**Comment/Question:** Kudos to the DVRPC Board for bringing this item to the agenda. For too long the system has endured many glitches especially in busy stations such as 69th Street and with the funding of this project maybe it will enhance the system to make it better, easier and faster to give updates on real time information.

**Response:** Your comment was shared with the DVRPC Board, DVRPC's Office of Capital Programs, and SEPTA. Your support is appreciated.
