and pedestrian friendly main street. The current design's target operating speed is reported to be 45mph, which will create unsafe conditions for all roadway users.

Please remedy the design before implementation.

Project Title: Princeton-Hightstown Road Improvements, CR 571

DB#: D0701

Comment:

I am a frequent pedestrian and bike rider on this street and I do not support the plan as now conceived. I do support the plan as advocated by WWBPA for slower speed and more main street features as detailed below:

TIP TRANSPORTATION IMPROVEMENT PROGRAM

Based on the information below, the WWBPA recommends: 1. Lower desired operating speed to 25-30mph, supported by each roadway design

element, not just a lower posted speed. 2. Curbed medians with appropriate pedestrian refuges. 3. Pedestrian-activated crossing signal that stops traffic at Sherbrooke. 4. Bike lanes per the Township Master Plan. 5. Increased safety at intersections through a variety of design changes, e.g.:

a. pedestrian-only crossing time as part of the signalization of intersections. b. adopt NJDOT-recommended geometry of curb radius and right turn slip

lane islands. c. allow sufficient crossing time to comply with ADA standards. d. provide pedestrian refuges in medians when crossing distance exceeds

60 feet, per NJDOT policy, or keep distance under 60 ft. e. eliminate right-turn-on-red permission at the Wallace/Cranbury and

Clarksville intersections with Rt. 571. 6. Strengthen visual cues leading to and within the main street area, e.g.:

a. reduce the posted speed limit in the transition areas leading to the main street to 35mph.

b. reduce to one through-travel lane before the start of the area. c. provide gateway treatments defining the area boundaries. d. provide street furniture, trees and landscaping.

Do you really like superstorms? Do you really care whether our whole world as well as state get's wiped off the map by our lack of will to engage in meaningful climate management? Well there's plenty more where Sandy came from unless we do something serious FAST to cut down New Jersey's carbon footprint, of which a whopping 50% is caused by transportation.

TIP TRANSPORTATION IMPROVEMENT PROGRAM

Even if climate change induced by transportation options and choices were not a factor, do you seriously think any real talent from New York City or Philadelphia will want to venture to New Jersey on our pathetic roads, especially given that many folks are CHOOSING NOT TO OWN CARS and thus relying on jobs in cities and not in the burbs.

This is already leaving South Jersey in particular as an unemployment quagmire.

We are not talking about millions that are needed here but probably in the neighborhood of billions of dedicated mass transit funding needed to build a serious mass transit infrastructure in this state.

And that includes South Jersey. The thirteen station PATCO light rail line doesn't cut it anymore and has not for a decade. New Jersey Transit Atlantic City line cannot serious serve the livelihood and business usefulness of Cherry Hill or Atlantic City with a single track causing compromised service and lengthy rides.

In summary new thought backed by real dollars needs to be put into mass transit for the whole region to circumvent both an infrastructure and climate crisis.

Comment:

Hello,

It must be noted that West Windsor Plainsboro High School South is located on the intersection of Route 571 and Clarksville Rd. This intersection needs and must be improved for the safety of our students. Route 571 needs to be slowed down from West Windsor Community Park to Wallace Road creating a bike, pedestrian and car friendly safe road. This roadway is not safe for anyone and traffic flow can be improved along with safety. There are so many wonderful traffic calming strategies which can be used instead of increasing lanes. The county needs to implement complete streets with the safety of our children in mind. West Windsor Plainsboro High School South is located on two busy county roads. The county can start protecting our kids by implementing no turn on red at the school's intersection. All government officials and engineers should walk these crosswalks during arrival and dismissal hours of school before implementing any type of redesign. Pedestrian, bike, and vehicle traffic needs to be taken into consideration. Safe roads for all.

TIP TRANSPORTATION IMPROVEMENT PROGRAM

Thank you.

 Project Title:
 SJ BRT/Avandale Park Ride (Bus Livability)

 DB#:
 <u>T630</u>

Comment:

The City of Philadelphia Division of Aviation recognizes the importance of mass transit in fostering connectivity options to bring a higher quality of life to Delaware Valley commuters. Mass transit benefits economic development, reduces highway congestion, improves air quality, and provides better connections between people and places. The Division of Aviation commends New Jersey Transit and the Delaware Valley Regional Planning Commission for working to bring Bus Rapid Transit (BRT) to South Jersey and the City of Philadelphia. In particular, the introduction of "bus-on-shoulders†will allow South Jersey commuters to experience faster, more reliable travel times along the congested Routes 55/42/676 corridor.

TIP TRANSPORTATION IMPROVEMENT PROGRAM

As Philadelphia International Airport (PHL) expands to improve the region's air service, it is committed to fostering the use of mass transit. Today, the Airport offers direct SEPTA Regional Rail service from Center City Philadelphia, three SEPTA bus connections, and shuttle buses that reduce reliance on single-occupancy vehicles. As part of its future ground transportation planning process, the Airport is considering the addition of express bus service to better connect the thousands of employees and passengers who travel regularly between South Jersey and PHL.

To maximize the use of infrastructure being designed and built now along the 55/42/676 corridor and to minimize future traffic disruptions, the Airport requests that NJ Transit and DVRPC consider provisions that will allow BRT to connect to the Walt Whitman Bridge, including bus bypass lanes between Route 42 and the Walt Whitman Bridge and the ability to share resources at proposed BRT park-n-ride stations.

The Airport congratulates NJ Transit and the DVRPC on its planning efforts for BRT in South Jersey. As mass transit and PHL continue to grow and improve, the Division of Aviation hopes to work with its regional partners to provide frequent, highquality mass transit access to its largest commercial airport.

Original Public Comments on the DRAFT DVRPC FY2014-2017 TIP for New Jersey

This section includes comments after the public comment period.

From: Lita Bellocchio [mailto:litabellocchio@yahoo.com] Sent: Saturday, July 06, 2013 10:26 AM To: Snyder, Candy Subject: TIP Comments PLEASE CONFIRM RECEIPT.

Candy,

Please accept this as my comments in regards to the DVRPC meeting for the TIPS program:

The DVRPC has been the designated organization to gather all documents from Transportation Organizations and ensure that the improvement plans will ensure that future of transportation progress while protecting the communities and environment around the expanding transportation needs.

My comment is that the DVRPC is an organization being paid by the States and Federal Governments entities that have a vested interest in ensuring that the needs of these entities are meet regardless of the public and environment they are affecting.

Transportation Funding:

My Comment - The State of NJ Department of Transportation has supplied the DVRPC with their TIP plans and there was only one mention of the environment in the entire report. The Department of Transportation has provided for some of the communities and as everyone of these commissioners are holding a seat on the Board of Directors for the New Jersey Turnpike they have ignore their responsibilities to ensure that the same residents and communities are protected but they are not. The New Jersey Turnpike is mentioned in the TIPS but when asked to address issues for the NJ Turnpike they have turned their backs on the people.

My comment - I believe there should be more Federal Funding for the environment and noise abatement to protect the public that have been abused by the transportation entities that are located near communities that are being affect by this transportation.

My comment - I believe that the public should have more say in where the money is spent to ensure that the public is protected.

My comment - I believe that the public should have more say in the money that is granted to municipalities. This money is suppose to be spread throughout the community to improve the roads but I have not seen that. Mt. Laurel NJ have been applying for road improvement grants for many many years but my street Ramblewood Pkwy has not been paved for over 26 years. The street is all cracked and broken up with pot holes running from Rt 73 to the bottom of Church at the WAWA. The municipality has allowed heavy trucks and tractor trailer to us our road to travel to the local business and our under drain has problem causing them not to repave our road. This road is putting added wear and tear on our vehicles and adds to the high decibel levels already in our area. Last year while crossing the street I feel in one of the pot holes and twisted my ankle. That was the only way that the municipality would come out and fill some of the holes in our are. All the smaller streets around our area have been repaved so while driving around their homes show an upscale area while our street has been neglected and shows a lower grade area which is affecting the value of our homes. The

municipality should be holding public meetings to inform us what their intentions are for using the grant money they receive but that doesn't happen.

My comment - Our area of Ramblewood has been enduring high decibel levels over the state and federal limits for residential area due to the NJ Turnpike at Exit 4. This area has not been maintained for many years and the natural forest that once existed is no longer there. Trees have been dying from the vehicle omission and clearing projects so the same fumes that were killing the trees is now the air that the residents are breathing in everyday. I am hearing that there is grant money to test the area in communities that reside around transportation but there has never been air quality testing done in our area. I feel that part of this grant money provided should be used for our area to ensure that the residents of Ramblewood are being provided for the same as other communities.

My comment - Grant money is provided for repaving roads and feel that our area should be repaved with quiet asphalt. The NJ DOT is suppose to review the plans of the municipalities to ensure that the funding is to be used for the worst road but that is not happening. The New Jersey DOT should also hold meetings in regards to the TIP programs and provide information to inform the public as to where all this grant money actually being used and not just to say roads and bridges. THE PUBLIC SHOULD BE INFORMED AS TO HOW MUCH FUNDING THE STATE AND MUNIPALITIES ARE ACTUALLY RECEIVING AND THE PUBLIC SHOULD BE INFORMED AS TO WHERE THESE ROADS AND BRIDGES ARE LOCATED AND HOW MUCH OF THE FUNDING WILL BE USED TO MAKE THE REPAIRS?

My Comment: Road repair is a normal expense incurred by transportation. Federal Funding should be used for added expense to ensure that the communities around heavily travelled highways should be provided for by erected noise barrier walls. More and more vehicles are travelling the NJ State Road. The NJ Turnpike is a toll road and although it is not owned by the state of NJ is it operated by the commissioners who run NJ Transportation and are the same people who make the decisions on where money is going to be spent. There should be census to ask the public how they think our commissioners are doing with making decisions for our roads. The public should be asked if we agree with where our federal money is going. This is our tax money that is being spent for everything other than the people for are paying their taxes.

My. Comment: The DVRPC receives Federal Funding to ensure that meetings are held to bring officials together to ensure good land use is being followed. They review the TIPS to ensure that good land use now and in the future is being followed. I do not believe the DVRPC is doing the job that our federal and state money is providing for. I live in an area consumed by transportation but by highway, air and municipality solar farm. Representatives from the DVRPC review these projects and in such a case as Mr. Moog retiring and no documents can be found shows the irresponsible actions and process and procedures that are being following by the organization that is suppose to be controlling what transportation is doing. The DVRPC announce on their website that they work with the public but that is a false statement. I have attended two Board of Director meetings and requested many times for a phone call and to date I have received no responses to the information provided at the meetings and have not received a phone call in regards to my request. I believe that the DVRPC is following an agenda to satisfy the transportation entities to receive federal and state funding that that is all.

My Comment: The Environmental Justice Department of the DVRPC is a department that is ran with State and Federal money and as they promote to protect the environment and the public they have done nothing to protect the residents from the environmental hazards that current exist in the Ramblewood Section of Mt. Laurel from the Transportation that has consumed our area..

RECEIVED AFTER PUBLIC COMMENT PERIOD (MAY 17, 2013 to JUNE 18, 2013)

PLEASE CONFIRM RECEIPT OF MY COMMENTS. ALSO PLEASE LET ME KNOW WHEN I CAN VIEW A COPY OF THE FINAL TIPS ALONG WITH MY COMMENTS.

I LOOK FORWARD TO READING MY COMMENTS AND WILL ALSO FOLLOW UP WITH THE US DEPARTMENT OF TRANSPORTATION TO EXPRESS MY CONCERNS TO THE ENTITY THEY HAVE ENTRUSTED WITH OUR MONEY AND RESPONSIBILITY TO ENSURE THAT THE PUBLIC AND ENVIRONMENT ARE BEING ACCOUNTED FOR IN THE FUTURE OF TRANSPORTAION.

TP TRANSPORTATION

Agency Responses to Public Comments on the DRAFT DVRPC FY2014-2017 TIP for New Jersey

This section includes all responses received.

Responses to Agency Comments

Camden

DB#: T630--SJ BRT/Avandale Park Ride

Response to: C.01

Agency Response by NJ TRANSIT:

Thank you for your interest and comments on DB# T630, SJBRT/Avandale Park Ride (Bus Livability) project. As you may be aware, this project is an initial step toward advancing the proposed South Jersey Bus Rapid Transit (SJBRT) system. The long-term vision for the SJBRT system was developed through a 24-month Alternatives Analysis (AA) study that identified Bus Rapid Transit (BRT) as the preferred transit alternative along the Routes 55/42/676 travel corridor to the City of Camden and Center City Philadelphia. Under this AA study, service to Philadelphia International Airport was outside of the study area, was not part of the project purpose & need statement and was therefore not evaluated.

Before service to Philadelphia International Airport could be added to the proposed SJBRT system, it would need to be evaluated to better identify both the potential market and costs. The proposed SJBRT system will provide regional capital investments such as park/rides and shoulder based bus lanes on Route 42. These infrastructure investments might be able to be scaled to support service to Philadelphia International Airport. Other capital costs for rolling stock (buses) and any priority treatments that would uniquely reduce travel time to Philadelphia International Airport would need to identified.

Service patterns to serve Walter Rand Transportation Center in Camden, Center City Philadelphia and the Philadelphia International Airport will be challenging to integrate. Travel time and routing make it difficult to serve all of these locations in single trip. An independent market demand for service from NJ to Philadelphia International Airport needs to be identified. Significant work will need to be undertaken to evaluate travel demand. Airports are special generators for travel demand and need to carefully factored and evaluated.

The advancement of the SJBRT/Avandale Park Ride (Bus Livability) project is the first step toward better regional mobility. Future development and expansion of the service is subject to identified needs and available funding. If ridership demand to Philadelphia International Airport from the SJBRT service area is identified, further funding will be needed to conduct a study of the required capital investments, service needs, benefits and costs.

Responses to General Public Comments

Burlington

DB#: 02309--Route 130, Crystal Lake Dam Response to: A.01, A.02

Agency Response by NJDOT:

The Rt 130 Crystal Lake Dam project is intended purely to bring the dam into conformance with NJDEP Dam Safety standards. There are no roadway improvements intended as part of the project. It calls for overtopping protection, the installation of a new draw down sluice and crack repairs in the existing culvert under Rt 130.

DB#: 02397--Route 130, Columbus Road/Jones Street

Response to: A.03, A.04

Agency Response by NJDOT:

This is a safety improvement which calls for the construction of a two left turn slots on Rt 130. The project is less than a 1/4 mile long. As part of the project all existing sidewalks will be brought into conformance with current ADA standards. It is also my understanding that there are Proposed "Safe Routes to School" sidewalks proposed for the north bound side of Rt 130, to be constructed by another agency.

DB#: 10307--Route 70, East of North Branch Road to CR 539

Response to: A.05

Agency Response by NJDOT:

The purpose of the project is to develop concepts for pavement restoration that will improve pavement conditions within the corridor and recommend a preliminary preferred alternative for advancement. The comment to mark the shoulders as bike lanes will be included in the recommendations of the Concept Development Study and considered in the Preliminary Engineering (PE) Phase.

Burlington

DB#: 11410--Route 72, Route 70 to County Route 532, Pavement

Response to: A.06

Agency Response by NJDOT:

Since Route 72 is classified as a principal rural arterial, it needs an 8' wide shoulder to be bike compatible. The roadway consists of one 12-foot travel lane in each direction with an 8-foot bike compatible shoulder. Therefore it can accommodate bicyclists on the shoulder.

As per "NJDOT Bicycle Compatible Roadways and Bikeways - Planning and Design Guidelines":

"In rural settings, bicycle lanes are not usually necessary to designate preferential use. On higher volume roadways, wide shoulders offer bicyclists a safe and comfortable riding area. On low volume roadways, bicyclists prefer the appearance of a narrow. low speed country road."

DB#: 9212C--Route 206, Monmouth Road/Juliustown Road Intersection Improvements (CR 537) Response to: A.07

Agency Response by NJDOT:

Due to project sensitivity with preserved farmlands surrounding the project, the Department had no choice but to "squeeze" the proposed improvements into the existing right of way. Purchasing preserved farmland is very difficult to do. The enhancements that are to be performed will accommodate ADA and the department will construct a 15 foot wide outside lane in both directions of travel on Route 206 which will enhance a shared use for bicyclists.

The intent of the project is to reduce congestion, reduce right angle accidents and improve operational characteristic of this intersection and the Juliustown Road intersection.

DB#: D9912A--South Pemberton Road, CR 530, Phase 2

Response to: A.08, A.09

Agency Response by Burlington County:

There will be bicycle compatible shoulders on both sides of CR 530 for the entire project length. Stripped crosswalks and ADA improvements will be constructed at all signalized intersections.

Camden

DB#: 99312--Route 130, Brooklawn Circles

Response to: A.10, A.11

Agency Response by NJDOT:

Yes, the new design for the Brooklawn Circle (aka East Circle) will propose continuous sidewalk throughout the entire project and crosswalks for 3 of the 4 circle approaches (Route US 130 NB, Route 47, and Hannevig Avenue). The crosswalk for the Route US 130 SB approach is proposed at the new traffic signal proposed at Route 130 and Old Salem Road. The Western Circle is outside the project limits and subsequently will not be subject to alteration under this project.

The new design for the Brooklawn Circle (aka East Circle) will propose yielding for 3 of the 4 circle approaches (Route US 130 NB, Route 47, and Hannevig Avenue). However, the traffic volumes on the Route US 130 SB approach at the Brooklawn Circle are very high, which will not allow the movement to be yielded to the circle without a level of service failure during peak hours. The new circle design will not provide a bike lane or outside shoulders for designated bicycle use. However, the new design with the implementation of continuous sidewalks and crosswalks will allow the bicyclist to dismount and negotiate the circle crossing as

a pedestrian

Gloucester

DB#: D1203--Gloucester County Multi-Purpose Trail Extension

Response to: A.12, A.13, A.14

Agency Response by Gloucester County:

Gloucester County appreciates the support of our regional planning partners for the Gloucester County Multi-Purpose Trail Extension.

Mercer

Mercer

DB#: 031--Route 1, Penns Neck Improvements (CR 571)

Response to: A.15

Agency Response by DVRPC:

Route 1, Penns Neck Improvements (CR 571) (DB# 031) is on the "Tier 2" Unfunded list. In other words, this project cannot be funded based on current revenue estimates unless there are additional state or federal funds that could allow funding it.

Agency Response by NJDOT:

NJDOT is still in the process of obtaining comments from the public on a conceptual plan. The concept increases the number of lanes on Route 1 but does not include any plan to add lanes to Route 571. Route 571 is a County Route so we cannot comment on any plans the county or township has for the particular route.

Agency Response by Mercer County:

The project number and title does not appear in the Draft 2012 TIP. This comment seems to refer to identical comments from Ms Zeitler on DB#: D0701—Princeton-Hightstown Road Improvements.

DB#: 04316--Route 1 Business, Brunswick Circle to Lake Drive Response to: A.16

Agency Response by Lawrence Township:

Lawrence Township is pleased to respond to Vera Inkiow's support of this project. The improvements proposed along Route 1 Business (Brunswick Circle to Lake Drive) have public and private support in Lawrence Township and will re-develop Business Route 1 into a pedestrian friendly urban streetscape that will promote business development. This project will enhance the mixeduse character of the Brunswick Pike corridor so that it becomes a progressively more viable location for residential, retail, office and institutional uses. In addition, this project will facilitate the development of new mixed-use buildings which will broaden the commercial appeal of the corridor as well as expand the resident population base to support the local shops and services.

Agency Response by NJDOT:

The project will address Lawrence Township's desire to redevelop this stretch of Route 1 Business into a pedestrian-friendly urban streetscape that promotes business development, aims at slowing traffic speeds, and improving pedestrian connectivity. The bike/ped improvements include the following elements that also support traffic calming: reduced-width traveled lanes, parking along the NB shoulder, a wider grassed center median, pedestrian bulb-outs at street corners, and pedestrian crosswalk delineation

DB#: D0701--Princeton-Hightstown Road Improvements, CR 571, Response to A.17

Response to: A.17

Agency Response by Mercer County:

The design for this project was developed by and for West Windsor Township, with a great deal of public input, precisely in anticipation of the Township's 'main street' plan for the area. As previously noted in response to other public comments, the additional lane in this segment of CR 571 is a two-way left turn lane, not a travel lane. The purpose of this lane is to improve access to local businesses by providing safe and separated left turn opportunities. At intersections, the lane will convert to left only, which will improve intersection safety and allow a longer pedestrian crossing time. The project also includes bicycle lanes and continuous sidewalks within County right-of-way, neither of which could be accommodated without some roadway widening. Mercer County has committed to considering a speed reduction in this area once the project is complete.

Mercer

DB#: D0701--Princeton-Hightstown Road Improvements, CR 571, Response to A.19

Response to: A.19

Agency Response by DVRPC:

Please see attached formal response letter dated 7/5/2011 to Mr. Jerry Foster from Mercer County.

Agency Response by Mercer County:

Thank you for the opportunity to respond to comments on the CR 571 project. Jerry Foster, Vice President of the West Windsor Bike-Ped Alliances, references the Alliance's comment on this project (dated 1/5/2011) when it appeared in the draft 2012 TIP. Michael Ruderman has similar concerns and similar recommendations. I have attached the response I made then (7/5/2011) and here merely repeat:

"Significant changes to the design at this point will force the project to be dropped from the TIP and revert back to the alternatives analysis phase. This will delay implementation for years, if not preclude it from ever receiving federal funding."

That said, in contrast to the comments received, the design does now include bicycle lanes, continuous sidewalks, ADA-compliant crossings, and other pedestrian-oriented improvements. The 'major capacity increase, from 2 to 3 lanes' actually refers to an auxiliary two-way center left turn lane that converts to a protected left turn at intersections. This design is intended to improve safe vehicular access to local businesses and increase intersection throughput to accommodate longer pedestrian crossing times required by current standards. Despite the highway's classification as a Principal Arterial, there still will be only one travel lane in each direction.

As Mr. Foster knows, the Hughes administration is attentive to the interests of the cycling and walking public, as evident in the administration's adoption, followed by Freeholder adoption, of a County complete streets policy. But change is slow and resources are tight. We look forward to continuing to work with Mr. Foster on workable, timely ways to improve County highways.

DB#: D0701--Princeton-Hightstown Road Improvements, CR 571, Response to Other

Response to: A.18, A.20, A.21, A.22

Agency Response by Mercer County:

Mercer County Excerpt: The design for this project was developed by and for West Windsor Township, with a great deal of public input, precisely in anticipation of the Township's 'main street' plan for the area. DB#: 10347--Local Aid Consultant Services

Response to: A.23, A.24

Agency Response by DVRPC:

The funds provided in DB #10347 "Local Aid Consultant Services" to assist the NJDOT Local Aid staff in their administration and implementation of projects for Local Public Agencies is a great benefit to regional efforts and does enable NJDOT Local Aid staff more resources to implement Transportation Alternatives, Transportation Enhancements, and CMAQ funded local projects.

Agency Response by NJDOT:

Your comments regarding Local Aid Consultant Services have been received and are hereby acknowledged. Your comments have been passed along to the appropriate NJDOT project manager for consideration.

DB#: 99358--Safe Routes to School Program

Response to: A.25, A.26

Agency Response by DVRPC:

Thank you for your continued support.

Various

DB#: X107--Transportation Alternatives Program

Response to: A.27, A.28

Agency Response by NJDOT:

NJDOT will consider transferring additional funding to this program in any given fiscal year at such time as the original budgeted amount is expended.

DB#: X185--Bicycle & Pedestrian Facilities/Accommodations

Response to: A.29, A.30

Agency Response by NJDOT:

Each year NJDOT reviews prior year activities and requests for additional resources. While NJDOT acknowledges the success of this program, based on our assessment of this program weighted against funding requests for contending programs and projects, the amount budgeted should be maintained.

General TIP Comments: "Shoulder" Definition

Response to: A.31, A.32

Agency Response by NJDOT:

Your comments regarding NJDOT's definition of a "shoulder" have been received and are hereby acknowledged. Your comments have been passed along to the appropriate NJDOT project manager for consideration.

General TIP Comments: Complete Streets Policy

Response to: A.33, A.34

Agency Response by DVRPC:

Thank you for commenting. A common transportation planning adage is that every trip is a pedestrian trip, since even trips by car will begin and end on foot. As a result, pedestrian planning and the consideration of pedestrian needs are integral elements of nearly all of DVRPC's planning activities. DVRPC's role is to encourage context-sensitive pedestrian and bicycle accommodations throughout the region as part of a complete streets policy framework. We support local pedestrian and bicycle planning efforts through data collection, specific planning projects, and the identification of emerging national and international best practices that may be appropriate for our region. As a concept, Complete Streets are also identified in the draft Connections 2040 Long Range Plan for Greater Philadelphia Region as a highlighted strategy under the "Foster a Multimodal Transportation System" goal. DVRPC appreciates and hopes they will continue to partner with individual municipalities, counties, and MPOs (including DVRPC) for the adoption of Complete Streets policy language where appropriate.

Agency Response by Burlington County:

Complete streets policies are not currently being considered in Burlington County.

Agency Response by Gloucester County:

Gloucester County appreciates the comments and while we do not have an adopted Complete Streets Policy, we do our best to implement a completed street as we improve our County-owned roads when pedestrian and bicycle facilities are feasible and safe.

Agency Response by Mercer County:

As the comment states, Mercer County has already adopted a complete streets policy. So too have our municipalities of Lawrence, Princeton, Trenton, and West Windsor.

Various

General TIP Comments: DVRPC Regional Trails Fund

Response to: A.35, A.36

Agency Response by DVRPC:

Thank you for commenting. While there is only one distinct trail project in the DVRPC highway section of the DVRPC Draft FY2014 TIP for NJ, it is important to note that other projects in the DVRPC highway program include bike and pedestrian improvements as components of larger roadway projects. As an example, the Princeton-Hightstown Road Improvement, CR 571 project (DB #D0701, a local Mercer County project) does include bicycle lanes, continuous sidewalks, and ADA compliant crossings as part of the current project design. The Route 130, Brooklawn Circles (DB #99312, a NJDOT state project) design proposes continuous sidewalk and ADA compliant crosswalks at three of the four circle approaches. While separate bike lanes will not be provided, the sidewalks and crosswalks allow bicyclists to dismount and pass through this high traffic area as a pedestrian. Furthermore, many of the projects and programs that directly address bike and pedestrian needs are included in the NJDOT Statewide section of the document and a portion of these projects and programs benefit the DVRPC region. Totaling approximately \$100 million over the next four years (FY2014- 2017), the Transportation Alternatives Program (TAP, formerly Transportation Enhancements (TE)), Safe Routes to Transit, Safe Routes to School, Regional Trails and the Bicycle and Pedestrian Facilities/ Accommodations Program result in projects in our four New Jersey counties that are selected with input from DVRPC. For this reason, a table of TE projects selected in the DVRPC region since 2000 is included in the TIP document in order to highlight and call out a program for which the NJDOT Statewide Program does not provide detail. Seven projects were recently awarded funds through the TE program and these projects will be added to the TE list in the final TIP document. The Stevenson Avenue and East Franklin Avenue Multi-Use Path, is a new \$113,000 Safe Routes to School (SRTS) project in Burlington County. DVRPC will also create a Safe Routes to School table to include in the final TIP document so as to better identify SRTS projects in our region. Trails were/are eligible for a variety of federal transportation funds, but they either were not submitted by local governments for consideration or they were not ranked high enough in competitive programs to be selected. Projects are selected largely by state/county/city representatives who participate on DVRPC's committees or are selected by NJDOT with input from DVRPC. It is important that sponsors or advocates of trail projects work closely with county governments to help build support for desired improvements

General TIP Comments: DVRPC; Commissioners who are also on NJ Turnpike Board of Directors; environment in Draft TIP; federal funding; grant money for Ramblewood residents; public engagement; NJDOT; tracking project funds and project types

Agency Response by DVRPC:

This comment was received after the close of the public comment period.

Various

General TIP Comments: Mass Transit Funding and Transit Service Coverage Response to: A.37

Agency Response by DVRPC:

In response to Mr. Karasek's comment on the need to have dedicated mass transit funding to build transit infrastructure in New Jersey, the level of transit funding is set at the federal and state level, while highway funding is set at the state level via separate formulas. Within the Draft TIP, there is \$843 million out of \$1.7 billion from FY2014-2017 for transit alone, which is on average \$211 million per year that goes directly to NJ TRANSIT and the DRPA/PATCO. This amount does not include other projects in the "Various" counties section that are also NJ TRANSIT or DRPA/PATCO or on the highway program that benefit transit. For example, Camden County Bus Purchase (DB# D0601) in DVRPC's Highway program provides funds for new capital equipment purchases by Camden County's Senior Citizens United Community Services (SCUCS)/Sen-Han Transit and the South Jersey Transportation Authority (SJTA). In addition, almost half of all programmed amounts fund transit (NJ TRANSIT and DRPA/PATCO).

It is worthy to note that governments at all levels and transit agencies are facing severe funding constraints and multiple priorities, in which there is inadequate money to fund the amount of proposed expansion projects let alone maintain and upkeep the existing transit network, along with roads and bridges that are themselves a considerable funding challenge. Furthermore, due to the substantial high construction costs for new rail lines, cities and regions in the nation generally rely on federal New Starts funding for a significant portion of their costs, but new project proposals can shift some rides from existing lines with little new ridership; annual operating subsidies can be extremely high for some projects; and cost recovery can be particularly poor during a line's early years. Still, DVRPC does recognize that issues such as climate change will likely make public transit an increasing priority in the DVRPC region and throughout the nation. DVRPC therefore established its Office of Energy and Climate Change Initiatives in 2008 to respond to the issues you raised in your comments. Please visit the Office's website at www.dvrpc.org/EnergyClimate to about DVRPC's activities in this area. These include, among other activities, the Climate Change Vulnerability and Risk Assessment of Transportation Infrastructure, a joint FHWA-funded project with NJ DOT and DVRPC's counterpart agency in northern New Jersey, the North Jersey Transportation Planning Authority. More information on this assessment is available at:

www.njtpa.org/plan/Element/Climate/FHWAConceptualModel.aspx. DVRPC also continues to strongly support investments in the regional transit network, including system enhancements and network expansions, provided they are consistent with the primary goals established in its adopted Long-Range Plan; provided the existing transit network remains in a state of good repair; and provided the proposed expansion will not place undue financial burdens on local governments or transit agencies. Please see attached formal response letter to Mr. Karasek's comment from the DRPA/PATCO.

Agency Response by DRPA/PATCO:

We received your recent email with Mr. David Karasek's comment on the above subjects. We appreciate the opportunity to provide the following information on PATCO and the Glassboro-Camden Line (GCL) Environmental Impact Statement (EIS) study currently underway.

DRPA is bi-state transportation and development agency that operates four bridges across the Delaware River; the Ben Franklin, Walt Whitman, Commodore Barry and Betsy Ross. In addition, PATCO, a wholly owned subsidiary of the DRPA operates a 14.2mile rail line between Lindenwold, NJ and Center City Philadelphia. DRPA also owns the RiverLink Ferry which is operated by National Ferry Corporation.

DRPA has a long-standing commitment to clean air, clean water and sustainable development. Each capital project conducted at DRPA and PATCO undergoes an environmental review and is designed to the highest environmental standards. We are always looking to identify opportunities to improve our impact on the environment.

Helping us achieve this high level of sensitivity to environmental issues is our in-house Environmental Coordinator, familiar with environmental regulations in New Jersey and Pennsylvania to ensure compliance with regulatory requirements. We also maintain updated response plans and provide training for staff members responsible for responding to environmental incidents that may occur, as an example of the tasks we routinely undertake as part of our commitment toward a clean environment.

DRPA has been investing in environmental friendly technologies and processes since its inception, including the PATCO High Speed Line.

Our PATCO train line began operations in 1969, with the first trips carrying 21,200 people per day. Today, as the cost of a gallon of gasoline in the region continues to rise and hits \$3.40 or more, many more drivers are riding PATCO. Currently, PATCO daily ridership is averaging around 36,500 passengers, getting them to work, school, sporting events, shopping and anywhere else they need to go-quickly, easily and in an environmentally friendly way.

PATCO, as one of the region's primary mass transit providers, helps reduce air pollution and traffic congestion in South Jersey and Philadelphia by removing more than 12,500 cars from the roadways each day. Studies sponsored by the American Public Transportation Association show that public transportation reduces national carbon dioxide emissions by approximately 7 million metric tons annually by getting people out of their cars and into buses and trains for work and recreational transportation. For example, a solo commuter switching to existing public transportation in a single day can reduce their CO2 emissions by 20 pounds

Various

General TIP Comments: Mass Transit Funding and Transit Service Coverage

Response to: A.37

or more than 4,800 pounds in a year. By removing over 12,000 cars from the road each day, PATCO helps reduce regional CO2 emissions by approximately 55 million pounds per year. Further expansion of transit in the region will increase these numbers. Mr. Karasek mentioned the need for mass transit expansion in the South Jersey region to 'circumvent both an infrastructure and climate crisis.' Following an extensive feasibility study and alternatives analysis study that included significant public and stakeholder outreach, a locally preferred alternative for mass transit expansion from Camden to Glassboro, NJ, along the Conrail right-of-way, was identified.

The next step in the process is the Environmental Impact Statement (EIS) for which the Federal Transit Administration (FTA) is the federal lead agency and STV Incorporated is the consultant responsible for the preparation of the EIS. NJ TRANSIT is funding the EIS and conceptual engineering phase for the planned Glassboro-Camden Line, and DRPA, working with these partners, is serving as the Project Manager for the EIS. As currently planned, this Light Rail Transit (LRT) project extends along an 18-mile corridor serving 12 communities with 14 proposed passenger stations, using trains that are proposed to operate within a 7 ½ minute frequency during the morning and afternoon peak service periods. This system is projected to carry 18,000 riders by the year 2030. The Glassboro-Camden Line would function as an additional transit choice that provides improved service throughout the region, enhancing links between people and activity centers. A well-planned LRT system maximizes existing transportation assets with minimal adverse impacts to the environment. Operating transit systems tend to mitigate highway congestion, reduce the number of miles traveled and decrease corresponding CO, NO, and VOC emissions. The selected GCL light rail alternative supports state and local planned growth initiatives and will improve the overall quality of life in southern New Jersey. The current EIS phase should be completed by the end of calendar year 2014.

Transit investments provide numerous benefits – both to society and to individual travelers. Getting commuters out of cars and onto trains is perhaps of the best investments in clean air we can make. We will continue to do all we can to enhance the quality of life for commuters and residents of South Jersey and Philadelphia and help the environment in the process.

PATCO, as one of the region's primary mass transit providers, helps reduce air pollution and traffic congestion in South Jersey and Philadelphia by removing more than 12,500 cars from the roadways each day. Studies sponsored by the American Public Transportation Association show that public transportation reduces national carbon dioxide emissions by approximately 7 million metric tons annually by getting people out of their cars and into buses and trains for work and recreational transportation. Agency Response by NJ TRANSIT:

This response is being provided in regard to the comment forwarded by DVRPC, on the draft Fiscal Year 2014 Transportation Improvement Program. The author of the message advocates for increased funding for mass transit infrastructure, particularly in South Jersey. He mentions PATCO and NJ TRANSIT services in South Jersey (it should be noted that PATCO is not an NJ TRANSIT service, but belongs to the Delaware River Port Authority). Here is NJ TRANSIT's response.

NJ TRANSIT aims to provide public transit services which are targeted to meet our customers' needs. To this end, NJ TRANSIT

Various

General TIP Comments: Mass Transit Funding and Transit Service Coverage

Response to: A.37

conducts quarterly customer satisfaction surveys, known as the ScoreCard. It provides a regular measurement of numerous facets of NJ TRANSIT's performance, from customer feedback on transit services and facilities, to on-time and financial performance, which are used to guide the organization. NJ TRANSIT is obligated to be fiscally responsible, and works to use available resources to maximize their benefits to the residents and travelers of New Jersey. We seek out where there is clear market need for services because we cannot afford to provide services which are not adequately utilized.

Beginning a few years ago, NJ TRANSIT participated in a multiagency (including the Delaware River Port Authority, South Jersey Transportation Authority, NJ Turnpike, and NJ Department of Transportation) review of the transportation needs of Southern NJ which resulted in identifying a series of transit initiatives NJ TRANSIT is actively advancing these initiatives aimed at expanding or improving access to public transportation in southern New Jersey:

Pennsauken Transit Center

Construction is proceeding on a new Pennsauken Transit Center – a rail station located at the junction of the River Line and the Atlantic City Rail Line in Pennsauken. Users will be able to access River Line light rail service operating between Trenton and Camden, the Atlantic City Line between Atlantic City and 30th Street station in Philadelphia, as well as connecting local bus service. Plans call for the station to open for service later in the fall of 2013.

South Jersey Bus Rapid Transit (SJBRT)

The SJBRT system is proposed to operate along Routes 55/42/676 from suburban Camden and Gloucester Counties to the Cities of Camden and Philadelphia. The proposed SJBRT system includes three major park/rides, shoulder bus lanes, new stations, realtime bus arrivals information, off-board fare collection, and traffic signal priority technology at key intersections. The next step in advancing the SJBRT is to complete the Federal environmental requirements (per the National Environmental Policy Act, or NEPA). NJ TRANSIT is also actively pursuing Federal discretionary funding to advance the initial phase of the SJBRT system from Avandale Park/Ride in Winslow Township NJ and serving the Cities of Camden and Philadelphia.

Atlantic City Rail Line Operations Study

NJ TRANSIT is now completing an operations analysis for improved service scenarios on the Atlantic City Line. The analysis includes improved service frequencies and running times between Philadelphia and Atlantic City, as well as potential new stations. The study will determine infrastructure requirements for different levels of improved service on the Atlantic City Line. Projects tasks include operations planning, physical feasibility, and environmental screening.

Glassboro-Camden Line

The Delaware River Port Authority / Port Authority Transit Corporation (PATCO), lead agency, and NJ TRANSIT are progressing the Glassboro-Camden Line (GCL) Project in southern New Jersey and continuing with the preparation of an Environmental Impact Statement (EIS). The purpose of this project is to improve transit service along the Glassboro to Camden corridor with a focus on increasing mobility and improving links between the established communities, jobs, and activity centers. An Alternatives Analysis study completed in 2009 recommended Light Rail from Glassboro to Camden as the preferred option for transit expansion in southern New Jersey. The EIS is required by the National Environmental Policy Act for a project to receive federal funding. The EIS process will take approximately 24 months, and is scheduled to be completed late in 2014.

River Line Improvements

Onboard Cameras – The River LINE has just completed a program to install video cameras in the interior of all trains. These interior cameras will allow Light Rail Operations and NJ TRANSIT Police to monitor passenger conditions onboard each light rail train. In this way, NJ TRANSIT can help ensure better service for all of our customers.

Station Platform Safety Improvements – The River Line has completed a major safety improvement. At many stations, railings and fencing have been added or made longer to keep our customers away from the tracks and safely on the platforms and sidewalks. Other improvements include new bi-lingual signs and stenciled warnings at locations where the sidewalks cross the tracks. These improvements will help keep the public safe and on the right path.

Re: David Karasek Comment for the FY2014 Draft TIP on PATCO's capacity to serve riders, planned mass transit expansion in South Jersey and the effects of this service on mitigating climate change.

Dear Ms. Hui,

We received your recent email with Mr. David Karasek's comment on the above subjects. We appreciate the opportunity to provide the following information on PATCO and the Glassboro-Camden Line (GCL) Environmental Impact Statement (EIS) study currently underway.

DRPA is bi-state transportation and development agency that operates four bridges across the Delaware River; the Ben Franklin, Walt Whitman, Commodore Barry and Betsy Ross. In addition, PATCO, a wholly owned subsidiary of the DRPA operates a 14.2-mile rail line between Lindenwold, NJ and Center City Philadelphia. DRPA also owns the RiverLink Ferry which is operated by National Ferry Corporation.

DRPA has a long-standing commitment to clean air, clean water and sustainable development. Each capital project conducted at DRPA and PATCO undergoes an environmental review and is designed to the highest environmental standards. We are always looking to identify opportunities to improve our impact on the environment.

Helping us achieve this high level of sensitivity to environmental issues is our in-house Environmental Coordinator, familiar with environmental regulations in New Jersey and Pennsylvania to ensure compliance with regulatory requirements. We also maintain updated response plans and provide training for staff members responsible for responding to environmental incidents that may occur, as an example of the tasks we routinely undertake as part of our commitment toward a clean environment.

DRPA has been investing in environmental friendly technologies and processes since its inception, including the PATCO High Speed Line.

DRPA is an equal opportunity employer

Mailing Address: PO Box 1949 Camden New Jersey 08101-1949 Tel: 856.968.2444 Fax: 856.968.2458 E-mail: jjmatheussen@drpa.org

Our PATCO train line began operations in 1969, with the first trips carrying 21,200 people per day. Today, as the cost of a gallon of gasoline in the region continues to rise and hits \$3.40 or more, many more drivers are riding PATCO. Currently, PATCO daily ridership is averaging around 36,500 passengers, getting them to work, school, sporting events, shopping and anywhere else they need to go-quickly, easily and in an environmentally friendly way.

PATCO, as one of the region's primary mass transit providers, helps reduce air pollution and traffic congestion in South Jersey and Philadelphia by removing more than 12,500 cars from the roadways each day. Studies sponsored by the American Public Transportation Association show that public transportation reduces national carbon dioxide emissions by approximately 7 million metric tons annually by getting people out of their cars and into buses and trains for work and recreational transportation. For example, a solo commuter switching to existing public transportation in a single day can reduce their CO₂ emissions by 20 pounds or more than 4,800 pounds in a year. By removing over 12,000 cars from the road each day, PATCO helps reduce regional CO₂ emissions by approximately 55 million pounds per year. Further expansion of transit in the region will increase these numbers.

Mr. Karasek mentioned the need for mass transit expansion in the South Jersey region to 'circumvent both an infrastructure and climate crisis.' Following an extensive feasibility study and alternatives analysis study that included significant public and stakeholder outreach, a locally preferred alternative for mass transit expansion from Camden to Glassboro, NJ, along the Conrail right-of-way, was identified.

The next step in the process is the Environmental Impact Statement (EIS) for which the Federal Transit Administration (FTA) is the federal lead agency and STV Incorporated is the consultant responsible for the preparation of the EIS. NJ TRANSIT is funding the EIS and conceptual engineering phase for the planned Glassboro-Camden Line, and DRPA, working with these partners, is serving as the Project Manager for the EIS. As currently planned, this Light Rail Transit (LRT) project extends along an 18-mile corridor serving 12 communities with 14 proposed passenger stations, using trains that are proposed to operate within a 7 ½ minute frequency during the morning and afternoon peak service periods. This system is projected to carry 18,000 riders by the year 2030.

The Glassboro-Camden Line would function as an additional transit choice that provides improved service throughout the region, enhancing links between people and activity centers. A well-planned LRT system maximizes existing transportation assets with minimal adverse impacts to the environment. Operating transit systems tend to mitigate highway congestion, reduce the number of miles traveled and decrease corresponding CO, NO, and VOC emissions. The selected GCL light rail alternative supports state and local planned growth initiatives and will improve the overall quality of life in southern New Jersey. The current EIS phase should be completed by the end of calendar year 2014.

Transit investments provide numerous benefits – both to society and to individual travelers. Getting commuters out of cars and onto trains is perhaps of the best investments in

clean air we can make. We will continue to do all we can to enhance the quality of life for commuters and residents of South Jersey and Philadelphia and help the environment in the process.

If I can provide any further information in this regard, please do not hesitate to contact me.

Yours truly heatenan Jøhn J. Matheussen

CEO, Delaware River Port Authority & President of PATCO

Barry Seymour Delaware Valley Regional Planning Commission American College of Physicians Building, 8th Floor 190 N. Independence Mall West Philadelphia, PA 19106

Dear Mr. Seymour,

I am writing in response to public comment on the DVRPC Draft 2012 Transportation Improvement Program in regard to NJDOT DB# D0701, "Princeton-Hightstown Road Improvements, CR 571" for the segment between Clarksville and Wallace Roads.

Comments generally praise the project for adding bicycle and pedestrian amenities in what West Windsor Township desires to be a 'main street', mixed-use district near the Princeton Junction train station. Most commentators urge the project to go further. The pedestrian crossing at Sherbrooke Drive attracted particular concern. Aware of this concern, Mercer County recently conditioned approval of a site plan for Windsor Plaza redevelopment on the installation of rectangular rapid flashing beacons and other pedestrian improvements at this location. These will persist as an existing condition through the federal project. With concurrence from West Windsor, the County will also consider lowering the speed limit to 25 MPH. Other comments, however, urge significant design changes that reduce travel speeds and create refuges for crossing pedestrians.

A project for this section has been on the TIP twice before. After graduating to the TIP in 1993, the West Windsor Township Council reversed its endorsement of a project to add pedestrian amenities and widen the road to 5 lanes. The Council re-iterated its opposition to widening when NJDOT listed a similar project in the 2002 Local Scoping program. Thereafter, West Windsor took the lead and in 2005 both its Planning Board and its Council endorsed a design for a three-ane section, including extensive bicycle and pedestrian amenities, following a thorough alternatives analysis and public outreach process. After very minor changes during Preliminary Design, the current TIP moves the

project forward into final design. Significant changes to the design at this point will force the project to be dropped from the TIP and revert back to the alternatives analysis phase. This will delay implementation for years, if not preclude it from ever receiving federal funding.

In the public outreach process leading to the preferred alternative, some citizens voiced concerns similar to those raised today. As a result, the final preferred alternative amalgamated the design with the smallest cartway width (to reduce pedestrian crossing distances) and the design with continuous bikeable shoulders. To go further, as advocated by the West Windsor Bicycle and Pedestrian Alliance, and eliminate auxiliary lanes, reduce turning radii, and introduce other traffic calming elements, conflicts with the imperative that this segment of CR 571 safely move vehicular traffic.

CR 571 is a Principal Arterial (AADT ~20,000) and serves as the only direct link between the NJ Turnpike, Princeton Junction train station, US Route 1, and the Township and Borough of Princeton. Turn volumes are high at signalized intersections, where auxiliary lanes will improve operations and safety. Without auxiliary lanes to enhance the free flow of through traffic—including Bus Rapid Transit vehicles travelling in traffic on this segment—opportunities for regional economic development may be jeopardized. In every project such as this, the final preferred alternative must be a compromise. In this case, regional mobility needs must be accommodated while enhancing safety for all travel modes.

Sincerely,

tophy.

Matthew Lawson, AICP/Ph.D. Principal Planner

THE DELAWARE VALLEY REGIONAL PLANNING COMMISSION (DVRPC) ANNOUNCES FOR PUBLIC REVIEW:

DRAFT DVRPC Fiscal Year (FY) 2014 TRANSPORTATION IMPROVEMENT PROGRAM (TIP) FOR NEW JERSEY (FY2014-2017)

The Delaware Valley Regional Planning Commission (DVRPC) is seeking your input. We will open a public comment period for the Draft FY2014 Transportation Improvement Program (TIP) for New Jersey (FY2014-2017) on May 17, 2013; the comment period will close at 5 p.m. on June 18, 2013. The TIP is the regionally agreed-upon list of priority transportation projects, as required by federal law.

Please join us for a public meeting and information session on the Draft FY 2014-2017 TIP for NJ between the hours of 4 and 6 p.m. on:

Wednesday, June 12, 2013 Cherry Hill Library 1100 Kings Highway North Cherry Hill, NJ

The meeting will be conducted jointly with the New Jersey Department of Transportation (NJDOT) and also serve as an opportunity to comment on the NJDOT Draft New Jersey Statewide Transportation Improvement Program (STIP), which is available at <u>www.state.nj.us/transportation/capital/cpd/</u> and also at the DVRPC Resource Center (located at the address below). The public comment period for the NJDOT STIP will also open on May 17, 2013 and will close no earlier than June 18, 2013. The NJDOT Draft STIP Public Comment Period will remain open until all three New Jersey MPOs (Metropolitan Planning Organizations) have closed their FY2014 TIP public comment periods.

Copies of DVRPC's Draft TIP documents are available at <u>www.dvrpc.org</u>, in the DVRPC Resource Center, as well as in a number of regional libraries. The documents will also be available at the public meeting, and can be translated into an alternative format or language, if requested.

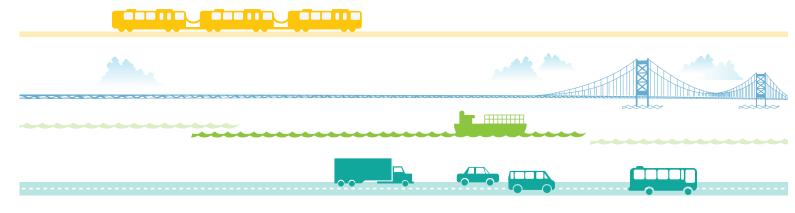

The release of, and public comment periods for, the Draft DVRPC Long-Range Plan, and Draft Transportation Conformity finding will follow. Written comments and questions may be addressed to Plan/TIP/Conformity Comments, c/o DVRPC Public Affairs Office, 190 N. Independence Mall West, 8th Fl., Philadelphia, PA 19106, e-mailed to <u>tip-plan-comments@dvrpc.org</u> or submitted online at <u>www.dvrpc.org/TIP</u>. **Comments for the Draft TIP must be received no later than 5 p.m. on June 18, 2013.**

DVRPC fully complies with Title VI of the Civil Rights Act of 1964 and related statutes and regulations in all programs and activities. DVRPC public meetings are always held in ADA accessible facilities and in transit-accessible locations when possible. Auxiliary services can be provided to individuals who submit a request at least seven days prior to a meeting. For more information please call (215) 238-2871.

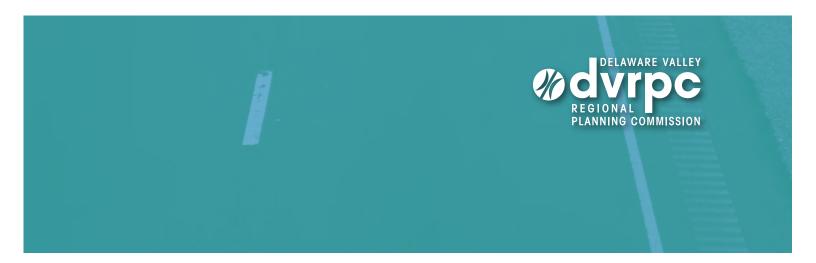

COMMONWEALTH OF PENNSYLVANIA: BUCKS COUNTY I CHESTER COUNTY I DELAWARE COUNTY I MONTGOMERY COUNTY I CITY OF PHILADELPHIA I CITY OF CHESTER STATE OF NEW JERSEY: BURLINGTON COUNTY I CAMDEN COUNTY I GLOUCESTER COUNTY I MERCER COUNTY I CITY OF CAMDEN I CITY OF TRENTON

Highlights of the Draft TIP FY 2014 Draft TIP for New Jersey (FY 2014-2017)

TIP TRANSPORTATION IMPROVEMENT PROGRAM

The Delaware Valley Regional Planning Commission is dedicated to uniting the region's elected officials, planning professionals, and the public with a common vision of making a great region even greater. Shaping the way we live, work, and play, DVRPC builds consensus on improving transportation,

promoting smart growth, protecting the environment, and enhancing the economy. We serve a diverse region of nine counties: Bucks, Chester, Delaware, Montgomery, and Philadelphia in Pennsylvania; and Burlington, Camden, Gloucester, and Mercer in New Jersey. DVRPC is the federally designated Metropolitan Planning Organization for the Greater Philadelphia Region leading the way to a better future.

The symbol in our logo is adapted from the official DVRPC seal and is designed as a stylized image of the Delaware Valley. The outer ring symbolizes the region as a whole while the

diagonal bar signifies the Delaware River. The two adjoining crescents represent the Commonwealth of Pennsylvania and the State of New Jersey.

DVRPC is funded by a variety of funding sources including federal grants from the U.S. Department of Transportation's Federal Highway Administration (FHWA) and Federal Transit Administration (FTA), the Pennsylvania and New Jersey departments of transportation, as well as by DVRPC's state and local member governments. The authors, however, are solely responsible for the findings and conclusions herein, which may not represent the official views or policies of the funding agencies.

DVRPC fully complies with Title VI of the Civil Rights Act of 1964 and related statutes and regulations in all programs and activities. DVRPC's website (www.dvrpc.org) may be translated into multiple languages. Publications and other public documents can be made available in alternative languages and formats, if requested. For more information, please call (215) 238-2871.

Highlights for the Draft Delaware Valley Regional Planning Commission FY2014 TIP for New Jersey

The Draft Delaware Valley Regional Planning Commission (DVRPC) FY2014 Transportation Improvement Program (TIP) for New Jersey is available for public review. The TIP, like the Commission itself, includes the counties of Burlington, Camden, Gloucester, and Mercer in New Jersey. DVRPC prepares a major update to the New Jersey TIP every other year to coincide with the update of NJDOT's fiscally constrained 10-year Statewide Transportation Improvement Program (STIP), and releases a draft program for a review and comment period prior to recommending it for adoption. This year, the Public Comment period will begin on May 17, 2013 and close at 5 p.m. on June 18, 2013. See further details regarding the review process at the end of this document.

What is the TIP?

By way of congressional mandate, federal transportation legislation (MAP-21) requires that DVRPC, as the MPO for the region, develop and update a Transportation Improvement Program (TIP) in order for the region to be eligible to receive and spend federal transportation funds.

The TIP lists all transportation projects that intend to use federal funds, as well as state funded capital projects that are transportation improvement priorities for this region. It is a multi-modal, four year program that shows estimated costs and schedules by project phase. Most importantly, the TIP is financially constrained to the amount of funds that are expected to be available. In order to add projects to the TIP, others must be deferred to maintain this financial constraint. As a result, the TIP is not a "wish list"; competition between projects for a spot on the TIP clearly exists. The TIP not only lists specific projects, but also documents the anticipated schedule and cost for each project phase (preliminary engineering, final design, right of way acquisition, and construction). Although it is not a final schedule of project implementation, inclusion of a project phase in the TIP means that it is seriously expected to be implemented during the TIP time period.

The production of the TIP is the culmination of the transportation planning process and represents a consensus among state and regional officials as to what near term improvements to pursue. Consensus is crucial because the federal and state governments want assurances that all interested parties have participated in developing the priorities before committing significant sums of money. A project's inclusion in the TIP signifies regional agreement on the priority of the project and establishes eligibility for federal funding. On Friday, July 6, 2012, Congress passed and the President signed the federal transportation authorization into law, Moving Ahead for Progress in the 21st Century (MAP-21), as Public Law (P.L.) 112-141. This legislation became effective on October 1, 2012 and will provide federal funding through September 30, 2014.

It is the first multi-year highway authorization after multiple temporary extensions of the Safe, Accountable, Flexible, Efficient, Transportation Equity Act: A Legacy for Users (SAFETEA-LU) that was signed in 2005 and expired in 2009. It builds on the initiatives established in SAFETEA-LU, the Transportation Equity Act for the 21st Century (TEA-21) and the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA). Final Rulemaking has yet to be issued.

Program Summaries

The Draft DVRPC FY2014 Transportation Improvement Program for New Jersey contains 132 projects (excluding Statewide and Study and Development projects), totaling \$1.7 billion for the phases to be advanced over the next four years (FY2014-2017), averaging \$437 million per year. Programmed funds include approximately \$904 million for projects primarily addressing the highway system and \$843 million for transit projects for NJ TRANSIT and DRPA/PATCO, as Table 1 and Figure 1 show.

	FY2014	FY2015	FY2016	FY2017	FY2014-2017
HIGHWAY PROGRAM					
Burlington	24,835	25,029	26,645	7,890	84,399
Camden	128,590	83,498	93,190	125,780	431,058
Gloucester	4,410	41,049	32,411	18,170	96,040
Mercer	13,852	14,862	25,888	14,836	69,438

Total Cost – 4-Year Transit Program					843,126
Grand Total Cost – 4-Year Highway, DVRPC Local Projects, and Transit Programs					1,746,988

Table 1: Cost Summary by County and Transit Operator (\$000)

* Highway subtotal per Fiscal Year and the Total Cost for the Highway Program from FY2014-2017 was revised on May 20, 2013.

Source: DVRPC, 2013

Per the Financial Guidance documents in Appendix B of the Draft NJ TIP, 20 percent of \$8.4 billion state and federal resources over the four years (FY2014-2017) of the TIP are administered through DVRPC (see Tables 6 and 8 in Appendix B of the Draft NJ TIP). DVRPC administers close to 11 percent of the \$8.4 billion in resources for the DVRPC highway program and nine percent of the resources for the DVRPC transit program. There is an additional \$2.9 billion that NJDOT directly administers on a statewide basis, and a portion of those funds are also directed to DVRPC throughout the four years.

DVRPC encourages the public to provide comments about the Draft TIP and specific projects to state, county, transit, and DVRPC staff through its ongoing public involvement process. The public comment period for the Draft DVRPC FY2014 TIP for New Jersey will open on May 17, 2013 and close on June 18, 2013 at 5:00 p.m. (EST). All comments can be submitted in writing, via TIP public comment application on the internet, email, fax and mail, so they can be included as part of the formal public record and final TIP document.

Comments can be made online as part of DVRPC's web-based TIP public comment application located at <u>www.dvrpc.org/TIP</u>. Additionally, written comments can be forwarded to:

Publication Title:

Highlights for the Draft DVRPC FY2014 Transportation Improvement Program (TIP) for New Jersey (FY2014–2017)

Publication Number: 14001A

Date Published: May 2013

Geographic Area Covered: DVRPC New Jersey Region (Burlington, Camden, Gloucester, and Mercer counties)

Key Words: Bike and Pedestrian, Bridges, Conformity, Congestion Mitigation and Bike and Pedestrian, Bridges, Conformity, Congestion Mitigation and Congestion Mitigation Air Quality. Process. DRPA/PATCO, Environmental Justice, Federally Funded Projects, Goods Movement, GARVEE, Highways, Hometown Streets/Safe Routes to School, Infrastructure Capital, Moving Ahead for Progress in the 21st Century, MAP-21. National Highway Performance Program, NHPP. Surface Transportation Program, STP, Highway Safety Improvement Program, HSIP, New Jersey Department of Transportation, NEW JERSEY TRANSIT, Pennsylvania Department of Transportation, Public Involvement, Railway-Highway Grade Crossing, SAFETEA-LU, TEA-21, TIP, Title VI of the 1964 Civil Rights Act, Transit, Transportation, Transportation Improvement Program, Transportation Alternatives, Transportation Equity Act for the 21st Century

Abstract: The Highlights for the Draft DVRPC FY2014 Transportation Improvement Program (TIP) for New Jersey briefly describes the region's TIP as a federally required, multi-modal, four year constrained program of planned transportation infrastructure investment. It also contains a summary listing of all transit, highway, bridge, bicycle, pedestrian, and freight related projects in DVRPC's New Jersey region which will seek federal funding in fiscal years (FY) 2014 to 2017. The Highlights document includes a financial summary of costs by county and by operator, as well as a section on how, when, and where to comment on the Draft DVRPC FY2014 TIP for New Jersey.

Publication Title:	DVRPC FY2014 Transportation Improvement Program (TIP) for New Jersey (FY2014-2017)	
Publication Number:	14001	
Date Published:	September 2013	
Geographic Area Covered:	DVRPC New Jersey region (Burlington, Camden, Gloucester, and Mercer counties)	

Key Words:Bike and Pedestrian, Bridges, Conformity, Congestion Mitigation and Air Quality,
Congestion Mitigation Process, DRPA/PATCO, Environmental Justice, Federally Funded
Projects, Goods Movement, GARVEE, Highways, Hometown Streets/Safe Routes to
School, Infrastructure Capital, Moving Ahead for Progress in the 21st Century, MAP-21.
National Highway Performance Program, NHPP, Surface Transportation Program, STP,
Highway Safety Improvement Program, HSIP, New Jersey Department of Transportation.
NJ TRANSIT, Pennsylvania Department of Transportation, Public Involvement,
Railway-Highway Grade Crossing, SAFETEA-LU, TEA-21, TIP, Title VI of the 1964 Civil
Rights Act, Transit, Transportation, Transportation Improvement Program,
Transportation Alternatives, Transportation Equity Act for the 21st Century

Abstract:The Transportation Improvement Program (TIP) document contains a listing of all transit,
highway, bridge, bicycle, pedestrian, safety, and multimodal projects in the DVRPC
New Jersey region that will seek federal funding in fiscal years 2014 to 2017.
This volume also contains the following seven appendices: (a) Board Resolutions;
(b) Financial Guidance used in developing the program and STIP Introduction;
(c) Executive Summary of the Documentation of the Conformity Finding;
(d) Memorandum of Understanding on Procedures to Amend and Modify the TIP;
(e) DVRPC Local Program; (f) Summary of Public Outreach, Public Comments,
and Agency Responses; and (g) NJDOT's "Tier 2" Unfunded Projects.
